Problem

Two reports, Bill of Material, and Pull Sheets will occasionally not print to completion because of a program error. This problem only occurs when the finished good contains more than 63 raw materials.

Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD"REPORT1".
3. Make the following corrections:
