PROGRAMMING PROCEDURES	SECTION 100-006-300
OPERATING PROCEDURES	SECTION 100-006-400
FAULT FINDING PROCEDURES	SECTION 100-006-500

## FCC REGISTRATION

The STRATA VI electronic key telephone system is registered in accordance with the provisions of Part 68 of the Federal Communications Commission's Rules and Regulations.

Items B, C and D are also indicated on the equipment label.

You must notify the telephone company upon final disconnection of your equipment.

## FCC REQUIREMENTS

### Means of Connection

The Federal Communications Commission (FCC) has established rules which permit the STRATA VI electronic key telephone system to be connected directly to the telephone network. A jack is provided by the telephone company—jacks for this type of customer-provided equipment will not be provided on party lines or coin lines.

### Incidence of Harm

If STRATA VI is malfunctioning, it may also be disrupting the telephone network. The system should be disconnected until the problem can be determined and repaired. If this is not done, the telephone company may temporarily disconnect service.

### Telephone Network Compatibility

The telephone company may make changes in its technical operations and procedures. If such changes effect the compatibility or use of STRATA VI, the telephone company is required to give adequate notice of the changes.

### Notification to Telephone Company

Before connecting STRATA VI to the telephone network, the telephone company must be provided with the following:

- A. Your telephone number
- B. The FCC registration number (BF 287N-69981-KF-E)
- C. The ringer equivalence number (0.5 B)
- D. The USOC jack required (RJ-25C)

## RADIO FREQUENCY INTERFERENCE

This equipment generates and uses radio frequency energy and if not installed and used properly (that is, in strict accordance with the manufacturer's instructions), may cause interference to radio and television reception. The equipment has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Reorient the telephone equipment with respect to the receiver.
- Move the telephone equipment away from the receiver.
- Plug the key service unit into a different outlet so that the KSU and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet, prepared by the Federal Communications Commission, helpful: How To Identify and Resolve Radio-TV Interference Problems. This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 004-000-00345-4.

### **PUBLICATION INFORMATION**

Toshiba Telecom reserves the right, without prior notice, to revise this information publication for any reason, including, but not limited to, utilization of new advances in the state of technical arts or to simply change the design of this document.

Further, Toshiba Telecom also reserves the right, without prior notice, to make such changes in equipment design or components as engineering or manufacturing methods may warrant.
