

□ PRAVDA

English translations of PRAVDA the official news organ of the Soviet Socialist Republic. This disc includes complete issues through April and selected issues from then on. In addition to being an efficient and convenient way to research what the official Soviet Communist Party line was on internal and international events during 1987, PRAVDA is an excellent example of the database capabilities of CD-ROM. PRAVDA is indexed for full text search and retrieval. The software is easy to learn and yet has advanced features like phrase searching and Boolean operators.

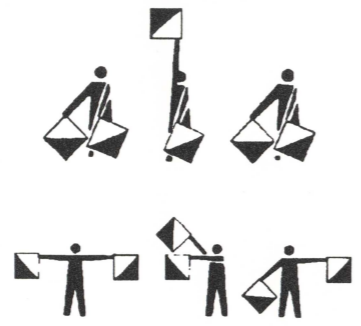

□ GRAPHICS LAB

Our public domain graphics disc has hundreds of drawings, pictures, and images suitable for desktop publishing and personal enjoyment. It includes high quality color EGA and VGA images in the Graphics Interchange Format (.GIF) plus many more black and white images in Macintosh .MAC Paint format. Plus we include shareware image viewing utilities on a separate diskette. A great way to give your bulletin board a unique twist, or to supplement your graphics library.

□ ADA ROM

One of our programmers series. This disc contains a government library of public domain ADA programs. ADA ROM contains source code, templates and utilities to help you

with your next ADA project. ADA is the new standardized programming language developed for use by the US government and many government contracts may require its use. It may also be used in the future by large organizations that wish to standardize the language used in house.

All ALDE CD-ROM's are available bundled with a complete CD-ROM system. The system includes:

- CD-ROM Player (half height or stand alone)
- Interface Cable
- Half-Card Controller Board
- MS-DOS CD-ROM Extensions (makes the player run just like another hard drive, includes audio software.)
- Note that ALDE also has PS2 controller boards available, call about pricing.

SHAREWARE

GRAB BAG

Over 6500 public domain, shareware, and freeware programs for the IBM PC XT/AT/PS2 compatibles and clones. The disc is divided into 33 numbered subdirectories on subjects ranging from games and graphics through turbo pascal and bulletin boards. The master listing of all files on the disc comes in three versions; alphabetical by file name, numerical by subdirectory number, and RBBS. This disc is the ideal disc for the personal computing enthusiast.

SOFTWARE

DU JOUR

365 programs selected from our extensive public domain, shareware, and freeware library. This disc provides an inexpensive introduction to PC based shareware and CD-ROM. DU JOUR is organized into subdirectories with names that are easy to understand like SCHOOL, HOME, PERSONAL, and BUSINESS, each subdirectory has a descriptive listing, and there are directions on how to access the programs. Using this disc is as easy as using a hard drive. Get started in shareware and CD-ROM with Software du Jour!

SPECTRUM

Our Spectrum Clip Art CD-ROM contains over 7000 images from the Dover Publications Ready-to-Use and Quick Copy Art plus several hundred Federal Logos and Seals. Enhance your next desktop publishing project using these prescanned PCX images. Areas covered include Accents, Attention Getters, Art Nouveau, Art Deco, Borders, Arrows, Banners, Faces, Old Fashioned Engravings, Silhouette Illustrations, Spot Illustrations, and more.

Plus the disc comes with SHOW an image viewing utility, a catalog with examples of each kind of image and descriptions of each image, a list of all images with LIST a text search utility program, and directions on how to use the disc.

The Federal Logos portion of the disc contains the official Federal designs and seals used by the Government Printing Office. Enhance your next government proposal with the official seal or design of the department.

All the images on SPECTRUM were scanned at 300 dpi from the originals.

C CD-ROM

One of our programmers series discs. This disc contains an entire library of public domain C source code, templates, and utilities, all archived for convenient downloading and storage. Use C CD-ROM to jump start your next C programming project. Specialized areas on the Disc include Aztec C, C86, Desmet C, Lattice C, Microsoft C, and Turbo C.

ONLINE HOTLINE

Another demonstration of the database capabilities of CD-ROM. Covering the period from 1980 through 1988, during which the computer industry underwent significant change this news ser-

vice has concise inside story accounts about the personal computer industry, mainframe usage in educational institutions, the development of online services, and optical storage devices during a period of accelerating change. Now you can have a historical archive on the computer industry at your disposal.
