Problem

1) Scripsit locks up when the user attempts to use a serial printer with Merge.

2) Under some circumstances, when the user recalls text into a word, causing the text to exceed the margins, the cursor may be left off text. Scripsit fails to flag the error and unpredictable results may occur.

Solution

1) These patches will correct problem #1.
The date at the bottom of the STARTUP screen must be Ø6/Ø2/1982 before these patches are applied, if not, obtain and apply all previous patches.

PATCH SCRIPSIT/SYS {R=176 B=2Ø F=9ØDA C=ØBD6}
PATCH SCRIPSIT {A=D6ØB F=ØØØØØØØØØØØØØØØØ C=FDCB7F7EC8C39ØDA}

2) These patches will correct problem #2.

PATCH SCRIPSIT {A=B228 F=2CA4 C=DFD5}
PATCH SCRIPSIT {A=D5DF F=ØØØØØØØØØØØØ C=CD2CA4C35CA9}
PATCH SCRIPSIT {A=B21C F=FE8D2Ø C=C3B8D5}
PATCH SCRIPSIT {A=D5B8 F=ØØØØØØØØØØØØØØØØØØ C=FE8DCA2ØB2CD5CA9AFC9

After the preceding patches have been applied, make the following patch to change the date at the bottom of the startup screen to Ø6/Ø9/1982.

PATCH STARTUP {A=E412 F=B2 C=B9}
