Dear SYSD®/JFT Customer:

Enclosed is the SYSD/JFT cartridge and *Installation Instructions* for Job/File Tailoring (JFT).

Job/File Tailoring provides the ability to custom-build screens, prompt, and validate user input. The user's input can then be applied to a skeleton file and submitted to the internal reader or saved to an output file.

If you have any questions with this cartridge, please call our technical support staff at (208) 377-8436 for assistance.

Sincerely,

Lindsay Prisbrey

Systems Products

DataShare Y2K for VM and OS/390: DataShare Y2K provides concurrent access from VM and OS/390 to critical VSAM data into the next millennium, eliminating the need to convert or redesign VSAM applications to support year 2000.

SYSB-II® (MVS/VSE): SYSB-II permits CICS and batch to concurrently access VSAM files without program modifications. SYSB-II is designed to expand the functionality of CICS by allowing batch jobs to appear as another online CICS transaction. SYSB-II supports CICS sync pointing, dynamic transaction backout processing, journaling and recovery, and more.

SYSD®: SYSD is a CICS-based, affordable, low-overhead alternative or complement to PDF and SDSF SYSD offers: ISPF/PDF-like edit, browse and job submission, JES2 spool display and monitoring, print routing and printer control of system and CICS printers, DASD utilities, and CICS monitoring and debugging utilities.

SYSD/JFT®: SYSD/JFT (Job and File Tailoring) provides easy development and presentation of custom CICS screens. The screens may contain extensive data editing and verification and may be designed to match the end-user's level of expertise. The screens may be integrated into the SYSD menu system or set up to operate stand-alone. Control or data files may be generated and JCL customized, allowing inexperienced or casual users to create and submit jobs without knowing JCL.

SYSD/ATP®: The SYSD/ATP (Access to Panvalet) optional interface allows SYSD to manage CA-Panvalet libraries. The interface is fully integrated with the normal SYSD edit and browse screens. SYSD/ATP supports editing, browsing, directory maintenance, multiple libraries, CA-Panvalet security, and audit features.

CPMS®: CICS Print Management System (CPMS) allows users to monitor, route, and manage print jobs online.

SYSI®: SYSI allows users to move quickly between TSO and VTAM without a time-consuming logoff and logon process. SYSI functions as a valuable interface to CICS-based applications.

SYSJ®: SYSJ is a CICS application development tool that creates JES2 SYSOUT datasets. It operates in foreground and background mode and supports all JES2 SYSOUT parameters.

SYSS®: SYSS streamlines JES2 report distribution and review. SYSS allows for unlimited filtering criteria to create multiple versions of any SYSOUT report from any job on the spool.

H&W Products Summary

SYSM Electronic Mail Products

SYSM®: SYSM is a mainframe, CICS-based e-mail system available for the VSE and MVS operating environments. As a corporate e-mail system, SYSM offers full functionality including messaging, calendars, resource and conflict resolution scheduling, smart electronic forms, bulletin boards, and file cabinets. Users can choose from either a command-driven or PF-key user interface presentation.

SYSM® Directory Synchronization Interface / Microsoft® Exchange Edition: SYSM Directory Synchronization Interface (SYSM DSI) updates address books between SYSM and Microsoft® Exchange. SYSM DSI automates the process of exchanging address information between the two systems without disrupting your end users.

SYSM® Directory Synchronization Interface /Lotus Notes® Edition: SYSM Directory Synchronization Interface (SYSM DSI) updates address books between SYSM and Lotus Notes. SYSM DSI automates the process of exchanging address information between the two systems without disrupting your end users.

SYSM® E-Mail Connectivity Series / PC Edition: SYSM E-Mail Connectivity Series / PC Edition (EMCS) allows mainframe SYSM users to send and receive messages with the Internet and other users of electronic mail systems such as MS Mail®, Lotus Notes®, cc:Mail®, and HP Open Mail® just to name a few. SYSM EMCS provides SMTP support and is MIME compliant.

SYSM® E-Mail Connectivity Series / MVS Edition: SYSM E-Mail Connectivity Series / MVS Edition provides SMTP support and allows mainframe SYSM users to send and receive messages with the Internet and other users of electronic mail systems such as MS Mail®, Lotus Notes®, cc:Mail®, and HP Open Mail® just to name a few.

SYSM® EnterpriseFAX Server: SYSM EnterpriseFAX Server is a high-volume enterprise facsimile solution that streamlines business communications by automating the delivery of facsimile documents. The new Transaction Monitor function provides a quick visual snapshot so you can easily monitor fax traffic and status and troubleshoot problems.

SYSM® OV-LINK: SYSM OV-LINK enables users of SYSM to easily send and receive messages to VM users of OfficeVision. The interface provides a translation between OfficeVision and SYSM format. Messages are delivered directly into the SYSM user's Inbasket, where the full range of SYSM Inbasket capabilities are made available.

Wizard Mail Products

Wizard Mail™: Wizard Mail (MVS and VSE) is an entry level CICS-based electronic mail package that offers all standard e-mail functions including: sending mail, reading mail, directory of messages, mail lists, filing messages, user lists, bulletin boards, calendars/scheduling, and online help.

Wizard Mail™ E-Mail Connectivity: Wizard E-Mail Connectivity (EMC) addresses your Wizard mainframe user's need to exchange messages with users of other electronic mail systems such as MS Mail, Lotus Notes, cc:Mail, or HP Open Mail. This gateway converts Wizard internal message format to a standard Internet Text Message Format.

Wizard Mail™ OV-LINK: Wizard Mail (MVS) OV-LINK enables users of Wizard Mail to easily send and receive messages to VM users of OfficeVision. The interface provides a translation between OfficeVision and Wizard Mail format. Messages are delivered directly into the Wizard Mail user's Inbasket, where the full range of Wizard Mail Inbasket capabilities are made available.

Maintenance Policies

Problem Reporting

In the event of a problem, contact your product administrator. If you require further assistance, the administrator can contact the H&W Computer Systems' Customer Support staff at (208) 377-8436. This group is responsible for answering questions about the installation, operation, and maintenance of all H&W products.

When calling Customer Support, you will be asked to provide:

- Your name.
- Your company's name.
- Your customer number, which can be found on all H&W tapes, diskettes, and invoices.
- Your operating environment—for example, operating system and release, and CICS release.
- The H&W product's release level.
- A description of the problem, including all error messages.
- The severity of the problem.

If the problem involves a CICS or transaction abend, obtain a dump and have the dump accessible when calling for support.

If it appears that the problem will require programming support from H&W, please complete the Program Error Report (PER) form located in this manual. Send the completed form along with all supporting documentation to H&W.

When sending diagnostic information on tape, avoid processing delays by making sure that all dumps, traces, and so on are preformatted (print ready) and that the 3480 cartridge tapes are created with DCB=TRTCH=NOCOMP (no IDRC) specified.

Maintenance

Program Temporary Fixes (PTFs) are created to solve problems as they occur. PTFs are accumulated and distributed as Program Update Tapes (PUTs). Your site may need to reassemble and link edit the affected modules after loading a PUT tape.

User Enhancements

Some products have built-in user exits and interfaces that allow product customization. Changes outside of these exits and interfaces are discouraged because they interfere with normal maintenance procedures.

Use the Customer Enhancement Request (CER) form located in this manual to suggest enhancements, and send to H&W Computer Systems for consideration.

General

Comments, suggestions, and enhancement requests for this product and its documentation are welcomed. Your needs and ideas help shape the future of the product. We do listen.

You can contact H&W Computer Systems, Inc. at:

P.O. Box 46019 Boise, ID 83711

6154 North Meeker Place, Suite 100 Boise, ID 83713
