Bulletin No.	4713-01 (Correction 1)
Description	EDITOR ASSEMBLER
Model	MODEL II
Stock No.	26-4713 Ver. 01.00.00
Date	February 9, 1983
Page 1 of	1

Problem

The OTDR instruction assembles improperly with the Series I Editor Assembler.

* * THE FOLLOWING PATCH IS REQUIRED! * *

Solution

The reference book used for checking the assembler, had a typographical error which caused the mistake. OTDR should assemble as "EDBB". The Series I package assembles "ED8B" instead.

To correct the problem, apply the following patch to your EDTASM program:

```
PATCH EDTASM A=4E30 F=8B C=BB
```

Users who wish to correct the comment line in the SAMPLE/SCR should change ;ED8B to ;EDBB.
