 HUG Bulletin Board
 and Software Developer Terry Jensen
 HUG Secretary Margaret Bacon
 REMark Editor Walt Gillespie
 Assistant Editor Nancy Strunk

REMark is a HUG membership magazine published 12 times yearly. A subscription cannot be purchased separately without membership. The following rates apply.

	U.S. Domestic	Canada & Mexico	International
Initial	\$18	\$20*	\$28*
Renewal	\$15	\$17*	\$22*

*U.S. Funds.

Membership in England, France, Germany, Belgium, Holland, Sweden and Switzerland is acquired through the local distributor at the prevailing rate.

Limited back issues are available at \$2.50 plus 10% handling and shipping. Check HUG Product List for availability of bound volumes of past issues. Requests for magazines mailed to foreign countries should specify mailing method and appropriate added cost.

Send Payment to: Heath Users' Group
 Hilltop Road
 St. Joseph, MI 49085

Although it is a policy to check material placed in REMark for accuracy, HUG offers no warranty, either expressed or implied, and is not responsible for any losses due to the use of any material in this magazine.

Articles submitted by users and published in REMark, which describe hardware modifications, are not supported by Heathkit Electronic Centers or Heath Technical Consultation.

HUG is provided as a service to its members for the purpose of fostering the exchange of ideas to enhance their usage of Heath equipment. As such, little or no evaluation of the programs or products advertised in REMark, the Software Catalog or other HUG publications is performed by Heath Company, in general and HUG in particular. The prospective user is hereby put on notice that the programs may contain faults the consequence of which Heath Company in general and HUG in particular cannot be held responsible. The prospective user is, by virtue of obtaining and using these programs, assuming full risk for all consequences.

Just what is the Heath Users' Group all about?

I suppose this is a question asked by just about every new owner of a Heath or Zenith computer. It's also a question that even old time members and HUG staff members need to ask themselves from time to time. It is easy to get caught-up in the complexity of the day to day world of computers and to lose perspective.

The concept of any "special interest group" (and HUG is a special interest group) is to promote that interest throughout the membership and to those outside the group who might be interested in joining. Like any organization, HUG has some who are more vocal than others, those who are far more advanced in knowledge and technique, some who are more interested in 'hardware' (equipment), or 'software' (programs). Each of these areas can be broken down still further in special interests. No matter how far down you take the microscope on special interest the one thing that still holds true at all levels is the quest for more knowledge. The old timer as well as the new comer are all looking for more knowledge as how to best utilize the computer no matter how special their interest may be on the final application of that knowledge.

The spreading of as much knowledge about our chosen computer, the sharing of our own personal experiences can help to stimulate others to greater heights. Just think if the concept of micro-computers had been kept to just a few individuals, a whole new industry would never have gotten started or blossomed as it has.

There are many ways to help spread members ideas and this knowledge. With a circulation of over 15,000 per month REMark magazine is one good way. The HUG Library is still another excellent way of spreading your knowledge to others. Through both these channels, detailed descriptions and examples can reach thousands of other computer enthusiasts.

Through REMark magazine we try to provide you with detailed instructions, example programs, interesting applications, plus hardware and software modifications to better utilize your computer system. The majority of these materials are donated by HUG members to be shared with all the other members.

In the HUG Program Library are literally hundreds of programs, again, mostly donated by fellow members. These programs are sold to the general membership at nominal prices to help offset the cost of duplication and HUG national costs. Some programs in the library pay a royalty to the author and still others were developed here at the Heath Users' Group offices. The range of these programs defies the boundaries of this publication to explain and thus the HUG Catalog has been published.

Yet another service of HUG, the HUG Software Catalog, serves to explain in detail each program that HUG has released up till December 1982. This indepth explanation of each HUG Library program is supplemented monthly in REMark Magazine with detailed abstracts of new product releases.

Your local Heath Users' Group is yet another way to help spread the knowledge. These clubs are springing up all over the country and around the world, with the members' main goal being that of helping each other. I have found that in helping others to better understand a particular aspect of computers or programming I have in fact helped myself to a better understanding. That's the concept that local HUG's

Bob Ellerton
HUG Manager

Pat Swayne
Software Engineer

operate with. If there isn't a local HUG in your area, possibly now is the time to start one; the interest in computers is growing daily. Check with your local schools. Many are giving computer courses under Adult Education Programs. Also check local colleges and even newspapers. Yes, an advertisement placed in a local newspaper or shoppers guide might bring out others who have also been looking and may spark new lasting friendships that will grow over the years. A visit to other computer clubs might have you finding a fellow Heath/Zenith owner who is but one in a group of non-H/Z owners. REMark will publish your name stating that you would like to start a local group, and anyone interested may contact you.

It's exactly these steps that I used to try and find others who were interested in the H/Z computers that led to a good and lasting friendship with Al Jacobs of Western Michigan University in Kalamazoo. Our co-founding in 1980 of the Southwest Michigan Heath Users' Group now boasts over 50 members. It's from, and through, these fellow SMHUGgers that my interests and knowledge grew and ultimately led to my position here with HUG National. They're out there, go looking, you'll find them very eager to share their ideas, hopes and most willing to ask for your help also.

In August of 1981, the Heath Users' Group held what looks to become its 'first', of many National HUG Conferences in Chicago. This highly successful gathering of over 1000 HUGgies from mainly around this country, but some also from foreign lands, brought together many different special interests and helped put faces to well known names. As I write these words the ground work is being laid for yet another National HUG Conference which should prove to be both bigger and better, if that's possible. With the HUG membership family growing, the possibilities can stretch the imagination almost to its limit. The physical gathering of members from around the country can provide the opportunity for one-on-one meetings without the hindrance or limitations that the postal or phone systems might place on the exchange of imaginative ideas.

The HUG Bulletin Board on the MicroNet System is yet another service provided and maintained by the Heath Users' Group for the exchange of ideas and information between its members. As one of the largest, most used BB's, the Heath Users' Group Bulletin Board provides a low cost means for members to exchange messages, programs and even make direct contact (using the Communications Mode) with other HUG members.

All of these things are what makes up the Heath Users' Group. And, this is only the beginning. The fast growth over the past few years has shown that the owners of both Heath and Zenith computers are not only interested in gaining new knowledge on their systems but in sharing that knowledge with others.

There are many new areas to be explored, new challenges to meet, much, much more to be learned. That's what computers are all about. One important area of computers, at least as far as Heath/Zenith Users are concerned, that needs more indepth exploring is that of CAI (Computer Aided Instruction). We have the tools, which are our computers, the operating systems, the languages and our minds to do the job. Using our computers to teach others how to best use and program their computers can be a very rewarding experience.

We hope that in the months to follow we will be able to help you gain a better knowledge of your system. There are many new and exciting things that will be presented through both REMark and the HUG Library of Programs for your enjoyment and learning brought to you by your fellow HUG members and the HUG staff. This, then, is what the Heath Users' Group is all about!!!

Margaret Bacon
HUG Secretary

Heath Users' Group 1983

Welcome to the Heath Users' Group!

It is our pleasure to present the following information to fellow members and the new comers to the National Heath Users' Group. The January Issue of REMark from this date forward will provide you with compiled material especially designed to update your records with a cross-reference index to all previous articles found in REMark, the HUG Software Library abstracts as presented in the previous year, a listing of companies that provide Heath/Zenith related hardware and software products, a listing of Local Heath Users' Groups, related publications information and a variety of small but useful tips for contacting knowledgeable individuals who are familiar with Heath/Zenith computer equipment.

For the New Member:

This Issue of REMark will be your first contact with the Heath Users' Group. The material contained herein represents a good look at the number of people, clubs and organizations supporting the Heath/Zenith Computer Product Line. Further, HUG has selected that information which you may find most helpful to get you familiar with our organization. This Issue, along with the Software Catalog and following issues of REMark provided as a part of your membership, will help you explore the exciting and powerful world of micro-computing.

For the "oldtimer":

The material contained in this Issue of REMark will help previous members stay current with new HUG policies, available HUG software, additional Local HUG Clubs and the new support activities from companies that may be of particular interest. The HUG Software Catalog, as well as the January Issue of REMark will now become a permanent part of the HUG membership package provided to any user joining the HUG community.

General Heath Users' Group Information

Membership Eligibility

A bona fide interest in Heath/Zenith computer related products is all that is necessary for membership eligibility. You need not be an owner of a Heath/Zenith product to join. Membership is open to any individual or company representative.

As a member, you will receive:

- A subscription to REMark, the user magazine
- A HUG binder
- A personal identification card
- Software Catalog
- Access to the users' group program library
- Access to the HUG Bulletin Board via MicroNET

These benefits are described in the following paragraphs.

HUG Membership Rates

The following rate schedule applies as of January, 1983 for membership:

Type of Membership	U.S. Domestic	Canada and Mexico	International
Initial	\$18.00	\$20.00 *	\$28.00 *
Renewal	\$15.00	\$17.00 *	\$22.00 *

*Must be U.S. funds

The initial membership package includes the HUG binder, the HUG Software Catalog, a Heath Parts Order Form and a copy of the January, 1983 Issue of REMark.

Identification Card

When your membership is accepted, a computer generated ID card is issued. The ID card is sent to you separately via first class mail. This card identifies you as a member of the Heath Users' Group. It contains a unique number which can be verified for membership. It is **not** a credit card and can not be used for one in any way. **(Allow several weeks for the processing and delivery of your personal ID card.)**

If you lose your card, you may request a new one by writing directly to the HUG Secretary. Simply provide a statement saying that your card was lost or stolen, sign the statement, and a new card will be issued with a new number.

Publications

The official HUG magazine, called REMark, is sent to each member 12 times a year. The January Issue is designed as a cross-reference to the previous issues and contains valuable information that you may need. A subscription to REMark is included with membership. The magazine is sent via bulk mail, as are most other organization's publications. Bulk mailings means your REMark **will not be forwarded should you move**. Therefore, please notify the HUG Secretary of your address change and the date which you wish the change to take effect.

We encourage each member to use REMark to communicate with other users. You can do this by submitting articles for publication. We strongly encourage any comments which you feel would benefit other users. We welcome your letters, hardware descriptions, software enhancements, applications programs and other material you may wish to share.

How To Submit Articles

If you feel that you have a unique program or hardware application, sit down and write us about it. Did you write a program for the bowling team, or the softball team, maybe a special business or farm program. Possibly you have interfaced your computer to some special machine to gather data for

later evaluation. I'm sure that many of our members would like to hear about it, it might give them some new ideas of their own.

Six to ten pages of double spaced typewriter manuscript will suffice. Be kind to those who might not quite understand your application and explain your special programming tricks with a little extra detail. It's these "tricks" that help others to comprehend programming techniques and to be better programmers themselves.

Please submit all feature materials on disk, 5 1/4 or 8", as unformatted raw text files, (no printout codes, they have to be removed here). Also include a hard copy listing, which can be formatted if you wish. Also please include with your materials a small clear portrait photo of yourself suitable for printing and a single paragraph describing your interests, background, etc.

If you have a major article accepted and printed in REMark, you will receive a one year free membership in HUG and your choice of any single piece of software available through the Heathkit Catalog, FREE. As always, smaller articles, Bug-gin' HUG letters and Questions for the Q & A series are most welcome but do not qualify for the freebies.

What constitutes a major article? Well, your article should consist of no less than 2000 words and be written about software or hardware used with Heath/Zenith micro-computers. Submissions that are written with minimal editing needed and are of general interest to HUG members will be considered. Again, please submit these articles on disk as text files.

"Article of the Year" AWARD!

Starting in the December 1983 issue of REMark and each December after we will include a voting card on which members may indicate which article published during that calendar year they think was the best. On tabulating this vote the author of the article voted the best by the HUG membership will be awarded a Heathkit Weather Station (ID-4001) FREE.

Should you have questions about an article you would like to submit, please feel free to contact the REMark Editor for any comments or suggestions.

Once you have completed your article, send it directly to:

The Heath Users' Group
Attention: REMark Editor
Hilltop Road
St. Joseph, Michigan 49085

How to Submit Programs to the Heath Users' Group

After you have developed a program and before you submit it, test it thoroughly. Be reasonably sure that it is error free.

Three methods of submitting programs to the Heath Users' Group are available for your selection based on your judgement of the finished program and its value to other members. Your program may be contributed under the following categories:

- "Public Domain" — free distribution to the membership via bulletin boards or other means available to HUG with the possibility of inclusion into the HUG Software Library.
- HUG Software Library — for development by HUG as a finished software product to be offered for sale to other individuals as source for HUG income to further develop the users' group.
- Royalty Software — author supported, finished, reliable software with a signed contract paying the author for availability of the program to the users of Heath/Zenith computer products.

Submit your program by **completely** filling out the submittal form. Send your program on disk (printed for tape users). Include with your submittal a complete listing of the contents for our records. Submit a sample "run" of your program from a hard copy terminal when possible. If one is not available, hand copy as much as you feel necessary to give us an idea of how the program is supposed to perform. Be sure to sign and date the completed submittal form and check the category that you feel is appropriate for your program.

Once we receive your program, you will be notified that your program is now ready for review. On the completion of the review, we will contact you with the status of your program. Remember, the submitter is expected to handle any programming problems.

When your finished program is announced in REMark as an official product of the Heath Users' Group Software Library, you will receive:

- A one year extension of your membership
- A one year membership if you are not already a member
- A free copy of the next release of HUG Software
- Your choice of any single currently available Heath/Zenith software product

Package your program along with your disk or listing in a suitable container and send it to:

The Heath Users' Group
Attention: Software Coordinator
Hilltop Road
Saint Joseph, Michigan 49085

Ordering Information

HUG Software Products are ordered as a standard Heath Company Part. The order can be mailed on a Heath Company Order Form or on a separate sheet of paper. When ordering, along with your payment, include the following:

1. the part number (p/n), quantity, and description of the product to be ordered,
2. your name, address and HUG ID number, and
3. 10% handling charges, up to a maximum of \$3.50.

Send the order to:

Heath Company Parts Department
Hilltop Road
St. Joseph, MI 49085

For VISA and MasterCard orders; telephone Heath Company Parts Department at (616) 982-3571. Have the part number (p/n), description and quantity ready for quick processing.

NOTE: HUG currently offers two formats for CP/M 5 1/4 inch disks:

- Single sided, single density, hard-sectored
- Single sided, single density, soft-sectored

To order soft-sectored, add a "-37" to the part number (p/n) of the product; e.g. "885-1207-37". Your order is processed by part number (p/n) not by description, so please be sure to include the "-37" when ordering soft-sectored. This includes the new 885-3000 (Z-100 series) numbers; e.g. "885-3003-37".

The Heath Company Parts Department is NOT capable of answering questions regarding software. For additional information concerning any of the software products, contact the Heath Users' Group (616) 982-3463.

If you should have a problem with a HUG product, please call HUG to determine if you have a bad disk or another problem before you return the product for replacement. A call may save you a lot of time and money. If it is determined that your disk requires replacement, return the original disk along with the invoice directly to the Heath Users' Group.

Change of Address

If you change your address, be sure to let us know. REMark is sent via bulk mail and is not forwarded. It takes approximately six weeks for our system to cycle through. Therefore, take the delay into consideration along with mail delays when notifying us.

Use the form in the back of this issue or a suitable copy to change your address. Send it directly to:

The Heath Users' Group
Attention: HUG Secretary
Hilltop Road
Saint Joseph, Michigan 49085

HUG Bulletin Board via MicroNET

MicroNET is a time-share system of CompuServe Inc., which most anyone, located near a major city, can access through a telephone link. The National HUG Bulletin Board on MicroNET provides a way of sharing ideas, questions, and information with over a thousand other members, by simply dialing a number and leaving a message.

MicroNET membership applications are available through the HUG library or through any Heathkit store. This membership is separate from the HUG membership application. The package consists of a User ID, Password, and limited documentation. For further information contact your local Heathkit store, the Heath User' Group, or CompuServe, 5000 Arlington Centre Blvd., Columbus OH 43220 (614) 457-8600.

Special Interest and Local HUG Groups

One of the best sources for information and help is the Local Heath Users' Groups which are becoming a major voice for the Heath/Zenith user community. Many of the local groups can be contacted through your nearest Heathkit Electronics

Centers (HEC). These stores can usually provide you the necessary contact information. A listing of known Local HUGs is published twice a year with new additions appearing under the category of "Local HUG News" found in most issues of REMark.

Heath/Zenith Related Publications

Of major importance to the new user is the availability of additional information for the Heath/Zenith computer products. Many of the Local HUGs publish newsletters on a regular basis. Using the Local HUG Club listing appearing in this issue, the user can select those clubs that may produce additional documentation.

Three excellent independent publications are listed here:

- | | | |
|-----------------------|--------------------------------|--------------------|
| • BUSS Newsletter | Rates: 12 issues \$20.00 | (\$25.00 overseas) |
| Editor: Charles Floto | 18 issues \$26.00 | (\$35.00 overseas) |
| Phone: 202-544-0900 | 24 issues \$32.00 | (\$45.00 overseas) |
| | 30 issues \$38.00 | (\$55.00 overseas) |
| | Address: 716 E Street SE | |
| | Washington, DC 20003 | |
| • H-SCOOP | Rates: \$20.00 per year | (\$27.00 overseas) |
| Editor: Henry Fale | Address: 2918 South 7th Street | |
| Phone: 414-452-4172 | Sheboygan, WI 53081 | |
| • Sextant | Rates: 4 issues \$9.97 | (\$14.00 overseas) |
| Editor: Charles Floto | 8 issues \$19.94 | |
| Phone: 202-544-0900 | Address: 716 E Street SE | |
| | Washington, DC 20003 | |

CHARGE.....IT!

As many of you already are aware, Heath Company agreed long ago to handle the Heath Users' Group software products as we are simply too small to maintain the appropriate HUG inventory levels within our limited office space. Recently, Heath implemented a MasterCard program allowing customers to purchase Heath parts using Visa or their MasterCard. So, why not HUG?

You guessed it! Many of our users have requested the ability to order HUG products by phone using their Visa or MasterCard. With a few minor changes, HUG has now been included in the Heath program to add this increased convenience for our members. You may order any HUG product or products by phoning the Heath Company Parts Department at (616) 982-3571 (\$10.00 minimum order, please). Be sure to have the HUG part number (885-) and product description available along with your HUG ID to ensure prompt delivery of the product you desire.

We wish to thank the Heath Parts Department staff for including the Heath Users' Group in their improved program for parts order entry.

Heath Users' Group PROGRAM SUBMITTAL and AGREEMENT FORM

PROGRAMMER: _____

ADDRESS: _____

COMPANY (if any): _____

TELEPHONE: _____

PROGRAM NAME: _____

Please describe your program in sufficient detail so that other users may understand its intended purpose and use. The following outline is suggested as a guide to help you in preparing an abstract of your program(s), should your program(s) be selected as a future release of the HUG Software Library. Your outline of the abstract should be prepared and submitted on an attached sheet of paper with this Submittal Form. Be sure to fill out all information requested on this form.

Suggested OUTLINE:

- Introduction:**
- Requirements:**
 - Software
 - Hardware
- List of the Programs:**
- Program Content:**
 - Include **Special Notes**
- Comments:**

NOTE: Refer to the HUG Software Catalog for examples and details in using this outline.

Brief Information for the Software Evaluator of your program(s):

PREPARED ON/FOR COMPUTER MODEL: _____

SPECIAL HARDWARE/SOFTWARE CONFIGURATIONS, IF ANY: _____

PROGRAM REQUIRES _____ BYTES OF MEMORY

LANGUAGE _____ VERSION _____

I would like you to include the program(s) described on this agreement in the (check one)

- Public Domain HUG Programs
- HUG Library
- Royalty HUG Program

I understand and agree that HUG may distribute it at nominal cost to HUG members.

I assure you that the program is my own design, that I have run and de-bugged it, and that I will answer questions any library user has about it. You may modify and adapt the program at your option to make it more suitable for your use and the library.

I represent that the program is mine to submit and that any necessary permissions for its use and sale have been obtained.

Date _____ Signed: _____

SJULSTAD ENGINEERING

"Thanks For the Memories"

Attention Heath/Zenith 88, 89, and 90 Users!

We service and sell the following products especially engineered for your Heath/Zenith microcomputer:

16 K ADD-ON RAM - \$99.95

Increase your present 48 K system to 64 K. Our 16 K Add-On RAM board has become so popular, we've lowered the price. All boards are completely assembled and tested. They are easily installed.

REMOTE VIDEO OUTPUT - \$69.95

Provides NTSC Industry standard composite video to any monitor equipment including:

- * Color or Black/White Television Monitors
- * Large Screen Monitors
- * Beta/VHS Recording Equipment

Especially suited for Educational and Business Applications!!

Available Soon

64 K ADD-ON RAM - \$269.95

An additional 64 K RAM (200 nsec) brings your present 48 K on board system to 112 K. Versatile bank selection allows full compatibility with HDOS and CP/M operating systems. Completely Assembled and Tested.

SJULSTAD ENGINEERING

503 East Fremont
Northfield, MN 55057

Phones: (507) 334-2783 SALES
(507) 663-3422 TECHNICAL SUPPORT

*We support and service what we sell!!
Dealer Inquiries Are Welcome*

Quality software at a fair price is here!

FULL SCREEN EDITOR

for Z100 under ZDOS

NEW! Extended Screen Editor--ESE

- * Built-in help function. Undelete command.
- * Edit files larger than memory, and lines wider than the screen.
- * User-definable function keys, keypad, control characters.
- * Split the screen for multi-file edit, cut text from one file, paste into the other.
- * Global search and replace. Record and playback. Repeat command.
- * \$100⁰⁰ (Md. residents: 5% tax)

CHERRY ENGINEERING

ROBOT BATTLES \$19.95

The Cyborgs have stolen vital components of Earth's Interstellar Defense System, and it's up to you to get them back. Blast your way through roomfuls of drone robots to the power installations to replenish your weapons. Fight onward to the heart of the Cyborg control complex, and you've still got a problem - getting back out!

FROGGS \$14.95

Another arcade classic for your computer. Guide your frogs homeward to their havens. If it weren't for rush hour traffic, river currents, quicksand, diving turtles, snakes, and alligators, it would be easy!

MAZE RACE \$12.95

Reach all the goals in the maze while keeping the monsters from invading your home base. Three mazes, five levels of difficulty. Includes a screen input utility for making custom mazes.

UNDELETE/UNERASE \$16.95 ea.

Recover accidentally deleted files with UNDELETE (HDOS) or UNERASE (CP/M). Both utilities operate on all Heath/Zenith - supported 5 1/4" disk formats.

STAT PATCH (for CP/M only) \$12.95

Monitor the performance of your disk drives. STAT PATCH modifies the Heath/Zenith CP/M STAT command to display 5 1/4" disk error counts in addition to performing all its original functions.

Requirements: H/Z89, Z90, or equivalent H8, 32k, and HDOS or Heath/Zenith CP/M. Specify HDOS or CP/M and disk format (hard or soft sector 5 1/4"). Add \$1.50 shipping per order; Ga. residents add 4% sales tax. (CP/M l.m. Digital Research)

1 CONTROLLER

FOR 8"
& 5.25"
DRIVES

Now be able to run standard 8" Shugart compatible drives and 5.25" drives (including the H37 type) in double and single density, automatically with one controller.

Your hard sectored 5.25" disks can be reformatted and used as soft sectored double density disks. The FDC-880H operates with or without the Heath hard sectored controller.

NEW PRICE \$495

Includes controller board CP/M boot prom, I/O decoder prom, hardware/software manuals BIOS source listing. HSOD driver now available for \$40.00.

5-20 day delivery-pay by check, C.O.D., Visa, or M/C.

AT HEATH AND ZENITH DATA SYSTEMS WE'RE TAKING QUALITY TO NEW DIMENSIONS

Our Engineers, Committed To Excellence, Insist On It!

If you're looking for a sophisticated technical environment with high visibility and a tradition of engineering excellence, look to Heath and Zenith Data Systems.

Heath Company is a recognized leader in the design, production and sale of over 400 electronic kits and manufacturer of Zenith Data Systems' line of computer products. As a result of the recent introduction of our new ET-18 Robot Trainer and expansion of our instrumentation product line, we are preparing for growth in 1983 and beyond.

Innovative technological developments and a heritage of excellence in engineering have established Zenith Data Systems as a leader in the design of microcomputer hardware and software. It's these same qualities that led to the creation of our new Z-100 series of desktop computers and the ZT-1 Personal Terminal.

Discover Zenith's quality for yourself. Find out what a difference hands-on control, high visibility and excellence in engineering can mean to your career with these opportunities:

Computer Design

BS/MSEE and 3+ years design experience using 8-bit and 16-bit technology.

Software Design

BS/MSCS and experience enhancing operating systems for microcomputer products.

Diagnostics Software

BSME and one year experience developing diagnostics for digital electronics products.

Staff Engineering

BSEE and 5 to 8 years experience as technical specialist designing analog and digital products and interfaces.

Project Engineering

BSEE and 3 to 5 years experience in analog and digital circuitry design. Project management or test instrument design experience desirable.

While experiencing a satisfying professional career, you will also enjoy the affordable lifestyles of St. Joseph, Michigan. Only 90 minutes from Chicago, St. Joseph is a picturesque community on the shores of Lake Michigan. In addition we offer competitive salaries and excellent benefits including relocation assistance and the opportunity to work on your Master's Degree through an on-site University extension program.

For immediate consideration, call collect: Roger Fitzwater, 616/982-3504, or send your resume to Zenith Data Systems, Dept. REM, Hilltop Road, St. Joseph, Michigan 49085.

Equal Opportunity Employer M/F/H

NEW HUG PRODUCTS

885-1211

CP/M Sea Battle \$20.00

Introduction: This version of SEA BATTLE will execute on the H8, H89 (Z89), and the Z-100 computers.

SEA BATTLE is a video action game that uses the H19 graphic features. The role of the SEA BATTLE player is to command a destroyer force in opposition to an aircraft carrier and its escort. The escort includes fighters, bombers, and submarines, all of which attack the player ship.

Requirements: SEA BATTLE requires the CP/M operating system, version 2.2.02 or later, on an H19/H8/H17 or H89 with 32K of memory. Only one disk drive is required.

For the Z-100 computer, SEA BATTLE requires the CP/M-85 operating system. The Z-100 requires the soft-sectored disk format. (Order with a "-37" suffix.)

The program is written in assembly language and the source code is included.

NOTE: The H19 (H89) terminal is required for the graphics codes of the game.

The following files are included on the HUG P/N 885-1211 CP/M Sea Battle graphics game disk:

README	.DOC
SEABATTL	.DOC
SEABATTL	.ASM
SEABATTL	.COM

The SEABATTL.DOC file gives detailed instructions of the game. Most players will have fun learning by trial and error.

Author: Victor Abell

Program Content: SEA BATTLE is a very interactive game which requires the entire screen of the H19 terminal. The outline of the game structure is as follows:

A) The Aircraft Carrier and its Escort

The escort consists of an endless number of fighter planes, five heavy bombers, and a number of submarines. The fighter planes are replenished from the aircraft carrier as each is shot down. Each time the aircraft carrier is hit a submarine appears on the horizon.

B) The Player Ship

The player ship has two guns which may only be fired one at a time. The ship moves back and forth across the bottom of the screen dodging the shells and bombs from the air force. The player ship can take a few hits from the fighters, but is destroyed when hit by a bomb. The player ship must flee from the submarines.

C) Scoring

The score (and other data) is displayed on the 25th line throughout the game. The following is the scoring table:

Down a Fighter Plane	5 points
Down a Bomber	50 points
Hit the Carrier	50 points
Sink the Carrier	250 points plus Variable Bonus

The Variable Bonus is determined by the success of staying within the center of the screen, where the most action takes place. The program sets a timer and the player must stay within the marks or the countdown begins.

D) Sinking the Carrier

The aircraft carrier will sink when it has been hit by fifteen shots from the player ship guns. Once the carrier has been sunk, the player can watch it sink into the sea. Then another carrier is there to replace the previous carrier. The next carrier escort, more aggressive than the previous carrier's escort, appears on the screen.

E) Sinking the Player Ship

The player ship may be sunk by 12-15 hits from the shells of the fighters, by a single hit from a bomber, or by being caught by a submarine.

F) Summary

The player must find a battle strategy which will lift him in victory over as many aircraft carriers as possible. Each successive carrier is more dangerous than it's predecessor.

Comments: SEA BATTLE is one of the finest games which has been released from HUG.

885-1222

CP/M Adventure Disk \$10.00

Introduction: This version of ADVENTURE has been adapted for the H89 (Z89) CP/M and CP/M-85 for the Z-100.

ADVENTURE is one of the most well known and best liked computer games. It is an adventure through a giant cave to search out and find treasures. Many dangers are in store for the user who ventures into its midst.

Requirements: This game requires the CP/M operating system, version 2.2 or later, on H8/H17 or H-89 with a minimum of 24K of memory. Only one disk drive is required.

For the Z-100 computer, CP/M-85 is required. The soft-sectored disk format is required. (Order with a "-37" suffix.)

NOTE: The H19 terminal is not required to play this game.

The following is a list of the files on the HUG P/N 885-1222 CP/M Adventure Game disk:

README .DOC
ADVENT .COM
ADVENTUR .DTB
NEWGAME .CAV

Authors: This program was originally developed by Willie Crowther. Most of the features of the current program were added by Don Woods (Don @ SU-AI). This microprocessor version was done by G. Letwin of Heath Company.

Program Content: ADVENTURE

Somewhere nearby is a colossal cave, where others have found fortunes in treasure and gold, though it is rumored that some who enter are never seen again. Magic is said to work in the cave. I will be your eyes and hands. Direct me with commands of one or two words. I should warn you that I look at only the first four letters of each word, so you'll have to enter "northeast" as "NE" to distinguish it from "north", "dnstream" for "downstream", etc. Should you get stuck, type "help" and "info" for some general hints.

HELP

I know of places, actions, and things. Most of my vocabulary describes places and is used to move you there. To move, try words like forest, building, dnstream, enter, east, west, north, south, up, or down. I know about a few special objects, like a black rod hidden in the cave. These objects can be manipulated using some of the action words that I know. Usually you will need to give both the object and action words that I know. Usually you will need to give both the object and action words (in either order), but sometimes I can infer the object from the verb alone. Some objects also imply verbs; in particular, "inventory" implies "take inventory", which causes me to give you a list of what you're carrying. The objects have side effects; for instance, the rod scares the bird. Usually people trying unsuccessfully to manipulate an object are attempting something beyond their (or my!) capabilities and should try a completely different tack. To speed the game, you can sometimes move long distances with a single word. For example, "building" usually gets you to the building from anywhere above ground except when lost in the forest. Also, note that cave passages turn a lot, and that leaving a room to the north does not guarantee entering the next from the south.

SUGGESTIONS

Try "ENTER BUILDING".

When you see an object, pick it up.

Go "DNST" (downstream) if you want to find the cave.

HELPFUL WORDS

INVEntory	List items you are carrying
SCORE	Show your current score
LOOK	Type a long description of your current loaction
BACK	Go back the way you came
QUIT	Stop the game and give final score

COMMAND STYLE

Remember, ADVENTURE takes one or two word commands, only. Make them straight-forward, like:

ATTACK DRAGON
EAT BIRD
THROW AXE
GET GOLD
WEST
UNLOCK GRATE
DOWN

INFO

If you want to end your adventure early, say "QUIT". To see how well you're doing, say "SCORE". To get full credit for treasure, you must have left it safely in the building, though you get partial credit just for locating it. You lose points for getting killed, or for quitting, though the former costs you more. There are also points based on how much (if any) of the cave you've managed to explore; in particular, there is a large bonus just for getting in (to distinguish the beginners from the rest of the pack). I may occasionally offer hints if you seem to be having trouble.

***** GOOD LUCK *****

Comments: ADVENTURE will provide many months and even years of fun trying to reach the 350 points.

P/N 885-3003

CP/M-85 ZTERM \$20.00

Introduction: This disk contains a modem package for the Z-100 series computers, which enables a user's computer to communicate with another computer. Versions for the H/Z89, Z90, and H8 computers are also included. ZTERM is a modification of the popular CP/M TERM package for the H89/H8 computers.

Requirements: This disk requires the CP/M-85 operating system for use with the Z-100 series. CP/M version 2.2.03 is required for the H8/H19, H89, or Z90 with 32K of memory. The H8 computer must be equipped with either the H8-4 serial interface board or the WH8-47 board. Only one disk drive is required for ZTERM.

The disk contains assembled, ready to use, versions for the Z-100 and H89/H8 computers. The programs are written in assembly language and the source codes are included. The user may modify ZTERM to execute on most any terminal.

ZTERM100.COM — for use on the Z100 version.

ZTERM89.COM — for use on an H89, Z89, or Z90 or H8 using port 340Q.

ZTERM340.COM — for use on the H8 using port 340Q.

NOTE: The H19 terminal is **NOT** required for ZTERM with the H8 computer, but is highly recommended.

Author: Jim Buszkiewicz

Program Content: This modem communication package allows the user to "talk" or *communicate* to another Heath/Zenith computer or to some other host computer system, e.g. CompuServe and the SOURCE. The package allows the user to change the port used, the baud rate, plus other parameters.

Editor's Note: CompuServe and the SOURCE are two timeshare systems (mainframes) that allow hundreds of individuals to access the HOST at a single time. They provide services for these members, e.g. the HUG Bulletin Board.

ZTERM allows the user to download a file from the host and it will let the user transmit a disk file to the host. The modem package will enable the user to communicate, in the normal fashion with a host, from the main console keyboard. The direct type communication can be either *half* or *full duplex*.

For anyone who uses TYMNET and/or MicroNET, ZTERM will automatically sign on to both systems by entering one simple escape character sequence. The same is true for those using TYMNET and the SOURCE.

General System Requirements: In order to use ZTERM, the computer must have a standard serial RS-232 I/O port. Either an unused or line printer port will suffice. Normally on a Heath/Zenith computer, the user would use the DTE port on the back of the computer.

For systems other than the Z-100 series, an H19 terminal is advantageous but not necessary. The main console must be capable of accepting lower case characters correctly, even though it may convert them to upper case.

Aside from the standard computer system, the only other hardware that is needed is an interconnecting cable, a host computer, and modem.

Configuring ZTERM: ZTERM includes an auto log-on feature, which configures ZTERM to send the User ID number and password. This may be done for MicroNET and/or the SOURCE. Selecting the baud rate is also software selectable. A menu will display the possible baud rates.

If there are other hardware or use requirements that are not met by the pre-assembled versions of ZTERM, the user can alter the assembly source code to meet the requirements. ZTERM was designed to run on just about any computer that can run CP/M, and there are several assembly options that make it easy to configure it to a particular system. The following are some of the possible source code changes:

- 1) Set for non-Heath system,
- 2) Set *pause* character,
- 3) Set *abort* character,
- 4) Set for a control-H (010Q) in place of delete (07fh), 5) Set for ZTERM to strip the high order parity bit,
- 6) Set for type and length of data word,
- 7) Set *port* value, and
- 8) Set *baud* rate.

Using TERM: ZTERM is not a fancy program that uses graphics or the computer horn, but it does get the necessities done in the most efficient manner. When ZTERM signs on, it displays the size of the storage buffer in decimal bytes. This buffer is used to store characters when down-loading data from the host computer.

While in direct communications mode, ZTERM has nine basic commands available. These commands are executed by entering the appropriate function key across the top row of the Z-100 or H19 keyboard. The command summary is as follows:

Note: The function key columns refer to the H19 and Z-100 terminals respectively.

H19 Z100

<i>f1</i>	<i>f1</i> — auto-log-on to MicroNET
<i>f2</i>	<i>f2</i> — auto-log-on to the SOURCE
<i>f3</i>	<i>f3</i> — Duplex toggle - half or full
<i>f4</i>	<i>f4</i> — Store all terminal display in buffer
<i>f5</i>	<i>f5</i> — Transmit disk file to host
ERASE	<i>f0</i> — Display Command Summary
BLUE	<i>f6</i> — Save the buffer to a disk file
RED	<i>f7</i> — Clear the buffer
WHITE	<i>f8</i> — Warm boot CP/M

When downloading files, no type of handshaking is needed. Characters are immediately stuffed into memory eliminating this need. When uploading files to a host, ZTERM will pause when it encounters a pause character.

Comments: ZTERM provides the Z-100 user (or anyone else) with a useful modem communication package.

885-8012 CP/M

Modem Applications Effector (MAPLE) . \$35.00

Introduction: MAPLE is a modem program designed to allow the H8/H19 or H89 computer to communicate effectively with another computer, over the telephone or by direct connection.

Requirements: MAPLE requires the CP/M operating system, version 2.0 or later, on the H19/H8/H17 or H89 with 32K of memory. When transferring files, 48K or more memory is recommended. Only one disk drive is required. A line printer device is not required but is recommended for downloading files from the host computer.

To use MAPLE, a modem and appropriate connector will be required to communicate to another system. MAPLE can be set to run on interrupt 3, 4, or 5 of the DTE connector, port 330Q.

The program is written in assembly language and the source code is not included.

NOTE: The H19 terminal is required due to the use of the function keys and other escape codes.

The instructions are contained in a 22 page manual.

Author: Dr. William C. Parke

Program Content: MAPLE is a modem communications package, which can be used to connect the users Heath computer system to another Heath system or to a *time-share host system*, e.g. CompuServe or the SOURCE, via the telephone lines. (Time-share host systems can have several hundred users *on-line* at a single time.)

MAPLE, when executed, enters the *communications* mode, with full file send and receive control. The mode and options are displayed on the 25th line of the terminal and are invoked by depressing the appropriate function key. The main communication "menu" function keys displayed on the 25th line are as follows:

f1 - p.page — Send to the printer any text displayed on the screen. The user may edit the screen display before sending to the printer.

f2 - COPY — Store all screen activity in memory.

f3 - SHOW — Display on the screen the text which has been stored in memory with the *COPY* function.

f4 - P.PAD — Send the text saved in memory to a line printer device.

f5 - STORE — Save the text in memory to a disk file.

ERASE - CLEAR — Clear the text stored in memory.

BLUE - SEND — Send a disk file to the host computer. The file may be sent in *block*, *line*, or *segment* mode.

RED - Exit — Exit to HDOS.

WHITE - Set — Set or change communication options. These options include this *second level* menu:

f1 — convert between ASCII and APL character sets,

f2 — set mode for sending a disk file,

f3 — set the prompt character in sending a file,

f4 — select line printer device,

f5 — select disk drive,

ERASE — set options selected, and return to conversation,

BLUE — select parity check bit,

RED — select baud rate,

WHITE — set the number of bits per byte, and

BREAK — echo all terminal input.

BREAK - break — Send a *hard break* to the host system. This will stop any transmission by the host and return the user to the host's command prompt. (This feature may not work for all host systems.)

MAPLE uses a number of control characters and escape sequences to do a number of functions. The user can refer to the written

documentation for details. *Patch Instructions* are included with the manual to aid the user in customizing MAPLE to his requirements.

Comments: MAPLE, one of the most complete modem packages, includes most any feature required for computer communications. The 25th line display "menu" and documentation make it a very user friendly package.

Software Products List

Part Number	Description of Product	Selling Price	Soft Sector	Part Number	Description of Product	Selling Price	Soft Sector

IF: Z100

Zenith has created a new generation of desk-top computers and we can offer them to you at a great price. Both 16 and 8 bit microprocessors running at 5MHz provide high resolution color graphic capability with up to 768K of expandable memory! Send for our free catalog describing these units in greater detail and request a color brochure. Or call us for prices and information on the Z100 series.

IF: Z100... THEN: 

MPI

This high quality American made dot-matrix printer features serial and parallel interfaces, 9-wire print-head for true descenders, dot-addressable

graphics for plotting and custom character sets. 80, 96 and 132 column printing and expanded print modes. High quality correspondence printouts using an 11 x 9 matrix is software selectable. Bi-directional and 100 cps printing with tractor and friction feed standard! User defineable type fonts and Z89 graphics in positive and reverse form using the Style Writer CP/M software. (Shown with optional QT sound cover and single sheet feeder.) ONLY \$585

ADVENTURE MAKER

Create your own Adventure type games! It even has provisions for voice output when used with text-to-speech synthesizers! THE ADVENTURE MAKER allows you to design short or long games, with varying levels of difficulty and almost unlimited possibilities. Several pre-made Adventure games are included. Typical Adventure type commands are recognized such as 'pick up bottle', 'use gun', 'drop torch' as well as direction commands. Comes with adventure maps and complete documentation. Specify HDOS or CP/M. Requires Mbasic and 64K. \$21

TERMINAL

A menu-driven, screen-oriented modem package for HDOS. A 2K buffer supports CTRL-S/CTRL-Q protocol. Performs large file transfers with only one drive. Has special Smartmodem features and printer output. Programmable AUTOLOG function allows 16 log-on sequences for remote systems. HDOS commands can be executed from TERMINAL. CP/M version coming soon. Comes with a 50 page manual. \$25

TANDON

The finest in disk drives, TM-100-4 units are 96 tpi and double-sided. Each drive yields a total capacity of 400K bytes with the standard hard-sector controller and 640K bytes using the Zenith Z89-37 double-density controller.

We also stock the TM-100-1 (48 tpi) and TM-100-2 (48 tpi double-sided) disk drives. The Tandons are directly interchangeable with the Heath supplied drives currently in use. Interfacing documentation and manual are included. THINLINE 8" drives (TM-848-2) are also stocked and make an excellent addition to the Z100 computers.

TM-100-4 \$359
TM-100-2 \$275
TM-100-1 \$215

ETC...

As Zenith dealers, we stock many of the original hardware and software products offered by Heath & Zenith, all at great prices. Other products that we carry include:

Z89 & Z90 Computers	\$CALL
NEC RGB monitors	\$725
Spellbinder	\$289
The Word	\$69
Smartmodem 300	\$219
Smartmodem 1200/300	\$CALL
The Word Plus	\$125
Verbatim/Memorex Disks	\$Call
Dual 5" Enc./Supply	\$110
Hayes Chronograph	\$199
Intex Talker w/music	\$275
Votrax synthesizer	\$249

WE'VE MOVED

In order to serve you better, we've moved to a new larger location. We now have a showroom to demo equipment and software for our local customers. Also, another phone line has been added for inquiries and orders. We're known for fast service and great products at super prices. Give us a call or use the reader service card to get our new winter catalog.

THEN:

TERMS: Add \$2 shipping on orders up to \$100, and \$5 for orders over \$100 in the continental U.S. APO, FPO, Alaska & Hawaii add 5%. Foreign orders add 15%. COD orders are accepted for an additional \$2 charge. Call for shipping charges on computer systems. In order to keep prices as low as possible, we do not accept credit cards. Approved purchase orders are welcome.

We will match or beat any other advertised price whenever possible!

Studio Computers inc.

INTRODUCING the world's first, affordable teaching robot...

HERO 1 the most sophisticated microprocessor-controlled device since the microcomputer.

HERO 1 is a completely self-contained, electro-mechanical robot capable of interacting with its environment. Controlled by an on-board, programmable computer, it has electronic sensors to detect light, sound, motion and obstruction in its path.

Capable of seven axes of mo-

tion, the robot can be programmed to pick up small objects with its arm. It will also speak in complete sentences, using its voice synthesizer.

Remarkable though the robot is, its companion **Robotics Education Course** is an even more significant "first." It provides

a thorough understanding of robot technologies, including robotics programming. Course features self-test unit reviews, experiments and final exam.

Designed to be used with HERO 1, this 1200 page course is the most complete introduction to robotics available today.

HERO 1 is a computer on wheels.

HERO 1 uses a 6808 microprocessor that controls 13 functions and sense boards. Its on-board processor can take it through complex maneuvers. The programming process is straightforward with provision for step-by-step debugging, enhancement and other corrections.

HERO 1 senses include: sound detection (frequency range 200-5000 Hz); light detection; ultrasonic ranging; ultrasonic motion detection; speech synthesis; and real time, four year calendar clock.

A completely mobile platform robot, HERO 1's motion abilities permit head rotation and arm rotation of 350°, shoulder rotation of 150°, arm extension of 5 inches, wrist pivot of 180° and wrist rotation of 350°. Gripper will open to a maximum of 3½ inches and rotate 90° at extreme extension. Payload capacity of arm is 8 oz. at maximum extension and 16 oz. at normal.

The remarkable HERO 1 robot is in production now, ready for you. Buy assembled or build it from a kit. Kit price is \$1500 and the assembled robot is \$2500, FOB Benton Harbor, or through your nearest Heathkit Electronic Center.

For full information on HERO 1 call 800-253-0570 toll-free. (In Alaska, Hawaii and Michigan, call 616-982-3411.) We'll give you the address of the nearest Heathkit Electronic Center and send you a booklet that gives details about the robot, the content of this course, and other information.

COLORWORKS

**Affordable
Softwear
for Heathkit
and other
Computer
Systems**

SKETCH A full screen color graphics editor for the H8/H89 systems with color graphics. (CPM or HDOS) (Entertainer, HA8-3, or HA89-3 color board required) **\$35.**

CTYPE A full screen color text editor that allows you to define your own character fonts. (CPM or HDOS) (color board required) **\$35.**

THREED A three dimensional graphics program using the 256 X 192 resolution of the color graphics board. Slides 2.0 is also included so that pictures may be displayed in rapid sequence (56KHDOOS) (color board required) **\$50.**

SLIDES 2.0 A slide show program for displaying picture files created with the products listed above. Note that Slides is included with the THREED package (HDOS) (color board required) **\$30.**

FORCLR.LIB

A Fortran linkable library that allows the user to control all of the functions of the color graphic boards. Library and documentation **\$45**

LUCIDATA PASCAL
A Pascal compiler that supports the color graphics boards. Compiler **\$145**

Source code, (HDOS or CPM) (color board required) **\$45**

Graphics/sound package (HDOS or CPM) (color board required for the graphics/sound package) **\$15**

ZI93D.ABS An H19 version of the color THREED program. This program uses the limited resolution of the H19 terminal (89 x 48 pixels), or if you have the Super 19 ROM with the pixel character ROM the resolution is (169 x 96). (HDOS) (specify version) **\$25**

We also carry the Entertainer, the HA89-3 color boards and a full screen editor for the Z100 (ZDOS) (Call for details and prices).

W.I.S.E. SERIAL, PARALLEL & REAL TIME CLOCK FOR H89

The 2S+2P+RTC is a board that replaces the serial board in the Heath/Zenith H88/H89 and provides the following:

2-serial input/output ports that are software and cable equivalent to the H88-2 and one port less than the H88-3. Both serial ports can be configured as a DCE or DTE port.

2-parallel input/output ports: 16 bits output and 16 bits input plus handshaking lines. Four of the input bits may be used as status signals. An optional cable is available for Centronics parallel I/O.

RTC-real time clock with 1/100th sec, 1/10th sec, seconds, minutes, hours, day of week, day of month, and month counters. May be programmed to interrupt an alarm, or every 1/100th of sec, sec, minute, hour, day, month or never. Optional on board battery and charger will keep the clock running for months.

The 2S+2P+RTC board comes with instructions and program listings in assembly and BASIC source to use the parallel and real time clock.

Available Stock to 90 Days After Receipt of Order. Prices and specifications may change without notice. Foreign orders payable in U. S. Funds on a U. S. bank. Foreign orders please allow \$15.00 extra for air shipping and handling. Allow extra time also.

Shipping by UPS paid by W.I.S.E. If prepaid check or money order. Shipping by other (UPS blue, Parcel Post, etc.) include enough to cover, we will refund excess.

REAL TIME CLOCK (2S+2P+RTC)

2 SERIAL PORTS
2 PARALLEL PORTS

PRICE LIST

List Price

2S+2P+RTC without UART's and RS232 ic's for those customers that have existing serial boards **\$110.00**

2S+2P+RTC with UART's and RS232 ic's **\$155.00**

2S with UART's and cables **\$120.00**

2S upgrade kit to 2S+2P+RTC **\$ 75.00**

OPTIONS for 2S+2P+RTC

Optional on board rechargeable battery **\$ 10.00**

RS-232 cables internal board to backpanel (DTE or DCE) **\$ 15.00**

Parallel I/O Cables (18 inches long) Connector on one end **\$ 6.00**
Connector on both ends **\$ 15.00**

Centronics parallel cable to Printer (six feet long-2S+2P+RTC connector and Centronics connector on other) **\$ 50.00**

Demonstration programs-as in manual and others when available.

All diskettes are 5 1/4" 10 sector (CP/M or HDOS) **\$ 10.00**

OTHER Products for the H88/H89 and EPSON Printers

Extender board for H88/89 **\$ 30.00**

EPSON Serial Interface Board-RS232 serial board fits in the Epson Printers to allow them to use serial input. No buffers or current loop. **\$ 37.50**

Interested in Starting a Local Heath Users' Group?

Read on for some helpful hints....

Many HUG members have been writing requesting that we give some kind of help or ideas when they start to organize a local HUG. With the helpful ideas of Bill Johnson, former President of the Capitol Users' Group as presented at the National Heath Users' Group Conference, and questions we have received; the National HUG has the following suggestions.

What you are about to do is form a local independent group for the purpose of sharing your Heath/Zenith computer experiences. Your group will have no formal ties with the National Heath Users' Group. The National Heath Users' Group exists to provide the Heath/Zenith computer user with a point of help, information, and access to other users' experiences and programs through the REMark magazine.

We can only offer suggestions and tell you what you can or can not do with programs from our library. If you have questions regarding policy that effects the Heath/Zenith company, we are here to help you find the answer.

Local groups around the country function differently depending on what their membership wants - and that is what you have to determine; what will your group want from their local club? What do they want enough to do it? If your goals are for more than the individual members of the group are willing to work for, it won't succeed. So, please be realistic.

Suggestions for NEW local Heath Users' Groups

1. Don't get too formal too soon. Give yourselves a chance to get to know each other before you start electing officers other than temporary ones. Make your temporary officers in charge for 3-4 months. By then you will have a better idea of who will make good officers and your temporary officers will know if they can handle the load.
2. Your purpose is to provide each other with support, but that is limited to reasonable services. If you try to do too much for each other the group will exhaust itself. Exchange information, have educational programs, workshops and classes.
3. Reasonable services include a library, group purchases, some service to machines, and some consultation.
4. Library - it is possible to contact other HUG groups (groups listed in this issue of REMark) to help you start your library. However, try to get your members to build most of it. Beware of copyrighted materials and problems in distributing it. Contact a local lawyer to help you.
5. Group purchases - if you are small, go together with other groups to make group purchases advantageous to your group.
6. Service and consultation - don't encourage your members to 'hog' your experts time and talents - it's a sure way to lose that talent.
7. Distribute the work load as much as possible. There are lots of things (non-technical) people can do - all the little things that make a group work well, that don't take an expert to accomplish. And maybe, they can help the technical people and develop their skills.
8. Newsletter - don't feel bashful about 'borrowing' from other newsletters, but do give them the credit. It probably wouldn't hurt to get their permission first. Get on their mailing lists, it won't cost much. Your newsletter can be monthly, bi-monthly, or quarterly.
9. You do need a person to act as a sounding board. Someone to be contacted about problems, who has knowledge of where to send the problem for help.
10. Check with a local attorney for help with all the legalities - tax status, insurance to protect yourselves against copyright problems, etc.
11. Programs - what do the members want to learn about? Local suppliers are very often happy to come discuss their products and how they work. Local companies and universities often have someone who can help your group learn something the group is interested in. Also, many vendors travel around the country - contact them, they may be willing to talk to your group when they are in the area.
12. Try to meet at the same time and place each month - it is easier to remember. Also consider name tags, it is easier for new people to get to know you that way.
13. Have a central Post Office Box or address for club mail.
14. Keep business matters to a minimum at club meetings. Save these things for board or committee meetings. Nothing kills a group more than all business, and learning nothing during or after the meeting.

INTRODUCING -- MAGNOLIA'S MOST POWERFUL BOARD YET!

The Z89/90 is a good solid computer. But it does have certain limits.

We've had many requests to increase its CPU speed to 4MHz, but nothing met our standards for both field installation and reliability. And who needs anything less.

We increased its RAM to 176K with our 128K board, allowing use of MP/M™. However, without DMA, multi-user operations under MP/M are slow.

Networking '89s together has been a long-term goal of ours. Through the Corvus Constellation multiplexer we provided the first stage -- allowing computers to share Winchester disk storage. But that technique leaves much to be desired -- since each computer independently manages its disk allocation there are significant operational limitations on sharing disk files.

We first announced our impending 'RS422 Network Interface' at the 1982 West Coast Computer Faire. Our design goals included:

- RS422 Network Communication at 800K baud
- On-board Network Control and Data Buffering

As it progressed, we realized that we had designed an 'I/O Board' which was FAR MORE POWERFUL THAN THE '89 ITSELF!

After agonizing delays, the board is now in production as the '77422 Network Controller'. Compare these specifications with the Z89 itself (or the new 'upgrade' CPU boards):

- 4MHz Z80™ CPU
- 64K RAM, 256K [bank selectable] optional
- 8 K EPROM
- 4 CHANNEL DMA controller
- 2 Serial Ports: RS422 at 500KBaud
RS232 at up to 19.2 KBaud

We also changed its name from '77321 Network Interface' to '77422 Network Controller'. Our 773xx products must be used in a Z89/90 computer. Although this product CAN be an I/O card in an '89 or 90, it can also be used independently as a stand-alone station on the network:

- permitting a terminal [Z19 or other] as a network station [with local disk storage], or
- permitting a printer to spool data directly from the network.

Network applications software is currently being developed and tested.

Software for an exciting non-network application is included. The workload is split between the Z89/90 CPU and the CPU on the '422 board:

- The Z89's 2MHz CPU continues to run Magnolia CP/M™, handling all physical I/O [console, printer, floppy and Winchester disks]
- The '422 board's 4MHz CPU runs an interface program which 'looks like' CP/M to an application program -- but passes CP/M system calls to the Z89's CPU for execution, allowing a 63K TPA on the '422 board!

With this division, the following Z89 limitations are overcome:

- The application runs on a 4MHz CPU
- The application has 63K of RAM available, independent of BIOS size
- The DMA controller [making a slave I/O processor of the '89 board] frees the application CPU from detailed I/O functions.

This last advantage is especially significant when executing MP/M on the '422 board, using the optional bank-selectable memory.

Hardware-dependent programs [including utilities like 'format'] which perform actual physical I/O, must run on the 'slow' Z89 CPU. A special utility is provided to 'mark' those application programs which can execute more efficiently on the '422 board CPU.

The board is presently available in 64K and 256K versions which mount in an I/O slot [P504/P510] on the '89 CPU board. To limit power dissipation within the '89, no disk drive may be used internally.

BASIC CROSS REFERENCERS

DO YOU HAVE ONE OF THOSE BASIC CROSS REFERENCERS THAT SEEM TO TAKE DAYS TO CROSS REFERENCE A PROGRAM? XREFBAS is what you need. Now you can have a BASIC CROSS REFERENCE program that will process a 32k ASCII source in 3 to 5 minutes. XREFBAS for HDOS contains versions for MBASIC 4.xx, MBASIC 5.xx and Benton Harbor Basic. XREFBAS for CP/M contains both Microsoft versions. XREFBAS programs generate a variable name and line number cross reference list which can be output to the screen, disk or printer. XREFBAS programs read from an ASCII file and display the line number being analyzed and all variable names or line numbers discovered on that line. The variable name and line number cross references may be generated together or the variable name cross reference may be generated separately. And best of all, they are FAST!

XREFBAS-a Basic cross referencer.....	\$30.00
CSAT-a Circular Satellite Orbit Calculator.....	\$25.00
VISED-a Visual Editor.....	\$35.00
VIPROC-VISED & TPROC a Text Processor.....	\$50.00
FTCOM-Remote Computer Communications.....	\$30.00
RATFORX-Extended RATFOR (*).....	\$40.00
GAMES#1-"21", Hangman, Slots (*).....	\$25.00

HDOS or CP/M (* = HDOS only) 5" hard or soft sector

Disk Utilities for CP/M

These general disk utilities work on ANY single user CP/M 2.x system, with ANY diskette size and format, and many hard disks. All are menu driven, and easy to use.

DDUMP makes it possible to examine and patch any byte on any sector, addressed by track and logical sector number — or addressed by allocation block number, both in HEX and ASCII format. May be used to study how CP/M allocates disk storage, to examine or repair a damaged disk and to recover lost data.

DTEST tests a disk for bad spots. Bad sectors are locked out from later use by CP/M by automatically collecting them in a "garbage" file. All errors are reported to printer and/or console. Reduces probability of later disk crashes. Indispensable for hard disks, as media cannot be replaced. Use DTEST before disk errors ruin your work!

DUSER enables you to have access from one user area (user number) to programs and/or files stored on other user areas, without having to keep duplicate copies of files on the disk. DUSER makes this possible by copying file entries from one user area to another, thus saving considerable disk storage space.

DDUP duplicates disks. It is independent of disk controller, drive, disk size and format. It only requires that source and destination disks are of the same format and density. It will also replace bad sectors on the source disk with blank sectors on the destination, thus enabling you to automatically recover (what can be recovered from) damaged files.

UNERA recovers accidentally ERASEd files.

Price: Only \$ 29.95 each. All 5 together: \$ 125.

Complete set of 5 manuals: \$ 20.

Specify format: 8" SS/SD or 5" HS/Heath/Zenith disk. Include \$ 8 per order for handling & shipping. VISA accepted.

Dealers/distributors inquiries invited.

Order from:

COLOR GRAPHICS SOUND EFFECTS

VOICE SYNTHESIS

ALL ON ONE BOARD

FOR THE HEATH-ZENITH 89 COMPUTER

COLOR GRAPHICS

- USES TMS 9918A
- 256 x 192 DOTS
- 16 COLORS
- 16 K ON-BOARD VIDEO RAM

A/D CONVERTER

- 8 CHANNELS
- 8 BIT RESOLUTION

PARALLEL I/O

- 2, 8 BIT PORTS
- EACH PORT EITHER INPUT OR OUTPUT

COUNTER-TIMERS

- USES 8253
- 3, 16 BIT COUNTERS
- PROGRAMMABLE

SOUND EFFECTS

- USES AY-3-8910
- 3 TONE AND 1 NOISE CHANNEL
- PROGRAMMABLE
- ENVELOPE CONTROL

PRIORITY INTERRUPTS

- USES 8259
- 8 MASKABLE INTERRUPTS

VOICE SYNTHESIS (OPT 1)

- USES VOTRAX SC-01A
- PHONEME ORIENTED SYNTHESIS

ARITHMETIC PROCESSOR (OPT 2)

- USES 9511A/9512/8231A/8232
- INTEGER AND FLOATING POINT
- TRANSCENDENTAL FUNCTIONS

D/A CONVERTERS (OPT 4)

- 2 CHANNELS
- 12 BIT RESOLUTION
- PRECISION REFERENCE

SOFTWARE SUPPORT

- ROUTINES FOR ALL FEATURES
- COMPATIBLE WITH HA-B-3 SUPPORT ROUTINES

PASCAL/MT+™

- ALSO AVAILABLE FROM NOGDS
- PROGRAM DEVICES WITH PASCAL

OPTION NO. 1 \$130*
 OPTION NO. 2 \$210*
 OPTION NO. 4 \$110*

*PRICES SHOWN FOR OPTIONS PURCHASED WITH BASIC BOARD. ADD \$15 IF PURCHASED AT A LATER DATE

BASIC BOARD **\$399** PIN HA-89-3

PRIMERS FOR THE BEGINNER

GETTING STARTED WITH CP/M AND MBASIC

WITH PARTICULAR REFERENCE TO RANDOM FILES

Featuring a complete "menu driven" ready-to-run disk mail list program, program explanations, and complete tutorials, this package forms the perfect introduction to MBASIC programming under CP/M, and includes useful information for those new to the CP/M operating system (ZBASIC also supported). Included is a 56 page manual and a disk containing sample programs. Specify Heath/Zenith Computer model number, disk size and format—hard- or soft-sectored, single- or double-density, 5 1/4" or 8", and CP/M or ZDOS. \$25.00

GETTING STARTED WITH HDOS & ASSEMBLY LANGUAGE PROGRAMMING

A 36 page tutorial covering aspects of Assembly Language programming under HDOS. Provides significant information for HDOS which other manuals lack. \$15.00
