Walnut Creek CDROM

Windows 95/NT   DOS MSDOS   UNIX

Usage Instructions

Windows 95:

1. Go to the Start button and choose RUN.
2. In the command line box, type:

    D:\setup.exe

    (If the D: drive is not your CDROM drive, change it to the appropriate CDROM drive letter.)
3. Click OK to start the installation.

MSDOS:

1. Change to your CDROM drive and type "view."

    Example:

    C:\> D:
    D:\> view

    Please consult \DOCS\VIEW.DOC for a full explanation on using VIEW.

Windows 3.1:

1. Start up Windows.
2. Choose RUN from the Program Manager File menu to see the RUN dialog box.
3. In the command line box, type:

    D:\setup.exe

    (If the D: drive is not your CDROM drive, change it to the appropriate CDROM drive letter.)
4. Click OK to start the installation.

Unix:

Please consult README.TXT.

The Internet Info disc is a large collection of reference material related to and gathered from the rapidly growing information superhighway known as the Internet.

On this disc, you will find over 17,000 documents covering many aspects of the Internet, including the following:

- HTML Tutorials and Documentation
- World Wide Web Guides
- Answers to Frequently Asked Questions (FAQs)

- Internet RFCs (Request for Comments)
- Internet IENs (Internet Notebook Papers)
- Computer Security Documents
- Internet Network Maps
- Usenet Technical Discussion Archives
- FTP Sites Lists and Descriptions of Archives
- Extensive Bibliographies and Technical Book Reviews
- Documents and Standards from IEEE, ISO, NIST, ANSI and Others

This disc is geared toward all users from beginners to long time Internet users. For the more advanced users, the archive of Internet standards and resource guides may come in very handy. Beginners will find a vast collection of non-technical reference material, as well as a collection of FAQs and other guides.

This disc is best used on an operating system which supports Rock-ridge extensions for CDROMs, but will also work on any system that uses standard ISO 9660 format (Windows and DOS).
