Microsoft Programmer's Library

CD-ROM Database of PC Programming References

The most comprehensive, authoritative, and valuable collection of programming documentation and sample code you'll find on-line—and it's all on a single CD-ROM disc.

Use keywords to locate relevant publication titles, chapter titles, even topic sentences of paragraphs.

Copy any of the thousands of lines of sample code, then save them as a new file to be pasted into your current project.

The power tool for power programmers.
Serious PC programmers need serious tools—like Microsoft Programmer's Library. You can tap the power of CD-ROM to navigate through more than 70 programming references and find answers easier than ever before.

The powerful search feature lets you execute full-text searches and quick look-ups. Flag often-used sections with electronic bookmarks. For global searches, use a single command to search across related resources in one of the 11 databases.

Programmer's Library works as either a standalone program or as a memory-resident program that can be loaded in seconds when needed, then unloaded to reserve maximum system memory. Either way, it's simple to find information—and to cut and paste any of the 3,000 files of sample code into your current project.

Now includes:

- Complete software development kit documentation and code listings for MS® OS/2 version 1.0 with Presentation Manager *(new!)*, Microsoft OS/2 LAN Manager version 1.01 *(new!)*, and Microsoft Windows version 2.1
- Programming guide to SQL Server version 1.0, the database engine for OS/2 systems *(new!)*; programming guides to Intel architecture *(new!)*
- Complete manuals for these Microsoft languages: FORTRAN (version 4.1) and C (version 5.1) optimizing compilers; Macro Assembler version 5.1; BASIC (version 6.0), Pascal (version 4.0), and QuickC® (version 2.0) compilers; Microsoft QuickBASIC version 4.5
- More than 10 Microsoft Press® books, including *Inside OS/2*, *Proficient C*, *Programming Windows*, *Advanced MS-DOS® Programming*, *Programmer's Guide to PC and PS/2® Video Systems*
- Articles from *Microsoft Systems Journal (new!)*
- Over 3,000 files of sample code.

System Requirements

- IBM PC, PC/XT™, PC/AT®, and 100% compatibles and the Personal System/2 series
- 640K memory (512K required for systems with hard disk)
- DOS 3.1, 3.2, or 3.3
- Two double-sided disk drives or one double-sided disk drive and a hard disk
- One CD-ROM disc drive with Microsoft MS-DOS CD-ROM Extensions

Options

- Microsoft Mouse
- EMS 3.2 support
- DOS 4.0 (with Microsoft MS-DOS CD-ROM Extensions version 2.1 or higher)

Microsoft Programmer's Library provides interactive support for these popular programming editors:

- BRIEF® 2.0 and 2.1
- Epsilon™ Editor 3.21
- ME Text Editor 2.0
- Microsoft Editor 1.0
- Microsoft QuickBASIC Editor
- Microsoft QuickC® Editor
- Multi Edit
- The Norton Editor 1.30
- Turbo C® Editor 1.5 and 2.0
- Turbo Pascal® Editor 4.0 and 5.0
- VEDIT® PLUS 2.03f and 3.0

Compatible word processing programs include:

- Microsoft Word version 2.0 or higher
- PC-Write™ 2.71 and 3.0
- WordPerfect® 4.2, 5.0
- WordStar® Professional 4.0
- XyWrite™ III, III Plus
