Problem

In some cases, the customer might need to change the current period, beginning date of the period, or the beginning date of the year. The only way to do this is by starting a new inventory system, or the customer can run this program:

Solution

1. At TRSDOS READY type in BASIC -F:1
2. At Ready type in the following program.

```
5 CLS:PRINT"ENTER THE FOLLOWING INFORMATION"  
10 INPUT"CURRENT PERIOD SYSTEM SHOULD BE IN";PD  
20 INPUT"BEGINNING DATE FOR PERIOD";BP$  
30 INPUT"BEGINNING DATE FOR YEAR";BY$  
35 OPEN"R",1,"CONTROL/DAT",96  
40 FIELD1,10ASDU$,2ASPD$,6ASDM$,9ASPB$,9ASYB$  
50 GET1,2  
60 LSETPD$=MKI$(PD):LSETPB$=BP$:LSETYB$=BY$  
70 PUT1,2  
80 CLOSE
```

3. At Ready type RUN and answer the appropriate questions.

NOTE: All days must be entered in the following way: Three characters for the month, two integers for the day, and four for the year, with no spaces between them.

EXAMPLES:
JAN011980
MAY211980
OCT031980

4. At Ready type SYSTEM "IMS"
5. When the program loads, check the period and date to make sure it is correct.
