

OpenVMS™ Alpha Software Product Library—March 1998

AV-PW3MY-RE

Welcome to this month's OpenVMS Alpha Software Product Library Package. The March 1998 package includes the changes described in the following sections.

What's new for the NAS Products

Beginning with this release of the Software Products Library, the NAS Packages component products will not ship on separate NAS discs within the Software Products Library, but can be found on the Software Products Library discs themselves.

The NAS base kits (including the group license table) and NAS documentation are delivered inline on the Software Products Library. The NAS component product kits can be obtained as a part of the Software Product Library or as separate component kits.

For a complete list of the NAS component products and their disc location, please consult the NAS table in the Software Products Library Master Index.

Master Index Table for Enterprise Integration Packages

Beginning with the March 1998 Software Products Library, the Enterprise Integration Packages product matrix is included as a separate table within the Software Products Library Master Index. Please use this table to locate the products.

Archive/Backup System

Customers for Archive/Backup System will find the new release of that product in its own directory Library rather than bundled into the Storage Library System kit.

Existing customers will continue to be able to access the new 2.2 version with their prior SLS license.

Product Retirements and Removals

Retirement Notification for StorageWorks Desktop Backup/Archiver

StorageWorks™ Desktop Backup/Archiver (UPILV: 387AA) has been removed from this library due to its retirement and end of service life.

Archive/Backup System (ABS) Version 2.2 for OpenVMS offers equivalent functionality to StorageWorks Desktop Backup/Archiver customers using NT™ systems. ABS 2.2 is available on this library package.

For additional detail, see the Products Retirement notification in the 16 December 1996 Customer Update, available at the following URL:

<http://www.digital.com/info/CU4316/>

Retirement Notification for POSIX®

Software Product Services wishes to inform you that Digital Equipment Corporation has begun a retirement process for POSIX for OpenVMS. As a result of this product retirement, Software Product Services for this product will no longer be available as of June 30, 1999.

Telephone support for POSIX for OpenVMS will be provided in accordance with the provisions of your maintenance contract through, but not beyond June 30, 1999. Warranty customers will receive support throughout their initial warranty agreement.

Your Local Digital Sales Representative is available to discuss the transition process or any questions that you may have.

Product Name Changes

The following product has changed its name with this package release:

Former Product Name	New Product Name	UPILV (No change)
DEC COBOL for OpenVMS Alpha Systems	DIGITAL COBOL for OpenVMS Alpha Systems	OJUAA

A Final Note
