

This is your complete
COMDEX/Fall '91 Program &
Exhibits Guide on diskette.

For a replacement 3½" diskette visit FOLIO (#S1659) or TRACE (#2012).

Your business is safe with us.
Especially when space is critical.

High-capacity advances from 3M.

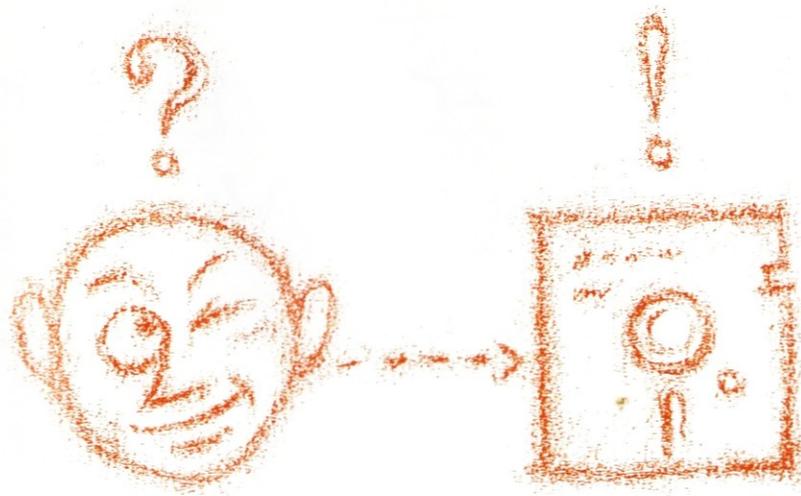

We wouldn't be the leader in data storage products if we didn't meet your critical needs. Our high-capacity media, such as the 3M Magnus™ 1.35 Gigabyte Data Cartridge, 3M Rewritable Optical Disk Cartridges and 3M's new Floptical® Diskette Technology, allow you to store more information on a single cartridge or diskette. And our advances in the fight against data loss give you confidence that your information will stay put. The result: increased productivity and lower media costs.

To learn more about the out-of-this-world benefits of 3M's high-capacity data storage products, call 1-800-888-1889, ext. 22.

Innovation working for you™

Worldwide Sponsor 1992 Olympic Games

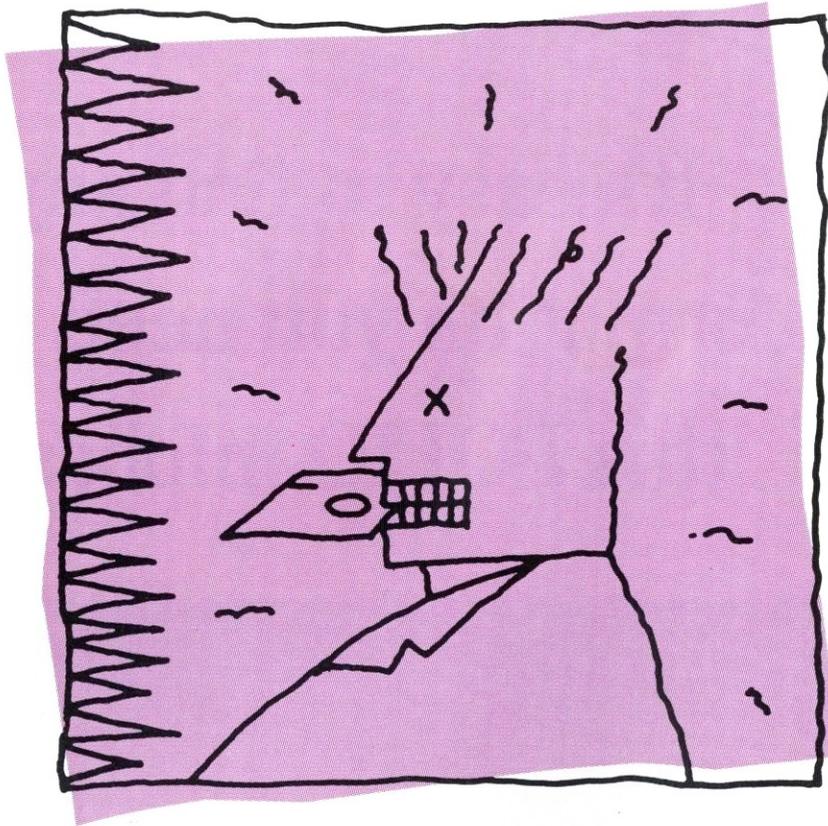

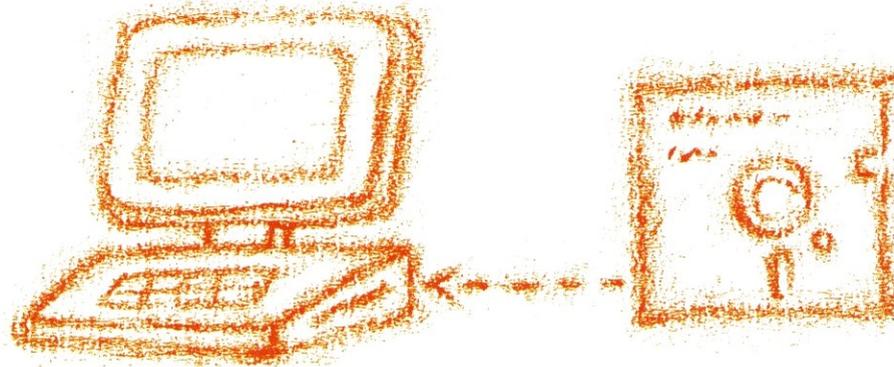

It's easy to find any
information you need using
this FOLIO infobase.

JUST ONE DEFECTIVE DISKETTE CAN RUIN YOUR WHOLE DAY.

Trace Duplication Systems for Zero Defect Manufacturing.

Sure, maybe it is just one defective diskette. But it's also one upset customer. And how many more are there? At Trace, we know how important quality is. That's why our duplication systems give you the technology you need to create a perfect master and write a perfect disk. And we've got the track record to prove it. 85% of leading software publishers and duplication services already use Trace Diskette Duplication Systems. So, don't let your day get ruined. Call us at (800) 872-2318 today.

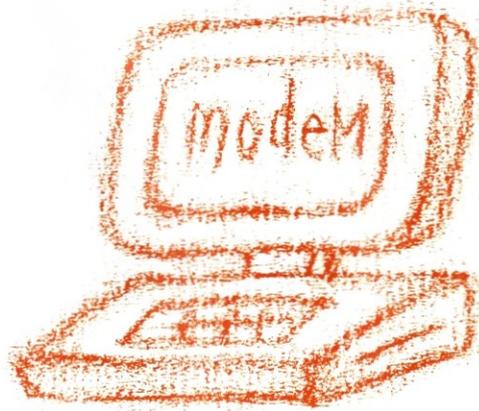

First, LOAD the diskette
on any PC running DOS 3.0 or higher.
To run the program, type FALL91.

The Past, Present, and Future
of Network Computing.

To receive your FREE Buyer's Guide Infobase see us
at the Networking Pavilion, Mirage Hotel, booth #504.

Then type in any word to find
the information you want.

For example, if you want to find modem companies, just hit the space bar to start the search, type the word MODEM, then press ENTER. Or you can find out when a person is speaking by typing the name. Or to find a particular booth,

FOLIO type the name of the company or product. The possibilities are endless.

WHAT DO THESE TWO GREATS HAVE IN COMMON? EVANS/TANDEM DESIGN.

Don't you wish searching through tons of information could always be this easy?

With the help of a FOLIO infobase, it can be. Just think how you could use a FOLIO infobase to retrieve, group and organize all that disassociated information you have to deal with. User manuals, directories, law libraries, business publications, books—nearly anything can be put in a FOLIO infobase for quick and easy reference. To learn about the infobases already published or to find out how you can create your own, contact us at the Sands booth #S1659 or call **800-543-6546** or **(801) 375-3700**.
