

MacExtender

Make Debugging Easier! use MacExtender

- * Raise your card almost 4.5"
- * TestPoints on all active signals
- * Power and Ground Planes
- * High quality Panduit Connectors
- * Front panel for additional support
- * .025" square posts for scope and logic analyzer
- * Clean Power doesn't add to your system noise
- * Lots of trouble free insertions

Make your hardware debugging and software testing easier and faster! How many times have you wished that you could probe a signal and not been able to "get there from here"? The MacExtender will raise your card above the logic board. Now you will be able to directly access both sides of your hardware and have testpoints on all of the active NuBus signals.

Offered at \$79
