Problem

To use the IN-MEMORY INFORMATION SYSTEM with the 32K and 48K system, the following additional steps are required before the programs are run.

Solution

INITIALIZATION

1. Load the program under the SYSTEM mode.
2. After the program has loaded and the computer prompts you with '*?', press BREAK and return to BASIC.
3. Type the following: POKE 17607,218 and press ENTER.
4. Return to the SYSTEM mode and type '/17280', followed by <ENTER>. This will start the program.

RETRIEVAL & UPDATE

Same as above, except in Step 3. Type: POKE 17894,218
