Problem

In the Receive Purchase order section of IMS if the purchase order created was a large one and the quantity received left the amount not shipped greater than 32768 an OV ERROR will occur when the order is put on backorder status. This is caused by the variables involved being integers.

Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD"ORDER/BAS".
3. Make the following corrections:
