

88 CHARACTER TYPE STYLES

"Selectric", "Selectric" II, Correcting "Selectric" II*, Mag Card II, Mag Card/A, Mag Card "Selectric" Typewriters, Memory Typewriters, Audio Typing Unit and MT/ST. (*To be discontinued April 6, 1981.)*

Correspondence and General Typing Applications, Photographic and Offset Masters

Only the type codes compatible with the 101, 002, 016, and 022 Keyboards can be specified with "Selectric" Typewriter, Model 721 orders. A complete list of these type codes is shown with those keyboard layouts in Chapter 4.

Adjutant

12 Pitch, 9 Point

Type Codes: 129, 030, 031

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements are also compatible with

ABCDEFGHIJKLMNOPQRSTUVWXYZ [@ # \$ % & * () _ + ° : " , . ?
abcdefghijklmnopqrstuvwxyz] 2 3 4 5 6 7 8 9 0 - = ! ; ' , . /

Advocate

10 Pitch, 12 Point

Type Codes: 130, 003, 036, 050

27 tooth ratchet

6 lines per inch

Recommended for typing stencils

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements

ABCDEFGHIJKLMNOPQRSTUVWXYZ ± @ # \$ % & * () _ + ¼ : " , . ?
abcdefghijklmnopqrstuvwxyz 1 2 3 4 5 6 7 8 9 0 - = ½ ; ' , . /

AN3/360 Bold

10 Pitch, 8 & 6 Point

Type Code: 084

27 tooth ratchet

6 lines per inch

Cannot be specified on "Selectric" Typewriter Model 721 orders.

IBM SELECTRIC TYPEWRITERS PROVIDE A WIDE VARIETY OF TYPING APPLICATIONS, USING INTERCHANGEABLE TYPING ELEMENTS. THESE

ABCDEFGHIJKLMNOPQRSTUVWXYZ ± @ # \$ % & * () _ + > : ° , . ?
ABCDEFGHIJKLMNOPQRSTUVWXYZ 1 2 3 4 5 6 7 8 9 0 - = < ; ' , . /

AN3/360

10 Pitch, 8 & 6 Point

Type Code: 105

27 tooth ratchet

6 lines per inch

Cannot be specified on "Selectric" Typewriter Model 721 orders.

IBM SELECTRIC TYPEWRITERS PROVIDE A WIDE VARIETY OF TYPING APPLICATIONS, USING INTERCHANGEABLE TYPING ELEMENTS. THESE

ABCDEFGHIJKLMNOPQRSTUVWXYZ ± @ # \$ % & * () _ + > : ° , . ?
ABCDEFGHIJKLMNOPQRSTUVWXYZ 1 2 3 4 5 6 7 8 9 0 - = < ; ' , . /

Artisan 12-72*

12 Pitch, 10 Point

Type Codes: 131, 053, 055, 062

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements are also compatible with

ABCDEFGHIJKLMNOPQRSTUVWXYZ ± @ # \$ % & * () _ + ¼ : " , . ?
abcdefghijklmnopqrstuvwxyz 1 2 3 4 5 6 7 8 9 0 - = ½ ; ' , . /

Auto Elite

12 Pitch, 12 Point

Type Code: 208

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements are also compatible with

ABCDEFGHIJKLMNOPQRSTUVWXYZ ! @ # \$ % & * () _ + ¼ : " , . ?
abcdefghijklmnopqrstuvwxyz 1 2 3 4 5 6 7 8 9 0 - = ½ ; ' , . /

Because of inherent differences between printed and typewritten impressions, these type styles are not representative of typewritten material and should be used as a guide to type design only.

*Primary Type Style — should be recommended to customers who wish to standardize on one type style, due to high probability that this type style will continue to be available in future.

88 Character Type Styles (cont'd)

Bookface Academic 72*

10 Pitch, 10 Point

Type Codes: 158, 174

27 tooth ratchet 6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements

ABCDEFGHIJKLMNOPQRSTUVWXYZ !@#\$%&*()_+½:"'.,?
abcdefghijklmnopqrstuvwxyz 1234567890-½;'./

Courier 12*

12 Pitch, 8 Point

Type Codes: 132, 067, 068, 200

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements are also compatible with

ABCDEFGHIJKLMNOPQRSTUVWXYZ !@#\$%&*()_+½:"'.,?
abcdefghijklmnopqrstuvwxyz 1234567890-½;'./

Courier 12 Italic

12 Pitch, 8 Point

Type Codes: 133, 085, 086

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements are also compatible with

ABCDEFGHIJKLMNOPQRSTUVWXYZ !@#\$%&*()_+½:"'.,?
abcdefghijklmnopqrstuvwxyz 1234567890-½;'./

Courier 72*

10 Pitch, 10 Point

Type Codes: 134, 015, 029, 040, 043,

051, 052, 112, 113, 177, 178, 244

27 tooth ratchet

6 lines per inch

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements

ABCDEFGHIJKLMNOPQRSTUVWXYZ !@#\$%&*()_+½:"'.,?
abcdefghijklmnopqrstuvwxyz 1234567890-½;'./

Data 1

10 Pitch, 12 Point

Type Code: 527

27 tooth ratchet 6 lines per inch

Although not an exact match it functions satisfactorily with the 101 keyboard.

Cannot be specified on "Selectric"

Typewriter Model 721 orders.

IBM "Selectric" Typewriters provide a wide variety of typing applications, using interchangeable typing elements. These elements

ABCDEFGHIJKLMNOPQRSTUVWXYZ =<;:;% '>*()_+¢!'"|~?

88 AND 96 CHARACTER CUSTOM ELEMENTS

88 CHARACTER CUSTOM ELEMENTS

The 88 Character Custom Element program is offered in nine type styles — Prestige Elite 72, Courier 72, Elite 72, Pica 72, ANSI OCR, Data No. 1, Delegate, Letter Gothic, and Manifold. Refer to "Selectric" Typewriter Keyboards by Type Style for the type codes offered under this program.

Character changes are possible in 26 locations. Special characters available, and the locations in which they can be substituted are illustrated below.

Keyboard Locations (88 Character Custom Elements)

To maintain print quality, physical character size and keyboard velocity must be taken into account when making character substitutions on the type elements. The following guide must be used in determining the keyboard positions available for each substitution.

Guide Number	Keyboard Locations
1	UC & LC 0; UC 3, 7, 11, 15, 19, 23, 27, 31; UC & LC 35
2	UC & LC 40, 43
3	UC & LC 41
4	UC & LC 32, 38 & 39
5	UC & LC 36

Custom Character Positions

Refer to appropriate keyboard layout in Chapter 4 for the characters which will be replaced by the custom characters. More than one of the guide numbers may apply to an individual symbol.

96 CHARACTER CUSTOM ELEMENTS

The 96 Character Custom Element program is offered in ten type styles - Arcadia, Boldface, Courier 10, Courier 12, Elite, Letter Gothic, Modern, Pica, Prestige Elite, and Prestige Pica. Refer to Type Styles: Keyboards, Chapter 18, for the type codes offered under this program.

Character changes are possible in twenty-seven keyboard locations.

88 and 96 Character Custom Elements (cont'd)

Keyboard Locations (96 Character Custom Elements)

To maintain print quality, physical character size and keyboard velocity must be taken into account when making character substitutions on the type elements. The following guide must be used in determining the keyboard positions available for each substitution.

Guide Number	Keyboard Locations
1	UC E02, UC E03, UC E04, UC E05, UC E06, UC E07, UC E08, UC E09, UC&LC E10, UC&LC B10
2	UC E06, UC E08, UC E09, UC E10, UC&LC B10
3	UC&LC D12, LC E01
4	UC&LC C11, UC&LC C10, UC&LC D12, UC&LC E11, LC E01, UC B08, UC B09
5	LC E00, UC&LC D11
6	UC&LC E00
7	UC&LC E11, LC E01, UC&LC D12, UC B08, UC B09
8	UC B08
9	UC&LC C12
0	UC&LC B00, UC&LC E12

Custom Character Positions (96 Character Custom Elements)

Refer to the American Standard Keyboard in Chapter 19 for the characters which will be replaced by the custom characters. More than one of the guide number may apply to an individual symbol.

CUSTOM CHARACTER IDENTIFICATION (88 AND 96 CHARACTER)

ADDITIONAL SYMBOLS

Any additional symbols, keyboard locations, element part numbers or type styles other than those shown in this manual must be ordered on a SER basis.

LOCK-ON CAPS

Lock-on caps available only on primary element.

88 and 96 Character Custom Elements (cont'd)
Special Character Nomenclature

This list of characters and their most common description is intended as an aid to describing and ordering special symbols. It does not imply that the characters are available. Refer to this chapter for symbols available for each typestyle.

KEYBOARDS BY TYPE STYLE— 88 CHARACTER

Elements described are for "Selectric", "Selectric" II*, Correcting "Selectric" II Typewriters*, Mag Card II, Mag Card/A, Mag Card "Selectric" Typewriters, Memory Typewriters, Audio Typing Unit and MT/ST. (*To be discontinued April 6, 1981.)

Note: Keyboard arrangements will be determined by the primary element. If any OCR type style is ordered, an OCR keyboard will be supplied.

IBM Mag Card II, Mag Card/A, and Mag Card "Selectric" Typewriters, and the IBM Audio Typing Unit are described in this chapter as Mag Keyboards. Mag Card "Executive" Typewriter Type Styles and Keyboards are described in Chapters 5, 6, and 7.

All elements shown for the 101 Keyboard, *except for those designated* "American Standard" under Keyboard Description, are compatible with the discontinued 001 Keyboard. Only elements compatible with the 101 Keyboard can be specified on Model 721 "Selectric" Typewriter orders.

All "Selectric" Typewriter elements are compatible for use on the IBM Memory Typewriters, MT/ST, and Mag Keyboards. Those elements designed for keyboards not available for the Model 721 "Selectric" Typewriter, IBM Memory Typewriters, MT/ST, and Mag Keyboards should not be specified on orders for this equipment. Refer to this table, footnotes and keyboard layouts for specific information concerning the availability of elements.

Only elements compatible with the following Keyboards should be specified for IBM Mag Card II, Mag Card/A, and Memory Typewriters equipped with the IBM Audio Typing Unit:

101 Keyboard	172 Keyboard
017 Keyboard	174 Keyboard
177 Keyboard	195 Keyboard
178 Keyboard

(a) Do not specify on Model 721 orders.

†† Identifies those Courier and Prestige Elite elements that provide a compatible character set between the MT/ST and MT/SC to support precons 340, 341, 342 and 343. Caps have letters MT in lower right hand corner for identification purposes.

† Denotes type styles on which "Lock-on Heads" are available.

* Denotes type styles for which custom elements are available.

++017 Keyboard not available for Model 721, MT/ST, Mag Keyboards, and IBM Memory Typewriters. Elements are available for installed machines. For customers who require the former 017 Keyboard for Mag Keyboard equipment or Memory Typewriters, the 177 Legal Keyboard will be furnished and field-converted by Customer Engineering to 017. The keybutton changes required for the conversion and the elements compatible with the 017 Keyboard are to be ordered locally. The 177 Keyboard will not be furnished for the Model 721.

** Designed for Mag Card "Selectric" Typewriter with the Communicating feature when used in conjunction with a computer. Keyboard Layouts are shown in Communicating Mag Card "Selectric" Typewriter User's Guide Program Sheets, Form No. 5543-0610.

+Keyboards compatible with these elements are not available for Model 721, MT/ST, Mag Keyboards, and IBM Memory Typewriters.

+++Keyboards compatible with these elements are available for Mag Keyboards and the IBM Memory Typewriters, but not for MT/ST or Model 721.

(b) 174 Keyboard not available for Model 721, MT/ST, Mag Keyboards, and IBM Memory Typewriters. Elements are available for installed machines. For customers who require the 174 Keyboard for these models, the 101 Keyboard will be furnished and field-converted by Customer Engineering to 174. The keybutton changes required for the conversion are to be ordered locally.

***Refer to Customer Engineering for modifications necessary to accept these elements.

1. "Selectric" Typewriters manufactured prior to September 1, 1972.

2. Mag Keyboards and IBM Memory Typewriters, no charge.

3. MT/ST, on a parts plus labor basis.

+++Keyboards compatible with these elements are available for Mag Keyboards and the IBM Memory Typewriters, but not for MT/ST.

† Denotes type styles on which "Lock-on Heads" are available.

+Keyboards compatible with these elements are not available for Model 721, MT/ST, Mag Keyboards, and IBM Memory Typewriters.

* Denotes type styles for which custom elements are available.

(a) Do not specify on Model 721 orders.

*** Refer to Customer Engineering for modifications necessary to accept these elements.

1. "Selectric" Typewriters manufactured prior to September 1, 1972.

2. Mag Keyboards and IBM Memory Typewriters, no charge.

3. MT/ST, on a parts plus labor basis.

++ 017 Keyboard not available for Model 721, MT/ST, Mag Keyboards, and IBM Memory Typewriters. Elements are available for installed machines. For customers who require the former 017 Keyboard for Mag Keyboard equipment or the Memory Typewriters, the 177 Legal Keyboard will be furnished and field-converted by Customer Engineering to 017. The keyboard changes required for the conversion and the elements compatible with the 017 Keyboard are to be ordered locally. The 177 Keyboard will not be furnished for Model 721.

** Designed for Mag Card "Selectric" Typewriter with the Communicating feature when used in conjunction with a computer. Keyboard Layouts are shown in Communicating Mag Card "Selectric" Typewriter User's Guide Program Sheets, Form No. S543-0610.

†† Identifies those Courier and Prestige Elite elements that provide a compatible character set between the MT/ST and MT/SC to support precons 340, 341, 342 and 343. Caps have letters MT in lower right hand corner for identification purposes.

††† Intended for use with IBM 3886 Optical Reader. Meets ECMA-11 standards, 2nd Edition, established October, 1971. Although not an exact match, it functions satisfactorily with 101 Keyboard. Refer to type styles for character details.

— Contrasting Keybutton and Shift Sensitive Device or Velocity Control

Dead Key

— Low Velocity and Dead Key

TYPE CATALOG
88 Character Keyboards (cont'd)
017 Legal

Not available for Mag Keyboards, Memory Typewriters or Model 721.

Standard arrangement. Available in type codes 017, 049 and 051.

NOTE: If customers require this keyboard for Mag Keyboards and IBM Memory Typewriters, it is available through CE Field installation only.

046 Pica (Registered Trade Mark)

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in Pica 72 type code 046.

048 Court Reporter

Not available for Model 721.

Not compatible with the IBM Audio Typing Unit.

Standard arrangement. Available in type codes 048 and 052.

057 French/English Correspondence

Not available for Model 721.

Not compatible with the IBM Audio Typing Unit.

Standard arrangement. Available in Prestige Elite 72 type code 057.

Dead Key Disconnect Feature recommended with this keyboard if other elements are used.

88 Character Keyboards (cont'd)
069 Library

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in Elite 72 type code 069.

Dead Key Disconnect Feature recommended with this keyboard if other elements are used.

074 Tri-Lingual

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in Elite 72 type code 074, Prestige Elite type code 235 and Courier 72 type code 244. Types in French, English, and Spanish without changing the element.

Dead Key Disconnect Feature recommended with this keyboard if other elements are used.

105 AN3/360

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type codes 084 and 105.

120 Chemical

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in Prestige Elite 72 type code 120 and Pica 72 type code 121. In the upper case numeric positions, numerals are 1/2 the size of conventional numerals and appear in the subscript position. With typewriters equipped with a 48 or 54-tooth ratchet, these numbers appear in the superscript position by moving the platen back one tooth. Not available with Accent Blue keybuttons and platen knobs.

TYPE CATALOG
88 Character Keyboards (cont'd)
172 Accounting

Not available for Mag Keyboards,
Memory Typewriters or Model
721.

Standard arrangement. Available in
type code 172.

NOTE: If customers require
this keyboard for Mag Key-
boards and IBM Memory
Typewriters, it is available
through CE Field installa-
tion only.

174 Accounting

Not available for Mag Keyboards,
Memory Typewriters or Model
721.

Standard arrangement. Available in
type code 174.

NOTE: If customers require
this keyboard for Mag Key-
boards and IBM Memory
Typewriters, it is available
through CE Field installa-
tion only.

217 Athabasca

Not available for Mag Keyboards,
Memory Typewriters or Model
721. Not compatible with
IBM Audio Typing Unit.

Standard arrangement. Available in
type codes 217 and 218.

Dead Key Disconnect Feature recommended
with this keyboard if other elements are used.

88 Character Keyboards (cont'd)
236 Language Arts
Orator L/A

Standard arrangement. Available in type code 236.

Dead Key Disconnect Feature recommended with this keyboard if other elements are used.

Not available for Mag Keyboard equipment or IBM Memory Typewriters. However, on Model 721 Typewriters, positions 41 and 43 remain functional. The Dead Key Disconnect is unavailable for Model 721. Not compatible with the IBM Audio Typing Unit.

238 Metric

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement available in type codes 238 and 239

043 Modified Dvorak

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Designed to be used with all correspondence elements

151 American Simplified

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Designed to be used with all correspondence elements

88 Character Keyboards (cont'd)
OCR

Note: For details on the following OCR keyboards, refer to "OCR" an ET Sales Engineering publication. This is available from Department 980, Lexington Plant.

Where other than standard characters exist on the elements, multiple character keybuttons are on the actual keyboard. The characters shown at the right appear on these elements—standard arrangement is shown at the left for typist's information if a standard element is used.

016 1428 OCR Key punch
Simulator

Not available for Mag Keyboards or Memory Typewriters. Available to Commercial Customers ordering Model 721 as a no-charge SER. Available to Model 721 Educational customers via normal ordering procedures. Not compatible with the IBM Audio Typing Unit.

Standard arrangement. Available in type code 016. Designed for use with the IBM 1428 Scanner or card punch training. Only Accent Gray keybuttons and Charcoal Gray keypunch buttons are available.

022 1403 OCR

Available to Commercial Customers ordering Model 721 as a no-charge SER. Available to Model 721 Educational customers via normal ordering procedures. Not compatible with the IBM Audio Typing Unit.

Standard arrangement. Available in type code 022.

023 12L2/12F2 OCR

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 023. The type design is known as "12F2/12L2 Selfcheck+." Only Accent Gray keybuttons and Charcoal Gray keypunch buttons are available.

Velocity Control Feature supplied as standard at no extra charge.

88 Character Keyboards (cont'd)
056 American National Standards Institute - OCR

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 056. Incorporates the official ANSI alpha-numeric character set for OCR.

064 1403 OCR Key Punch Simulator

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 064.

Velocity Control Feature supplied as standard at no extra charge.

065 915 - OCR

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 065. Meets the requirements of the CDC 915 Scanner.

091 Communications OCR

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 091. This element provides the ANSI type style for the OCR in a correspondence keyboard arrangement.

TYPE CATALOG
88 Character Keyboards (cont'd)
092 915 – OCR (Modified)

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 092. The keyboard and keypunch buttons are available only in contrasting light-dark colors, in combinations of Accent Gray key-buttons/Charcoal Gray keypunch buttons.

106 Adding Machine Simulator

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 106. The keyboard and keypunch buttons are only available in contrasting light-dark colors, in combinations of Accent Gray key-buttons/Charcoal Gray keypunch buttons.

108 Communications OCR #2

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 108.

122 915 OCR #2

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 122.

88 Character Keyboards (cont'd)
157 Printing & Publishing #2 OCR

Not available for Mag Keyboards,
Memory Typewriters or Model
721. Not compatible with IBM
Audio Typing Unit.

Standard arrangement. Available in
type codes 157 and 199. (Type code
199 modified for Compuscan 170
Series Optical Readers).

159 Dataflow #2 – OCR

Not available for Mag Keyboards,
Memory Typewriters or Model
721. Not compatible with IBM
Audio Typing Unit.

Standard arrangement. Available in
type codes 659 and 672. Combines
conventional characters with a bar
code. Meets requirements of the
Dataflow Optical Reading System.
Available only with Charcoal Gray or
Accent Gray keybuttons and platen knobs.

160 ANSI OCR

Not available for Mag Keyboards,
Memory Typewriters or Model
721. Not compatible with IBM
Audio Typing Unit.

Same arrangement as the 056
keyboard, with the exception of the
"belt-buckle" delete symbol in upper
and lower cases, position 41 required
by IBM 1287/88 Optical Readers.

**170 Printing & Publishing #1
(ANSI-OCR-A)**

Not available for Mag Keyboards,
Memory Typewriters or Model
721. Not compatible with IBM
Audio Typing Unit.

Standard arrangement. Available in
type code 170. Includes all of the
characters of the four ANSI-OCR
elements plus the complete lower case
alphabet. Not available with Accent
Blue keybuttons and platen knobs.

TYPE CATALOG

88 Character Keyboards (cont'd)

173 Printing & Publishing #3
OCR

Not available for Mag Keyboards, Memory Typewriters or Model 721. Not compatible with IBM Audio Typing Unit.

Standard arrangement. Available in type code 173. Meets requirements of the OCR "Auto-reader." Available only with Charcoal Gray or Accent Gray keybuttons and platen knobs.

Symbol

Symbol Arrangement

Not available for Mag Keyboards or Memory Typewriters. Not compatible with IBM Audio Typing Unit

The keyboard arrangement shown only illustrates what characters are on the element — the standard keyboard arrangement is supplied. A half spacing ratchet is recommended. A Keyboard Reference Chart (Form No. 542-0037) aids in location of these characters on the standard keyboard. Available in type codes 004 and 061.

Labanotation

Not available for Mag Keyboards or Memory Typewriters. Not compatible with IBM Audio Typing Unit

The keyboard arrangement only illustrates what characters are on the element. The standard keyboard arrangement is supplied and matching keybuttons are not available. A keyboard reference chart (Form No. 542-0059) aids in location of these characters on the standard keyboard. The Labanotation element is designed for use only on a 10 pitch typewriter and requires 5 lines per inch (45 tooth ratchet) vertical line spacing and manual velocity control.

88 Character Keyboards (cont'd)
Symbol II Arrangement

Not available for Mag Keyboards or Memory Typewriters. Not compatible with IBM Audio Typing Unit

The keyboard arrangement only illustrates what characters are on the element. A keyboard reference chart, shown at right, (Form No. S544-0621) aids in location of these characters on the standard keyboard.

Keyboards (cont'd)**

Symbol

Symbol

The keyboard arrangement shown only illustrates what characters are on the element — the standard keyboard arrangement is supplied and matching keybuttons are not available. This element can be used only on machines equipped with the 101 American Standard or 149 Legal Keyboard. It is not compatible with any other keyboards, because of dead key, escapement and velocity differences.

1	2	3	4	5	6	7	8	9	0	=		=
0	3	7	11	15	19	23	27	31	35	39	43	
✓	Q	W	E	R	T	Y	U	I	O	P	+	+
1	5	9	13	17	21	25	29	33	37	41		
α	A	Σ	Δ	+	Γ	<	~	>	+	~	"	'
2	6	10	14	18	22	26	30	34	38	42		
~	ζ	ψ	ε	λ	β	ν	ω	'	..	±	/	
4	8	12	16	20	24	28	32	36	40			

A Keyboard Reference Chart (Form No. G543-0113) aids in location of these characters on the standard keyboard.

For maximum flexibility, the Symbol element should be used in conjunction with a half-spacing (48 tooth) ratchet. Using the 48 tooth ratchet, the superscript numbers can be used for subscripts by manually advancing the platen one tooth. If it is necessary for the vertical line on the radical sign to align with the underscore to create boxes or square root symbols, the use of a 27 or 54 tooth ratchet is suggested.

Machines equipped with this font must be equipped with at least one other 10 Pitch (Non-Production Speed) font.

Office System 6 Ink Jet Printers (cont'd)

NOTE:

Unless specified otherwise, the IBM 6640 Document Printers will be manufactured to read magnetic cards recorded on any IBM Mag Card Typewriter equipped with a 101 (correspondence) keyboard, using an element with the American Standard Character set (!/1 in Pos. 0 and ¼/½ in Pos. 41). Any of the following standards may be specified to satisfy customer requirements (see "Keyboard Compatibility Groups" in the Order Entry Hand-book):

KEYBOARD	POS. 0	POS. 41
101 (Corr.)	+/1	¼/½
101 (Corr.)	/1	%/!
101 (Corr.)	+/1	%/!
017 (Legal)	/1	%/!
177 (Legal)	0/1	/1
177 (Legal)	0/1	¼/½

A 92 character U.S. keyboard is standard on IBM 6/420, 6/430, 6/440, and 6/450 Information Processors with optional 94-96 character keyboards also available.

Print Key Arrangement (U.S. Keyboard)

96 Character—As shown above (Correspondence)

92 Character—Position B00 & C12 covered (Correspondence)

94 Character—Position C12 covered (Legal/Correspondence)

A 96 character Latin American keyboard is available on IBM 6/420, 6/430, 6/440, 6/442, 6/450, and 6/452 Information Processors. This arrangement is provided only when "Puerto-Rican Requirement Group" is specified. Refer to Optional Features & Accessories section for description of "Puerto-Rican Requirement Group".

Print Key Arrangement (Latin American Keyboard)

OFFICE SYSTEM 6 IMPACT TYPE STYLES**TYPE STYLE SIMILARITIES**

ELEMENTS	PRINT WHEELS
10 Pitch	Modified to fit on wheel as close as possible
12 Pitch	Matches element
P.S.M.	Modified to large extent — does not match

MACHINE AND SUPPLIES VARIANCES

The higher impact of the element and lower impact of the print wheel will cause variances.

The carbon/Tech III ribbon as compared to multi-strike ribbons will cause variances.

Little element wear as compared to the broadening effects of wear on a print wheel will cause variances.

The customers should be made aware of these variances. The customer should make the decision on compatibility regarding quality.

A 96 character Latin American Keyboard is available on IBM 6/442 and 6/452

Latin American Keyboard - 96 Character
Symbol Print Wheel Considerations

Make our customers totally aware of the process involved in using the Symbol Print Wheel. To change a print wheel requires that the ribbon first be removed, the print wheel changed, and then the ribbon reinstated. The procedure is time-consuming and can cause annoyance if required frequently. Productivity losses can be expected with this procedure, especially with extensive formula generation. These facts must be made clear to our customers, so they don't expect the same productivity they receive with single elements and Ink Jet Printing.

96 CHARACTER TYPE STYLES +**

+ The samples in this chapter were typed using a 96 character keyboard. They should be used as a guide for type design only. For an exact illustration of the characters on an element, refer to the Keyboards Section.

Adjutant 12 Pitch, 9 Point 54 Tooth Ratchet 6 Lines Per Inch Type Code 52924	IBM ADJUTANT Type is recommended for the preparation of text copy and other similar typing applications. A weighted serif type design, it conveys the feeling of printed material. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Advocate 10 Pitch, 12 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52007, 52011	IBM ADVOCATE Type is an open-spaced, square-serif design. It is well suited to all correspondence needs. Note the easy reading of its open-spaced design. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Artisan 12 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52004, 52026	IBM ARTISAN Type is well suited for general correspondence and offset reproduction requiring the maximum utilization of space. Type is a clean, easy-to-read, sans-serif design. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Auto Elite 12 Pitch, 12 Point 54 Tooth Ratchet 6 Lines Per Inch Type Code 52010	IBM AUTO ELITE Type is a taller version of ELITE Type with more conventional numerals. It is used for correspondence, offset reproduction, statistical reports and text material of high density. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Bookface Academic 10 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52904, 52017 52020	IBM BOOKFACE ACADEMIC Type is ideal for executive correspondence, offset reproduction and statistical reports, with its large, bold serif design. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Courier 10 10 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52002, 52021, 52019, 52012, 52030	IBM COURIER Type finds wide use in general correspondence, offset reproduction and manifolded. It is a square-serif design in the PICA family. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:'?',.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Courier 10* Court Reporter 10 Pitch, 10 Point 24 Tooth Ratchet 5.33 Lines per Inch	IBM COURIER Type finds wide use in general correspondence, offset reproduction and manifolded. It is a square-serif design in the PICA family. ABCDEFGHIJKLMNOPQRSTUVWXYZ [!@#\$\$%&*()_+°^:"',.?¶Δ abcdefghijklmnopqrstuvwxyz]1234567890-QA;/;',.?\$π

96 Character Type Styles (cont'd)

Courier 12 12 Pitch, 8 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52908, 52938, 52930	IBM COURIER 12 Type is ideal for general correspondence, offset reproduction and a wide variety of general applications which require the maximum use of typing space. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Courier 12 Italic 12 Pitch, 8 Point 54 Tooth Ratchet 6 Lines Per Inch Type Code. 52005	IBM COURIER 12 ITALIC Type is also widely used for general correspondence, offset reproduction and other applications requiring the maximum utilization of space. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Delegate 10 Pitch, 12 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52912, 52927	IBM DELEGATE Type is recommended for text copy and similar jobs, where a weighted type conveying the feeling of printed material is used. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Dual Gothic 12 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Code 52001	IBM DUAL GOTHIC Type is a fine-line, sans-serif type style used for credit reports and other financial typing applications. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Elite 12 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52913, 52936, 52916, 52931	IBM ELITE Type is used for correspondence, offset reproduction, statistical reports and text material of high density. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²
Large Elite 12 Pitch, 10 Point 54 Tooth Ratchet 6 Lines Per Inch Type Codes 52008, 52022	IBM LARGE ELITE Type is a taller version of ELITE Type with distinctive numerals. It is used for correspondence, offset reproduction, statistical reports and text material of high density. ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$\$%&*()_+½[:"?,.¶³ abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.,\$²

Electronic Typewriters
IBM Selectric® III Typewriters
96 Character Type Styles (cont'd)

Letter Gothic
12 Pitch, 12 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Codes 52909, 52932

IBM LETTER GOTHIC Type is an ideal selection for invoices, statements and other typing applications where boldness is desired. It is a distinctive sans-serif type.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*()_+½[:"?,.¶³
abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.§²

Light Italic
12 Pitch, 10 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Codes 52922, 52933

IBM LIGHT ITALIC Type is recommended for use alone or in combination with PICA or ELITE type styles to add impact and emphasis to a wide variety of typing applications.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*()_+½[:"?,.¶³
abcdefghijklmnopqrstuvwxyz ±1234567890-=½];'/.§²

Manifold
10 Pitch, 10 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Code 52914

IBM MANIFOLD TYPE IS A SANS-SERIF TYPE FOR BILLING AND FORMS PREPARATION.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*()_+½[:"?,.¶³
ABCDEFGHIJKLMNOPQRSTUVWXYZ ±1234567890-=½];'/.§²

1403 OCR
10 Pitch, 10 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Code 52028*

IBM 1403 OCR TYPE IS DESIGNED FOR USE WITH OPTICAL SCANNERS WHICH READ IBM CHAIN PRINTER OUTPUT.

Orator Presentor
10 Pitch, 14 & 8 Point
54 Tooth Ratchet,
6 Lines Per Inch
Type Code 52029

IBM PRESENTOR Type is a large, sans-serif style with upper and lower case letter forms ideal for applications requiring maximum legibility and impact.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*() +_[:",.~³
abcdefghijklmnopqrstuvwxyz ±1234567890-=_}]';',./\$²

Pica
10 Pitch, 12 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Codes 52907, 52016, 52929

IBM PICA Type is used for general correspondence, stencils and manifolded. It is also available in legal, court reporter and chemical versions.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*() +_[:",.~³
abcdefghijklmnopqrstuvwxyz ±1234567890-=_}]';',./\$²

Prestige Elite
12 Pitch, 10 Point
54 Tooth Ratchet,
6 Lines Per Inch
Type Codes 52003, 52024, 52013, 52937, 52917

IBM PRESTIGE ELITE Type is available for general and legal correspondence, offset reproduction, statistical reports, text material of high density.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#%&*() +_[:",.~³
abcdefghijklmnopqrstuvwxyz ±1234567890-=_}]';',./\$²

Prestige Elite Tri-Lingual
12 Pitch, 10 Point
54 Tooth Ratchet
6 Lines per Inch
Type Code 52917

IBM PRESTIGE ELITE TRI-LINGUAL Type is available for the same general and legal applications as Prestige Elite. It also contains common French and Spanish accent marks.

ABCDEFGHIJKLMNOPQRSTUVWXYZ ;!"f\$%\$'*() +~°ñ";:~äë
abcdefghijklmnopqrstuvwxyz ;1234567890-="çñ^,./üé

Prestige Pica
10 Pitch, 12 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Codes 52905, 52018, 52025

IBM PRESTIGE PICA Type is ideal for legal correspondence, offset reproduction, statistical reports and manifolded. There is also an accounting version.

Print & Publ. #3 OCR

10 Pitch, 8 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Code 52921

IBM PRINTING AND PUBLISHING 3 Type is designed for applications involving ECRM scanners. Similar to Courier 12, some characters have been modified to

ABCDEFGHIJKLMNOPQRSTUVWXYZ	° !@#\$%&*()△+{[:",. ? 1 3
abcdefghijklmnopqrstuvwxyz	±1234567890- = } ; ' , . / \$ 2

Scribe

12 Pitch, 10 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Code 52009

IBM SCRIBE Type is ideally suited for the preparation of reports and correspondence, where the user desires a modern square-serif design in the ELITE family of type styles.

ABCDEFGHIJKLMNOPQRSTUVWXYZ °!@#\$%&*()_+[]:"?.,'³
 abcdefghijklmnopqrstuvwxyz ±1234567890-=:½;'/.,²

Script

12 Pitch, 12 Point
54 Tooth Ratchet
6 Lines Per Inch
Type Codes 52923, 52935

IBM SCRIPT Type is widely used for correspondence and other typing applications to simulate handwriting, and to provide the look of a personal note and a change of emphasis.

Listed below are the step-by-step instructions for typing Benzene Rings.

Start type

1. Type upper case J (●)
2. Required Backspace, Reverse Index up ↑ , type uppercase M (|).
3. Required Backspace, Reverse Index up ↑ , type uppercase J (●).
4. Reverse Index up ↑ , type uppercase $\frac{0}{\pm}$ (/).
5. Reverse Index up ↑ , type uppercase J (●).
6. Reverse Index down ↓ , type lowercase $\frac{0}{\pm}$ (\).
7. Reverse Index down ↓ , type uppercase J (●).
8. Required Backspace, Reverse Index down ↓ , type uppercase M (|).
9. Required Backspace, Reverse Index down ↓ , type uppercase J (●).
10. Reverse Index down ↓ , Require Backspace 4 times, type lowercase $\frac{0}{\pm}$ (\).
11. Required Index down ↓ , type uppercase J (●).
12. Reverse index up ↑ , type uppercase $\frac{0}{\pm}$ (/).

This is the most basic ring. Variations of this are made by substituting the various slash lines.

1403 AND 1404 PRINTERS— SYSTEM/360, SYSTEM/370, AND 4300 PROCESSORS

Either an AN or HN arrangement (48-character set) is standard on the 1403 model 2 or 7, on the 1404, and on the 1416 (1403 model 3 or N1).

1403 model 2 -- All other arrangements except OAA, OAB, ODA and ONA require the Universal Character Set Feature (Multiple Character Set Feature if printer is attached to 2025 Processing Unit of System/360 model 25).

1403 model 7 -- The only other arrangements available are OAA, OAB, ODA and ONA.

1403 model 3 or N1 -- All other arrangements except ODA and ONA require the Universal Character Set Feature (Multiple Character Set Feature if 1403 N1 is natively attached to 2025 Processing Unit of System/360 model 25).

1404 -- No other arrangements are available.

The chart below shows EBCDIC card and bit codes assigned to special characters included in all print arrangements except SN, TN and ALA. For SN, TN and ALA graphics and their associated EBCDIC card and bit codes, see 1403 SRL (GA24-3073).

The graphics/codes assigned to the PN, QNC and QN arrangements constitute the PL/I language (59 characters) plus the quotation mark symbol.

EBCDIC		Arrangements and Number of Graphics

Nominal printing speeds for all available arrangements are listed below. "Nominal" speed is a weighted average of mean expected value when the train or chain arrangement is performing typical printing operations.

Arrangement	Character Set	Nominal Printing Speed - Lines per Minute			
		1403 model 2	1403 model 3 or N1	1403 model 7	1404 model 2
ALA	162 graphics, 78 preferred	---	560/310*	---	---
AN	48 "A" graphics	600	1100	600	600
HN	48 "H" graphics	600	1100	600	600
OAA (representative of OCR-A - alphabetic)	5 "A" graphics + 43 OCR-A	600	1100	600	---
OAB (representative of OCR-B - alphabetic)	48 (representative of OCR-B graphics)	600	1100	600	---
ODA (representative of OCR-A - numeric)	38 "A" graphics + OCR-A numeric	600	1100	600	---
ONA (representative of OCR-A - numeric)	35 "A" graphics + OCR-A numeric and 3 special characters	600	1100	600	---
GN (ASCII)	3-level set, 63 graphics	500/390/140	955/775/310	---	---
PCS-AN (Preferred Character Set)	3-level set, 48 "A" graphics	750/500/270	1400/955/560	---	---
PCS-HN (Preferred Character Set)	3-level set, 48 "H" graphics	750/500/270	1400/955/560	---	---
PN (PL/I)	60 graphics	500	955	---	---
QNC (PL/I - Commercially Preferred)	60 graphics, 45 preferred	---	1110/310	---	---
QN (PL/I - Scientifically Preferred)	60 graphics, 45 preferred	600/140	1110/310	---	---
RN (FORTRAN/COBOL Commercial)	52 graphics, 47 preferred	600/140	1110/310	---	---
SN (Text Printing - Commercial)	84 graphics, 78 preferred	390/140	775/310	---	---
TN (Text Printing - Scientific)	120 graphics	270	560	---	---
XN (High Speed Alphabetic)	40 graphics	690	---	---	---
YN (High Speed Alphabetic)	42 graphics, 39 preferred	---	1250/560	---	---

*When printing diacritical marks over or under alphabetic characters an additional print cycle is required, resulting in reduced throughput.

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Universal

Character Set: See 1403 SRL (GA24-3073) for formulas which facilitate calculation of speeds for specific applications or custom designed character sets... including absolute minimum values. The nominal speed is dependent upon the frequency with which the various subsets in a preferred character set are printed. For example, the PCS-AN arrangement consists of 48 different graphics arranged in a sequence so that some of the characters occur more frequently than others:

48 graphics -- 3-level preferred set

Characters of primary preference appearing 8 times
Characters of secondary preference appearing 4 times
Characters of least preference appearing twice

PCS-AN graphics

0-9 . , - *
A-Z □ ▢ \$ / +
% # @ &

The speeds at which graphics in each of the three levels of preference are printed are included in the table on the previous page.

The Universal Character Set Feature is required on the 1403 model 2 for use of any arrangement other than AN, HN, OAA, ODA and ONA. It is also required on the 1403 model 3 or N1 for any arrangement other than AN, HN, ODA and ONA. **Note:** With the UCS Feature, speeds of 750 lpm (1403 model 2) and 1400 lpm (1403 model 3 or N1) are theoretically achievable with any arrangement, depending on the data being printed.

AN and HN chains/trains have identical graphics except for four graphics which are exclusive to each arrangement as follows:

Chain/Train Character Position No.	AN Arrangement			HN Arrangement		
	Graphic	Card Code	Bit Code	Graphic	Card Code	Bit Code
48	α	12-8-4	0100 1100)	11-8-5	0101 1101
24	⌘	0-8-4	0110 1100	(12-8-5	0100 1101
12	⊖	8-4	0111 1100	'	8-5	0111 1101
11	#	8-3	0111 1011	=	8-6	0111 1110

With an HN chain/train installed, if a code for one of the above AN graphics is presented to the printer, the HN graphic of the associated character position will print. Conversely, if the code for an HN graphic is presented to a printer equipped with an AN chain/train, the AN graphic of the associated character position will print. In other words, these AN and HN graphics are duals automatically.

It is recommended that the 12-8-4 (0100 1100) code be used for the α only in arrangements not containing the < symbol. In EBCDIC, the < is assigned 12-8-4 (0100 1100). If a α is to be used in an arrangement which also contains the < symbol, it is recommended that the α be assigned a 12-11-8-4 (0111 1100) code. For Arrangement OAA or ONA, recommended coding of the hook, fork and chair graphics are shown under "OCR Fonts" below.

Multiple

Character Set: All arrangements listed on the previous page will operate with the Multiple Character Set Feature installed on a 1403 model 2 or N1 when natively attached to a 2025 (System/360 model 25). The Multiple Character Set Feature is required on the 1403 model 2 for use of any arrangement other than AN, HN, OAA, ODA and ONA. It is also required on the 1403 model N1 for any arrangement other than AN, HN, ODA and ONA. For each arrangement, the nominal printing speed is listed. (See S/360 model 25 SRL, GA24-3510, for formulas which facilitate calculation of speeds for specific applications or custom designed character sets... including absolute minimum values.)

Note: The Multiple Character Set Feature or the Universal Character Set Feature on the 1403 provides the same function when the printer is attached to the 2025 Processing Unit via the Integrated 1403 Attachment (#4590).

Only the AN, HN, OAA, ODA, ONA, PN, TN and XN arrangements will operate at speeds equivalent to those listed on the previous page. Other arrangements, with preferred graphics in non-repeatable sets, will result in speed degradation. In these other arrangements, characters of least preference dictate the printing speed. Consequently, only the lowest nominal printing speed applies to a 1403 model 2 or N1 natively attached to the 2025 Processing Unit; i.e., with an RN arrangement on a 1403 model 2, the nominal printing speed is 140 lines per minute... with RN on 1403 model N1, nominal printing speed is 310 lines per minute.

Printing for Optical Char- acter Reading:

For Arrangement OAA or ONA, recommended coding of the hook, fork and chair graphics are shown under "OCR Fonts" below.

ECA No. 42, B/M 5870287, is required on any 1403 which will be equipped with a chain/train to prepare documents for optical reading by a 1282, 1287, 1288, 1418, 1428 or 3886.

OCR Fonts: OCR-A Font, Size 1 and OCR-B Font, Size 1 -- IBM print chains/trains are available for printing numeric, alphabetic and certain special characters which are representative of OCR-A and OCR-B Fonts. The optically readable characters of these arrays were designed to be representative of (but not always identical to) the mean character (shape) centerline described in the "United States of America Standard Character Set for Optical Character Recognition, Size A, USAS X3.17-1966" for OCR-A font (also referred to as ANSCS OCR) and the "European Computer Manufacturers Association's Standard ECMA-11 for Alphanumeric Character Set OCR-B for Optical Recognition 2nd Edition, October, 1971" for OCR-B font. Documents printed by a 1403 chain/train can be read by the 1287, 1288 and 3886 optical readers as indicated on the "Machines" pages. It must be recognized that parameters are subject to variations, and that deviations from specified limits may occur in bulk printing on 1403 printers.

Print speeds for the following arrangements are indicated on TC 71.1. No change to Programming Systems support is required.

Arrangement OAA (#9710) -- Contains letters A-Z, digits 0-9, and special characters / - . , : ; ' " & # \$ % < of OCR-A, Size 1, and # @ \$ + < of standard (.095") 1403 type style. Because of the repositioning of optical graphics (characters) on print trains (1416), the 1403 must be equipped with either the Universal Character Set Feature (#8640) or Multiple Character Set Feature (#5111) depending on the 1403 model and S/360 or S/370 model involved.

In the OAA arrangement, either one (but not both) of the following may be specified for the character substitution(s) indicated:

*9711 □ in place of <

*9712 ▢ in place of <

*9712 ▣ in place of +

*9712 ▤ in place of %

If desired, *9728 (Timing Mark dash) may be specified in place of #.

Arrangement ODA (#9701) -- Contains the same graphics as the AN arrangement except digits 0-9 are replaced by the corresponding digits of OCR-A, Size 1.

Arrangement ONA (#9702) -- Same as ODA but □ + % are replaced by ▢ ▣ ▤ (respectively) of OCR-A, Size 1.

When the Universal Character Set or Multiple Character Set Feature is used with the ONA arrangement, or OAA arrangement equipped with ▢ ▣ ▤ graphics, it is recommended that these graphics be coded as follows:

Graphic	Card Code	Bit Code
▢	12-0-9-8-4	1100 1100
▣	12-0-9-8-6	1100 1110
▤	11-0-9-8-4	1110 1100

Arrangement OAB (#9713) -- Contains letters A-Z, digits 0-9, and special characters . < + % \$ - / > ' = * of OCR-B font, Size 1. Because of repositioning of optical graphics (characters) in the print train (1416), the 1403 must be equipped with either the Universal Character Set Feature (#8640) or Multiple Character Set Feature (#5111) depending on the 1403 and the system involved.

In the OAB arrangement, the following may be specified for the character substitution indicated:

*9729 -- Timing Mark dash in place of > .

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Print Chain/Train Arrangements

Print Arrangements are assigned an alphabetic designation (AN, HN, PCS-AN, etc.). Except for the OCR arrangements, the type size or style is designated by a numeric suffix (AN2, HN3, AN4, etc.), with 2 = .095" type size; 3 = .079" type size; 4 = 1428 Type Style; 5 = Text Type Style; and 6 = Library Type Style. Based on this coding, print chains, trains are assigned Feature #s as indicated below for each available arrangement.

S/360	S/370	Printer	Standard Type Style		Alternate Type Style		OCR-A Applications		OCR-B Applications		1428 Type Style		Text Type Style		Library Type Style		Reference
			.095"	Feat.#	.079"	Feat.#	Size 1	Feat.#	Size 1	Feat.#	OCR	Feat.#	Text Pnt.	Feat.#	Lib. Pnt.	Feat.#

IMPORTANT -- Prerequisites for attachment of a 1403 or 1404 Printer to a System/360 Processing Unit or 2821 Control Unit are described on the 1403 and 1404 "Machines" pages. The 1403 "Machines" page also covers prerequisites for attachment to System/370: Certain print chain/train arrangements require additional features (i.e., Universal Character Set or Multiple Character Set) on the printer and processing unit or control unit. These additional prerequisites are covered by "Notes" indicated under "Reference" in the above chart.

In any case below where the Universal Character Set Feature (#8640/8641) or Multiple Character Set Feature (#5110/5111) is shown as a prerequisite, either feature on the applicable 1403 will function with the MCS Adapter (#5100) on the 2025 Processing Unit.

- Notes: (1) Arrangement AN4 can be used to prepare documents for optical reading by a 1428 Alphameric Optical Reader, 1282 Optical Reader Card Punch, or 1287 Optical Reader.
- (2) OCR Arrangement OAA, ODA or ONA can be used to prepare documents for optical reading by a 1287, 1288 or 3886 optical reader. The OAB arrangement can also be used to prepare input for the 3886. For specific graphics which can be read, see reader Component Description manuals. Graphics which comprise each character set are illustrated on one of the following pages. If the Universal Character Set Feature, or Multiple Character Set Feature in System/360 model 25, is used on the 1403, it is recommended that the hook, fork and chair of the ONA Arrangement (#9702) or OAA Arrangement (#9710 modified by #9712) be coded as described under "OCR Fonts" on the previous page. Also, see "Printing for Optical Character Reading" on page TC 71.2.
- (3) System/360 model 25 -- For natively attached 1403, Multiple Character Set Feature (#5110) and Interchangeable Chain Cartridge Adapter (#4740) are prerequisite on the 1403 and Multiple Character Set Adapter (#5100) is required on the 2025 Processing Unit. If 1403 is attached to 2025 via the Multiplexer Channel (#5248) or Selector Channel (#6960), 1403 must be equipped with Universal Character Set Feature (#8641) and Interchangeable Chain Cartridge Adapter (#4740), and 2821 Control Unit model 1, 2, 3 or 5 must be equipped with Universal Character Set Adapter (#8637, 8638 or 8639).
- S/360 mdl 22, 30 thru 85 and 195 and any S/370 Processor -- Universal Character Set Feature (#8641) and Interchangeable Chain Cartridge Adapter (#4740) are prerequisite on the 1403 and Universal Character Set Adapter (#8637, 8638 or 8639) is required on 2821 Control Unit mdl 1, 2, 3 or 5.
- (4) 1403 model 7 is not available for use with System/360 model 67.
- (5) 1403 model 3 is not available for use with System/360 model 22, 85 or 195, nor for System/370 model 195.
- (6) System/360 model 25 -- For natively attached 1403, Multiple Character Set Feature (#5111) is prerequisite on the 1403 and Multiple Character Set Adapter (#5100) is required on the 2025 Processing Unit. If 1403 is attached to 2025 via the Multiplexer Channel (#5248) or Selector Channel (#6960), 1403 must be equipped with Universal Character Set Feature (#8640) and 2821 Control Unit model 1, 2, 3 or 5 must be equipped with Universal Character Set Adapter (#8637, 8638 or 8639).
- S/360 mdl 22, 30 thru 85 and 195 and any S/370 Processor -- Universal Character Set Feature (#8640) is required on the 1403 and Universal Character Set Adapter (#8637, 8638 or 8639) on the 2821 Control Unit mdl 1, 2, 3 or 5.
- (7) A 2821 Control Unit model 4 is prerequisite. Arrangement AN4 can be used to prepare documents for optical reading by a 1282 Optical Reader Card Punch.
- Note: The 1404 is not available for use with System/360 model 44 nor with System/370.

In addition to the arrangements listed above for System/360, any standard chain/train previously used with a 1400 series system (including numeric chains... see "Limitations" on next page) can be used on a 1403 equipped with the Universal Character Set Feature (or Multiple Character Set Feature in System/360 model 25). See page TC 71.5.

Specify: See next page.

**1403 and 1404 Printers—
System/360, System/370, 4300 Processors
(cont'd)**

- Specify: [1] For 1403 model 2 or 7, or 1404 model 2 -- One print chain Feature # unless Interchangeable Chain Cartridge Adapter (#4740) is ordered ... with #4740, specify two Feature #s.

For 1416 (1403 model 3 or N1) -- one print train Feature # for each 1416 ordered.

- [2] If desired, #9140 for enlarged dash (Character No. 732464) in lieu of standard dash for printing on documents to be read by IBM optical mark readers. Available as substitution in all arrangements except OAA, OAB, AN-4, PCS-AN, PCS-HN, QNC, SN, TN, ALA, XN and YN.
- [3] If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except AN-4, OAA, OAB, ODA, ONA, SN5 and TN5.
- [4] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except AN-4, OAA, OAB, ODA, ONA, SN5 and TN5.
- [5] If desired, #9722 for ! (exclamation point) in lieu of | (logical (OR) in GN arrangement.
- [6] If desired, #9723 for ^ (circumflex) in lieu of ~ (logical NOT) in GN arrangement.
- [7] If desired, #9728 for - (timing mark dash) in lieu of * in OAA arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 2642392 in Train Slug No. 2642393 or Chain Slug No. 2633870.
- [8] If desired, #9729 for - (timing mark dash) in lieu of > in OAB arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 1798438 in Train Slug No. 1798437 or Chain Slug No. 2645792.
- [9] If desired, #9670 -- so that the comma will appear five times and the pound sign only once in a QNC arrangement. Thus when printing commas on a line, the printer will maintain an output rate of 1110 lines per minute regardless of the frequency per line. There will be no throughput improvement when no commas are printed on a line. For field installation, order four type slug substitutions at the prices listed on page TC 34.
- [10] If desired, #9690 for Non Standard Type Arrangement. See "Type Slug Substitutions" paragraph below.

Limitations: On a 1403 model 2 equipped with Universal Character Set Feature (#8641) or Multiple Character Set Feature (#5110), and using a numeric chain (#9484 or #9485), maximum speed is limited to 750 lines per minute. If machine is equipped with Numerical Print Feature (#5381) and is to be retained for use in System/360 or System/370, contact Special Product Marketing.

Alphabetic and numeric characters from Arrangement SN5 and TN5 cannot be substituted in any other arrangements, nor can characters from other arrangements be substituted in SN5 and TN5.

Because of lesser type face density of the SN5 and TN5 arrangements: (1) Ribbon life may be reduced when printing on continuous forms; (2) The number of normal print quality copies is limited to the original and first copy with the customer using additional copies at his own discretion.

The TN arrangement is limited to use at 6 lines per inch spacing due to the overlap otherwise created by exponent characters.

The ALA arrangement, available only for the 1416 Interchangeable Train Cartridge, has the following limitations: (1) Ribbon life may be reduced when printing on continuous forms because of greater type face density; (2) For optimum print quality, single part paper is recommended; (3) 6 lines per inch vertical spacing is recommended when under or over-printing (diacritical marks, etc.); (4) All special applications such as spirit, photo-offset, multilith, diazo, heat transfer or similar process should be tested to assure satisfactory results.

Notes: Arrangements AN2 and RN2 can be used to prepare documents to be read by a 1418 Optical Character Reader. See "Printing for Optical Character Reading" (page TC 71.2).

All standard 1403 chains/trains contain some ASCII characters. The GN arrangement provides a 63-character set consistent with the American Standard Code for Information Interchange (ANSI X3.4-1968).

It is important to select the arrangement which gives the highest print speed for the customer's applications. As a guide, the arrangement with the smallest character set should be selected. For example, the AN and HN 48-character sets have a nominal printing speed of 1100 lines per minute on the 1403 model N1, while the PN 60-character set runs at 955 lines per minute (nominal speed).

Feature #9690 (Non-standard Type Arrangement) will be specified for: (1) Rearrangement of standard type slugs; (2) Rearrangement of standard characters in one or more slugs; (3) Substitution of other available characters in slugs; (4) New design characters. #9690 should not be specified for the other substitutions allowed in the "Specify" list.

Arrangement RN is designed for FORTRAN/COBOL use. Any HN, PCS-HN, PN, QNC, QN and TN arrangement also has this capability.

Type Slug

Substitutions: Standard type slugs can be substituted for others in announced arrangements without charge. These slugs are furnished at no charge when properly ordered and plant installed on a chain, or in a train. See "Substitute Characters" on page TC 110. For field installation, see "Substitute Characters - Field Installation" on page TC 110 for ordering and charges. Also review "Limitations" above. The frequency of occurrence on the chain/train determines the quantity of identical slugs which must be ordered. See 1403 SRL (GA24-3073) for details of designing a custom chain or train.

Print Chains: Additional, spare, or replacement chains are available for either fixed or interchangeable cartridges used on the 1403 model 2 or 7, or 1404 model 2.

	Feature #	Rental	Purchase	MMMC	FIC
Any one chain arrangement listed on the previous page, chain only	5532	\$1,490SUC	\$1,335	NC	\$ 51

- Specify: #5532 and Feature # of desired chain. (Note: If both chains supplied with Interchangeable Chain Cartridge Adapter (#4740) are to be changed in the field, price applies to each chain. If more than two interchangeable cartridges are desired for a machine, or interchangeability with more than one machine is desired, consult Special Product Marketing.

Print Trains: Additional print trains (which are 1416s) are available by ordering additional 1416 Interchangeable Train Cartridges ... see 1416 in "Machines."

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Use of 1400 Series

Chains/Trains: THIS CHART IS INCLUDED FOR INFORMATION PURPOSES ONLY. FOR A CUSTOMER WHO WILL BE CONVERTING TO SYSTEM/360 FROM AN INSTALLED 1400 SERIES SYSTEM, AND DESIRES TO RETAIN HIS 1403/1404 PRINTER FOR USE IN SYSTEM/360, THE 1400 SERIES PRINTING ARRANGEMENT CAN STILL BE USED. (PREREQUISITES FOR SYSTEM/360 USE ARE INCLUDED IN THE CHART.) WHENEVER REQUESTED BY THE CUSTOMER, THE 1400 SERIES CHAINS/TRAINS WILL BE CONVERTED TO SYSTEM/360 ARRANGEMENTS AT NO CHARGE IN ACCORDANCE WITH THE PROCEDURES UNDER "SPECIFY" ON THE 1403/1404/1416 "MACHINES" PAGES.

Prerequisites for attachment of a 1403 or 1404 Printer to a System/360 Processing Unit or 2821 Control Unit are described on the 1403 and 1404 "Machines" pages. Certain print chain/train arrangements require additional features (i.e., Universal Character Set or Multiple Character Set) on the printer and processing unit or control unit. These additional prerequisites are covered in the chart below.

Std. Type Style		Alt. Type Style		1428 Type Style		Prerequisites for System/360 Use
.095"	Feature #	.079"	Feature #	OCR	Feature #	
1400 Series Chain Arrangements -- 1403 model 2 (also see 1404 model 2, below)						
A2	9601	A3	9581	A4	9591	<u>System/360 model 25</u> -- Printer can be either natively attached to 2025 Processing Unit or via the Multiplexer Channel or Selector Channel. For printer natively attached: Either (a) or (b) is required: (a) 1403 with fixed cartridge or Interchangeable Chain Cartridge Adapter (#4740) and 2025 Processing Unit equipped with 1400 Series Compatibility (#4440) and 1401/1460 Compatibility (#4441). This permits use of any arrangement A thru K. (b) 1403 with Interchangeable Chain Cartridge Adapter (#4740) and Multiple Character Set Feature (#5110) plus Multiple Character Set Adapter (#5100) on 2025 Processing Unit. Any arrangement A thru K and numeric chains (#9484 and #9485) can be used. With numeric chains, printing speed is limited to 750 lines per minute ... see "Note" included in (d), below. For printer attached via Multiplexer Channel (#5248) or Selector Channel (#6960) on 2025: Either (c) or (d) is required: (c) 1403 with fixed cartridge or Interchangeable Chain Cartridge Adapter (#4740) and 2025 equipped with 1400 Series Compatibility (#4440) and 1401/1460 Compatibility (#4441), plus 2821 model 1, 2, 3 or 5. This permits use of any arrangement A thru K. (d) 1403 with Interchangeable Chain Cartridge Adapter (#4740) and Universal Character Set Feature (#8641) plus Universal Character Set Adapter (#8637, #8638 or #8639) on 2821 Control Unit model 1, 2, 3 or 5. This permits use of any arrangement A thru K plus numeric chains (#9484 and #9485). With numeric chains, printing speed is limited to 750 lines per minute. <u>Note:</u> If 1403 model 2 with Numeric Print Feature (#5381), from a 1400 Series System, is to be retained for use in System/360, consult Regional Special Product Marketing. <u>System/360 model 30</u> -- Either (e) or (f) is required: (e) 1403 with fixed cartridge or Interchangeable Chain Cartridge Adapter (#4740) and 1401/1460/1460 Basic Compatibility (#4456) on 2030 Processing Unit. This permits use of any arrangement A thru K. (f) Same as (d) listed above for System/360 model 25. <u>System/360 model 40</u> -- Either (g) or (h) is required: (g) 1403 with fixed cartridge or Interchangeable Chain Cartridge Adapter (#4740) and 1401/1460 Compatibility (#4457) on 2040 Processing Unit. This permits use of any arrangement A thru K. (h) Same as (d) listed above for System/360 model 25. <u>System/360 models 44 thru 85 and model 195</u> -- Same as (d) listed above for System/360 model 25.

PCS-A2	9561	PCS-A3	9623			
PCS-H2	9563	PCS-H3	9625	J4	9599	
1404 model 2 Printer						
						<u>System/360 model 30</u> -- 2821 Control Unit model 4 plus (e) as listed above for 1403 model 2 in System/360 model 30. Compatibility is achievable only on the continuous form side of the 1404.

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Print Chains: 1403 models 2 and 7, and 1404 model 2: Print chains consist of multiple arrays of type slugs placed end to end, with 2 characters per slug. The number of slugs in an array, and the number of different characters (graphics) in that array, will vary depending upon the print arrangement selected. Each print chain has a total of 120 slugs (240 character-positions).

In the illustrations below, the characters are depicted as printed out. Where multiple arrays are shown, only the differences from the previous array are indicated.

Standard Chains: For 1403 models 2 and 7, and 1404 model 2: Arrangements AN and HN consist of 5 identical arrays of 24 slugs each. Only the first array is illustrated for each.

AN - 1st Array 12 34 56 78 90 /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH I+ . <

HN - 1st Array 12 34 56 78 90 = ' /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH I+ .)

OCR Chains: For 1403 models 2 and 7: Arrangements OAA, OAB, ODA and ONA consist of 5 identical arrays of 24 slugs each. Only the first array is illustrated for each.

Note: See "Printing for Optical Character Reading" and "OCR Fonts" on page TC 71.2. When a 1403 model 2 with Universal Character Set Feature (#8641) or Multiple Character Set Feature (#5110) is used with the ONA arrangement, or OAA arrangement with JYH graphics, it is recommended that the JYH be coded as described under "OCR Fonts" on page TC 71.2. The Universal Character Set or Multiple Character Set is a prerequisite for the OAB arrangement on the 1403.

OAA - 1st Array 12 34 56 78 90 #0 /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH I+ . <

OAB - 1st Array 12 34 56 78 90 = ' /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH I+ . <

ODA - 1st Array 12 34 56 78 90 #0 /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH I+ . <

ONA - 1st Array 12 34 56 78 90 #0 /S TU VW XY Z , . % JK LM NO PQ R- \$* ABCD EFGH IY . J

Universal Character Set Chains:

For 1403 model 2 only: Universal Character Set Chain arrangements vary as follows:

GN (ASCII - 63 graphics): Consists of 4 arrays of 30 slugs each. The first and third arrays are identical, as are the second and fourth, as illustrated below.

GN - 1st Array 12 34 56 78 90 XY /S TU VW | : " , = JK LM NO PQ R- Z (AB CD EFGH I+ .) \$ % * & ' < ; - ' ? >

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Universal Character Set Chains (cont'd):

TN (Text Printing - 120 graphics): Consists of 4 arrays of 30 slugs each. The first and third arrays are identical, as are the second and fourth, as illustrated.

TN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
2nd Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -
3rd Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
4th Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -

XN (High Speed Alphanumeric - 40 graphics): Consists of 6 identical arrays of 20 slugs each. Only the first array is illustrated.

XN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
----------------	--

Multiple Character Set:

For use of UCS Chains on a 1403 model 2 with MCS Feature, see "Multiple Character Set" on page TC 71.2.

Print Trains: 1416 (1403 models 3 and N1): Print trains consist of multiple arrays of type slugs placed end to end, with 3 characters per slug. The number of slugs in an array, and the number of different characters (graphics) in that array, will vary depending upon the print arrangement selected. Each print train has a total of 80 slugs (240 character-positions).

In the train layouts illustrated below, the characters are depicted as printed out. Where multiple arrays are shown, only the differences from the previous array are indicated.

Standard Trains:

Arrangements AN and HN consist of 5 identical arrays of 16 slugs each. Only the first array is illustrated for each arrangement.

AN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
----------------	--

HN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
----------------	--

OCR Trains: For 1416 (1403 model 3 or N1): Arrangements OAA, OAB, ODA and ONA consist of 5 identical arrays of 16 slugs each. Only the first array is illustrated for each.

Note: See "Printing for Optical Character Reading" and "OCR Fonts" on page TC 71.2. When the Universal Character Set Feature or Multiple Character Set Feature is used with the ONA arrangement, or OAA arrangement with JYH graphics, it is recommended that the JYH graphics be coded as described under "OCR Fonts" on page TC 71.2. The UCS or MCS Feature is a prerequisite for the OAA or OAB arrangement on the 1416.

OAA - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
-----------------	--

OAB - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
-----------------	--

ODA - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
-----------------	--

ONA - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
-----------------	--

Universal Character Set Trains:

Universal Character Set arrangements vary as follows:

ALA (Library Printing - 162 graphics, 78 preferred): Consists of 4 arrays of 20 slugs each. The first and third arrays are identical, as are the second and fourth, except for the characters shown.

ALA - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
2nd Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -
3rd Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
4th Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -

GN (ASCII - 63 graphics): Consists of 4 arrays of 20 slugs each. The first and third arrays are identical, as are the second and fourth, as illustrated below.

GN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
2nd Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -
3rd Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
4th Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -

PCS-AN and PCS-HN (48 graphics, 3-level preferred set): Arrangements PCS-AN and PCS-HN consist of 4 arrays of 20 slugs each. The first and third arrays are identical, as are the second and fourth, as illustrated below.

PCS-AN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
2nd Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -
3rd Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
4th Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -

PCS-HN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
2nd Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -
3rd Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
4th Array	op q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 - . : ; < = > [\] ^ _ ` { } ~ -

PN (PL/1 - 60 graphics): Consists of 4 identical arrays of 20 slugs each. Only the first array is illustrated.

PN - 1st Array	1234567890-./STUVWXYZ, #EJ KLMNO PQR-":AB CDEFGHI+8b c d e f g h i j k l m n
----------------	--

TYPE CATALOG

1403 and 1404 Printers— System/360, System/370, 4300 Processors (cont'd)

Universal Character Set Trains (cont'd)

QNC (PL/1 - 60 graphics, 45 commercially preferred): Consists of 5 arrays of 16 slugs each. Except for one slug in each array, the 5 arrays are identical.

[illegible]

QN (PL/1 - 60 graphics, 45 scientifically preferred): Consists of 5 arrays of 16 slugs each. Except for one slug in each array, the 5 arrays are identical.

4th Array	opqrstu vwxyz @'?: ;!\$%&'()*^_~`{ }~	01234567890-+10(){}<>=&[]\ '"/~.- -

YN (High Speed Alphameric - 42 graphics, 39 preferred): Consists of 4 arrays of 13 slugs each plus 2 arrays of 14 slugs each. The 13 slugs of the first, third, fourth and sixth arrays are identical. Except for the additional slug in the last position of the second and fifth arrays, the first 13 slugs are identical to those of the other arrays.

[illegible]

Multiple Character Set: For use of UCS trains on a 1403 model N1 with MCS Feature, see "Multiple Character Set" on page TC 71.2.

TYPE CATALOG

1403 AND 1404 PRINTERS— OTHER THAN SYSTEM/360

Alphanumeric Chain (1403 models 1, 2, 4, 5 and 6, and 1404 model 2): A standard alphanumeric chain consists of five identical arrays of 24 type slugs (2 characters each) as illustrated below for Print Arrangement A. Only the first array is shown and indicates the 48 graphics included in the arrangement. Where a particular slug has characters other than those of Arrangement A, the differences are shown and identified as another Arrangement (B, C, etc.). For card and BCD bit codes associated with the special characters, see the chart to the right.

Character Position Numbers are assigned as follows for the five arrays in Arrangements A thru K:

1st array: 1-48 4th array: 145-192
2nd array: 49-96 5th array: 193-240
3rd array: 97-144

Numeric Chain (1403 models 1 and 2 only): A standard numeric chain consists of 15 identical arrays of 8 type slugs (2 characters each) as illustrated below. Only the first array is shown and indicates the 16 graphics included. Card and BCD bit codes associated with the special characters are the same as those shown for Arrangement A in the chart to the right.

Character Position Numbers are assigned as follows for the 15 arrays of the numeric chain:

1st array: 1-16 4th array: 49-64 7th array: 97-112 10th array: 145-160 13th array: 193-208
2nd array: 17-32 5th array: 65-80 8th array: 113-128 11th array: 161-176 14th array: 209-224
3rd array: 33-48 6th array: 81-96 9th array: 129-144 12th array: 177-192 15th array: 225-240

Alphanumeric Train (1416 used on 1403 model 3): A standard alphanumeric train consists of five identical arrays of 16 type slugs (3 characters each) as illustrated below for Print Arrangement A. Only the first array is shown and indicates the 48 graphics included in the arrangement. Where Arrangement H differs from A, the substituted characters are shown. Card and BCD bit codes for special characters are shown in the chart above.

Character Position Numbers assigned are the same as those listed above for the Alphameric Chain, 1-48, 49-96, etc.

Preferred Character Set -- 1420/1440/1460 Systems: For 1416 used on 1403 model 3 equipped with Preferred Character Set Feature (#5523).
Card and BCD bit codes for special characters are the same as shown in the above chart for Arrangements A and H. The train consists of the following:

48 graphics -- 3-level preferred set

Characters of primary preference appearing 8 times
 Characters of secondary preference appearing 4 times
 Characters of least preference appearing twice

The 48 different graphics (combinations of 3 per slug) are arranged in 4 arrays of 20 slugs each, as illustrated below. Graphics are shown in the 2nd, 3rd and 4th arrays only where the slugs differ from those of the preceding array. The 1st and 3rd arrays are identical, as are the 2nd and 4th, as illustrated.

Character Position Numbers are assigned as follows for the 4 arrays:

1st array: 1-60 2nd array: 61-120 3rd array: 121-180 4th array: 181-240

Chain/Train Layouts: In all of the following illustrations, the characters (graphics) are depicted as printed out.

1403 and 1404 Printers— Other than System/360 (cont'd)

Print Chain/Train

Arrangements: Print arrangements are assigned an alphabetic designation (A, B, C, etc.). The type size (or style) is denoted by a numeric suffix (A2, B3, J4, etc.) with 2 = .095" type size; 3 = .079" type size; and 4 = 1428 Type Style. Based on this coding, print chains/trains are assigned Feature #s as indicated below for each arrangement.

	System	Printer	Standard Type Style		Alternate Type Style		1428 Type Style		Reference
			.095"	Feature #	.079"	Feature #	OCR	Feature #	
CHAIN PRINTERS	1401	1403 models 1, 2, 4 5 and 6, and 1404 model 2	A2	9601	A3	9581	A4	9591	Notes 1,2,3,4

	1460								

Chain and Train Printers: Notes:

- Any H arrangement listed has FORTRAN and COBOL capabilities.
- Alternate Type Style (.079" high) arrangements A3 thru K3 can be used to print between punched holes on a card document and at a vertical spacing of 8 lines per inch rather than the conventional 6 lines per inch with .095" type. This permits 25 lines of printing on a standard punched card as opposed to 19 lines at 6 lines per inch. (Note: On train printer, only arrangements A3 and H3 are available.)

Because of the greater type face density of the .079" type, ribbon life will be reduced when printing on continuous paper forms. This reduction will vary depending upon weight of paper, number of carbon copies, etc. There is little difference in ribbon life when printing on card documents.

Chain Printers:

- Any arrangement can be ordered for either a fixed cartridge or interchangeable cartridge. See Interchangeable Chain Cartridge Adapter (#4740) in 1403 "Machines."

On 1403s, any arrangement (A2-K2, A3-K3) can be equipped with an enlarged dash (in lieu of the standard dash) to print on continuous forms which will subsequently be separated into individual sheets for optical reading by a 1230 Optical Mark Scoring Reader (test answer sheets), 1231/1232 Optical Mark Page Reader (data sheets), or 3881 Optical Mark Reader.

1282 Optical Reader Card Punch: Arrangement J4 (#9599) can be used on all models of the 1403, or a 1404, to prepare documents for 1282 optical reading. Only numeric characters 0-9 and special characters - and + can be optically recognized by the 1282... remaining special characters cannot.

1287 Optical Reader: Arrangements A4 (#9591) and J4 (#9599) can be used on all models of the 1403 to prepare documents for 1287 reading. Only numeric characters 0-9 and alphabetic characters C, N, S, T, X, and Z can be recognized by the 1287... other alphabetic or special characters in these arrangements cannot.

1418 Optical Character Reader: The following arrangements can be used on all models of the 1403 to prepare documents for 1418 optical character reading: A2 (#9601), B2 (#9602), C2 (#9603), D2 (#9604), G2 (#9607), and J2 (#9609). Only numeric characters 0-9 and special characters - and + can be optically recognized by the 1418... remaining special characters cannot.

1428 Alphameric Optical Reader: Arrangement A4 (#9591) can be used on all models of the 1403 to prepare documents for 1428 reading. In addition to the alphabetic and numeric characters (A-Z and 0-9), special characters \$, -, *, / can be optically recognized... remaining special characters cannot.

- A Numerical Chain (#9484 for .079" type size; #9485 for .095") is available for 1403 models 1 and 2 only. In addition to numeric characters (0-9), it contains I, -, *, and \$ as special characters.

Prerequisites: Interchangeable Chain Cartridge Adapter (#4740) and Numerical Print Feature (#5381) on the 1403, plus Numerical Print Control (#5380) on the 1401 Processing Unit, 1414 I/O Synchronizer (model 3, 4 or 8), 1446 Printer Control, 1461 I/O Control or 1462 Printer Control. See 1403 in "Machines."

Train Printers:

- Alternate Type Style (.079" high) arrangements PCS-A3 and PCS-H3 can be used to print between punched holes on a card document. See Note (2), above, for additional information and limitations.

- The following arrangements can be used to prepare documents for optical reading: A2 (#9611) for 1418 Optical Character Reader, A4 (#9591) for 1428 Alphameric Optical Reader and 1287 Optical Reader, and J4 (#9599) for 1282 Optical Reader Card Punch and 1287 Optical Reader.

Arrangement A2, H2, A3 or H3 can be equipped with an enlarged dash (in lieu of the standard dash) to print on continuous forms which will subsequently be separated into individual sheets for optical reading by a 1230 Optical Mark Scoring Reader (test answer sheets), 1231/1232 Optical Mark Page Reader (data sheets), or 3881 Optical Mark Reader.

- Preferred Character Set Feature (#5523) on the 1403 and Preferred Character Set Adapter (#5524) on the printer control unit are prerequisites. See Preferred Character Set Feature in 1403 "Machines."

- The 1403 model 3 requires a separate 1416 Interchangeable Train Cartridge for each different printing arrangement. See 1416 in "Machines."

For "Specify" see next page.

1403 and 1404 Printers— Other than System/360 (cont'd)

Specify: For plant installation --

- [1] Based on printer being ordered, type style desired and system with which printer will be used, specify one Feature # from the above chart... if Interchangeable Chain Cartridge Adapter (#4740) is ordered, specify two Feature #s unless Numerical Print Feature (#5381) is also being ordered for 1403 model 1 or 2. With Numerical Print Feature, specify only one alphanumeric chain Feature # plus one Numeric Chain Feature # (see Note 4 above for Feature # and prerequisites). **Important:** Print Arrangement for 1403 model 3 must be specified on the 1416. If a PCS Arrangement is to be ordered for the 1416, see Notes 7 and 8 above for prerequisites.
- [2] If desired, #9140 for enlarged dash (character No. 732464) in lieu of standard dash for printing on documents to be read by 1230, 1231, 1232 or 3881 optical mark readers. For 1403, see second paragraph of Note 3; for 1416, see second paragraph of Note 6.
- [3] If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except A4 and J4.
- [4] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except A4 and J4.

Specify: For field installation --

- [1] If a new or additional print chain is desired, see "New Print Chains" below. For new or additional print trains for 1403 model 3, see 1416 Interchangeable Train Cartridge in "Machines." For field installation of #9140, #9549 or #9676, see the "Specify" section under "Substitute Characters."

New Print Chains: Additional, spare or replacement chains are available for either fixed or interchangeable cartridges used on the 1403 model 1, 2, 4, 5 or 6, and 1404 model 2.

	Feature #	Rental	Purchase	MMMC	FIC
Any one arrangement, chain only	5532	\$1,380SUC	\$1,335	NC	\$51

Note: If both chains supplied with Interchangeable Chain Cartridge Adapter (#4740) are to be changed, prices apply to each chain. If more than two interchangeable cartridges with chains are desired for a machine, or interchangeability with more than one machine is desired, consult Regional Special Equipment Engineering Department.

Specify: [1] #5532 at price indicated above.

- [2] One Feature # for print arrangement desired... see "Print Chain/Train Arrangements" on previous page.
- [3] If desired, #9140 for enlarged dash in lieu of standard dash for printing on documents to be read by 1230, 1231, 1232 or 3881 optical mark readers... available in any arrangement A2-K2 or A3-K3.
- [4] If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except A4 and J4.
- [5] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except A4 and J4.

Substitute

Characters: Whenever possible, a standard print arrangement should be specified. For available standard arrangements, see previous page. It is not feasible to make actual printing tests on non-standard characters. Therefore, printing and ribbon life from chains/trains with non-standard characters may be less satisfactory than results from a standard chain/train. It should also be noted that because of limitations of type face area (height, width, etc.), characters of the customer's design are subject to acceptance by the plant.

A substitute character is one which is ordered to displace a character in one of the standard arrangements. Standard characters may be rearranged, special characters may be selected from the type catalog, or characters of the customer's design may be substituted, subject to the above limitations.

Note: A substitute character assumes the card and bit codes of the character it replaces in the system to which the printer is attached.

Character substitutions may be ordered for plant or field installation on a print chain/train, subject to the following:

Artwork (#9950): A Service Charge will be made for designing a new character. Any character illustrated elsewhere in this section for the 1403, 1404, 1443, or 1445, or any character previously designed for these machines (except for "Limitations" below), may be substituted in any position of any type slug without charge for artwork.

Limitations: [1] The ABA E-13B type font can only be used on the 1445... [2] Characters from the SN5 and TN5 arrangements of the 1403 Printer (System/360) cannot be substituted in print arrangements used in other systems.

Matrix (#9951 and #9953): Each print chain type slug (1403 models 1, 2, 4, 5 and 6, and 1404) consists of two characters and requires one matrix (#9951). A Service Charge will be made for the matrix unless an identical 2-character matrix (same characters, in same positions) exists at the plant. This charge is in addition to that for Artwork.

Each print train type slug (for 1416 used on 1403 model 3) consists of three characters and requires one matrix (#9953). A Service Charge will be made for the matrix unless an identical 3-character matrix (same characters, in same positions) exists at the plant. This charge is in addition to that for Artwork.

Set-Up (#9952 for 1403 models 1, 2, 4, 5 and 6, and 1404... #9954 for 1416 used on 1403 model 3): In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a set-up is required to fabricate a special type slug. This charge is the same regardless of the quantity of identical slugs made at any one time. On re-orders of identical slugs, the set-up charge again applies.

Service Charges for Artwork, Matrix and Set-Up should be authorized on all orders for non-standard characters. The charge for Artwork need not be specified when character numbers from the illustrated catalog are ordered indicating that artwork is available. The plant will review all orders to determine if Artwork and Matrix are required. The Service Charges (even though authorized) will not be billed unless applicable.

1403 and 1404	Feature #	Service Charge	1416 (for 1403 model 3)	Feature #	Service Charge
Artwork, per character	9950	\$ 152	Artwork, per character	9950	\$ 152
Matrix, per slug (2 characters)	9951	229	Matrix, per slug (3 characters)	9953	229
Set-Up, for 2-character slug	9952	77	Set-Up, for 3-character slug	9954	77

Plant installation (original assembly of chain/train): Any standard type slug (size, font) can be specified in any desired arrangement at no extra charge. See page 31 for standard slug configurations in each print arrangement. Page 31 also lists the Character Position Numbers assigned to the graphics in each array of a chain/train. These should be used as a reference when making character substitutions since they coincide with the designations on the Type Specification Sheet (120-1089).

Multiple Machine Orders (identical type specs - plant installation): On a multiple machine order, the Service Charges for Artwork, Matrix and Set-Up apply only to the first machine.

Submit a separate Type Specification Sheet for each machine on a multiple machine order. Show Service Charges for Artwork, Matrix and Set-Up on one DPOW/IAC and its attached Type Specification Sheet, and indicate Feature #9695 (Special Type -- Multiple Machine Order) at no charge on all other DPOWs/IACs and their Type Specification Sheets. On the DPOW/IAC with Service Charges, cross reference all other Branch Office Order Numbers (Plant Order Numbers) to which the charges apply. On the DPOWs/IACs with "No Charge" Service Charges, indicate the Branch Office Order Number which specifies the charges. **Note:** This cross reference of order numbers is mandatory.

If an additional machine with identical type specs is ordered prior to shipment of a machine which carries the Service Charges, specify #9695 on the DPOW, reference the Plant Order Number which carries the Service Charges, and attach a Type Specification Sheet. (When the order is entered after shipment of the machine carrying the Service Charges, the Set-Up charge will apply.)

If a machine with #9695 specified at no charge is shipped before the machine specifying the Service Charges, the plant will transfer the charges to the machine which is shipped first and substitute "No Charge" on the other one.

For "Specify" see next page.

1403 and 1404 Printers— Other than System/360 (cont'd)

Substitute Characters: (cont'd)

Specify: [1] Feature # of print arrangement which most closely resembles that desired by the customer.

[2] Feature #s and charges for Artwork, Matrix and Set-Up.

[3] Type Specification Sheet (120-1089) must accompany each order for substitute characters. Once a Type Specification Sheet has been submitted and additional characters are desired, a new Type Specification Sheet is required. It must include all characters desired... those previously ordered and the new ones.

Field Installation: The prices shown below apply to installation of standard type slugs (see page 31) or special type slugs (to which charges for Artwork, Matrix and Set-Up are to be added if applicable).

Print chains/trains are made up of a number of identical arrays of type slugs as described on page 31. When a modification is made to a slug in one array, corresponding type slugs must be changed in all identical arrays. The prices below apply to special chains with other than 5 or 15 identical arrays and special print trains with other than 5 identical arrays.

Type Slug Substitutions (on any one chain or train):	Feature #	Rental	Purchase	FIC	FIT
1403 model 1, 2, 4, 5 or 6, or 1404 model 2					
First type slug	8371	\$18 SU	\$ 8	\$11	.9 hour
Each additional slug, at same time	8372	10 SU	8	2	.1 hour
1416 (1403 model 3)					
First type slug	8373	29 SU	24	5	.5 hour
Each additional slug, at same time	8374	24 SU	24	NC	

Specify: [1] Feature # of installed chain/train which is to be modified.

[2] Applicable Feature #s and charges for Artwork, Matrix and Set-Up.

[3] Feature #s and charges for type slug substitutions. Type slugs (#8371 and #8372, or #8373 and #8374) may be ordered on MES with Type Specification Sheet (120-1089) attached for any of the following:

	Type Catalog Character Number
.095" Type Size	.079" Type Size
Enlarged dash in lieu of standard dash (Arrangements A2-K2, A3-K3 only)	732464 732464
Round alphabetic "O" in lieu of standard squared "O" (Any arrangement except A4 and J4)	251839 475504
Slashed zero in lieu of standard zero (Any arrangement except A4 and J4).	474129 475539

[4] Type Specification Sheet (120-1089) must accompany each order for substitute characters.

Note: If a new or additional print chain is desired for field installation, see "New Print Chains" on one of the previous pages. For new or additional print trains, see 1416 in "Machines."

Examples of Charges for Substitute Characters

1403 models 1, 2, 4, 5 and 6, and 1404 model 2

Example I: A rental customer desires a new character ϕ in place of % on an installed machine which is equipped with an alphameric chain (#9601).

Services Required: Artwork (#9950), one new character	\$ 152 Service Charge
Matrix (#9951), one 2-character slug ϕ ϕ	229 " "
Set-Up (#9952), to make 5 identical slugs	77 " "
Field modification of installed alphameric chain (5 identical arrays)	
Type Slug Substitutions	
First Type Slug (#8371)	18 Single Use-Charge
Four additional slugs (#8372) at \$10 each	40 " "
Total Charge is \$458 Service Charge + \$58 SUC =	\$516

A purchase customer making these same changes would pay the \$458 Service Charge plus \$40 Purchase Price for slug substitutions (1 slug at \$8, and 4 additional slugs at \$8 each) plus \$19 FIC (1 slug at \$11, and 4 additional slugs at \$2 each), total \$517.

Example II: A customer (rental or purchase) on initial order for a machine with an alphameric chain (#9601) wants the ϕ slug reversed to ϕ .

Alphameric Chain (#9601) - to be plant installed	NC
Services Required: Artwork (#9950), both are standard characters	NC
Matrix (#9951), one 2-character slug ϕ ϕ	\$229 Service Charge
Set-Up (#9952), to make 5 identical slugs	77
Total Charge =	\$306 Service Charge

Example III: A purchase customer desires ϕ and ϕ (2 new characters) field installed on a numeric chain (#9485) in place of the standard \$ and X respectively. Two different type slugs are involved... see "Numeric Chain Layout" on page 31.

	Service Charge	Purchase Price	FIC
Services Required: Artwork (#9950), one new character ϕ	\$ 152	-	-
(Note: ϕ is character No. 859567)	NC	-	-
Matrix (#9951), ϕ ϕ and ϕ ϕ (2 matrices, \$229 each)	458	-	-
Set-Up (#9952), for two different slugs, \$77 each	154	-	-
Field Installation -- Type Slug Substitutions			
First type slug (#8371)	-	\$ 8	\$ 11
Each additional type slug (#8372):			
14 slugs ϕ ϕ 29 slugs, each \$8 + \$2 FIC	-	232	58
15 slugs ϕ ϕ			
Total Charge (Service Charge + Purchase Price + FIC) =	\$ 764	\$ 240	\$ 69

A rental customer making these same changes would pay the \$764 Service Charge plus \$308 Single Use-Charge for slug substitutions (1 slug at \$18, and 29 additional slugs at \$10 each), total \$1,072.

Examples continued on next page.

1403 and 1404 Printers— Other than System/360 (cont'd)

Substitute
Characters: Examples of Charges for Substitute Characters (cont'd)
(cont'd)

1416 (used on 1403 model 3)

Example I: A rental customer desires a new character ϕ in place of % on an installed train (#9611).

Services Required: Artwork (#9950), one new character ϕ	\$ 152	Service Charge
Matrix (#9953), one 3-character slug ϕ, ϕ, ϕ	229	" "
Set-Up (#9954), to make 5 identical slugs	77	" "
Field modification of installed train (5 identical arrays)		
Type Slug Substitutions		
First type slug (#8373)	29	Single Use-Charge
Four additional slugs (#8374) at \$24 each	96	" "
Total Charge is \$458 Service Charge + \$125 SU = \$ 583		

A purchase customer making these same changes would pay the \$458 Service Charge plus \$120 Purchase Price for slug substitution (1 slug at \$24, and 4 additional slugs at \$24 each) plus \$5 FIC (1 slug at \$5, and 4 additional slugs at no charge each), total \$583.

Example II: A customer (rental or purchase) on initial order for a machine with train Arrangement A (#9611) wants the positions of the # and @ interchanged.

Alphameric Train (#9611) - to be plant installed	NC
Services Required: Artwork (#9950), both characters are standard	NC
Matrix (#9953), one 3-character slug $\phi @ \phi$	\$ 229
Set-Up (#9954), to make 5 identical slugs	77
Total Charge = \$ 306 Service Charge	

Example III: A purchase customer desires ϕ and ϕ (2 new characters) field installed on train #9611 in place of the standard \$ and II respectively. Two different type slugs are involved ... see "Alphameric Train Layouts" on page 31.

	Service Charge	Purchase Price	FIC
Services Required: Artwork (#9950), one new character ϕ	\$ 152	-	-
(Note: ϕ is character No. 859567)	NC	-	-
Matrix (#9953), ϕ, ϕ, ϕ and ϕ, ϕ, ϕ (2 matrices, \$229 each	458	-	-
Set-Up (#9954), for two different slugs at \$77 each	154	-	-
Field modification of installed train (5 identical arrays)			
Type Slug Substitutions			
First type slug (#8373)	-	\$ 24	\$ 5
Each additional type slug (#8374)			
4 slugs ϕ, ϕ, ϕ, ϕ 9 slugs, \$24 each . . .	-	216	NC
5 slugs $\phi, \phi, \phi, \phi, \phi$			
Total Charge (Service Charge + Purchase Price + FIC) = \$ 764 + \$240 + \$ 5 = \$1,009			

A rental customer making these same changes would pay the \$764 Service Charge plus \$245 Single Use -Charge for slug substitutions (1 slug at \$29, and 9 additional slugs at \$24 each), total \$1,009.

1403 PRINTER— SYSTEM/3 MODELS 10, 12, AND 15

Attachment of a 1403 Printer to System/3 Model 10, 12 or 15 is via the 5421 Printer Control Unit ... For System/3 Model 10 -- a 1403 model 2 or N1 ... For System/3 Model 12 or 15 -- a 1403 model 2, 5, or N1. See 1403 Machine page for prerequisites. Available chain/train arrangements are listed in the table below.

Standard Type Style		Alternate Type Style		1428 Type Style		OCR-A Applications		OCR-B Applications		Text Type Style	
.095"	Feature #	.079"	Feature #	OCR	Feature #	Size 1	Feature #	Size 1	Feature #	Text Pnt.	Feature #
AN2	9612	AN3	9613	AN4	9621	OAA	9710	OAB	9713	TN5	9635
HN2	9614	HN3	9615			ODA	9701				
GN2	9721	GN3	9720			ONA	9702				
PCS-AN2	9562	PCS-AN3	9622								
PCS-HN2	9564	PCS-HN3	9624								
PN2	9631	PN3	9641								
XN2 *	9636	XN3 *	9646								
YN2 **	9637	YN3 **	9647								

*1403 model 2 or 5 only.

**1416 (1403 model N1 only).

Note: 1403 model 2 or 5 requires Universal Character Set Feature (#8641) and Interchangeable Chain Cartridge Adapter (#4740) for all arrangements except AN, HN, OAA, OAB, ODA and ONA. 1403 model N1 requires Universal Character Set Feature (#8640) for all arrangements except AN, HN, ODA and ONA.

For printing speeds, see chart below. For chain and train layouts, and other information regarding these arrangements, see pages TC 1403 (References to 1403 Model 2 also apply to Model 5)

- Specify: [1] For 1403 model 2, one Feature # for desired print chain arrangement unless Interchangeable Chain Cartridge Adapter (#4740) is ordered... with #4740, specify two Feature #s.

For 1416 (1403 model N1), one Feature # for desired print train arrangement.

- [2] If desired, #9140 for enlarged dash (Character No. 732464) in lieu of standard dash for printing on documents to be read by optical mark readers. Available as substitution in all arrangements except OAA, OAB, AN4, PCS-AN, PCS-HN, TN, XN, YN.
- [3] If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except AN4, OAA, ODA, ONA and TN5.
- [4] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except AN4, OAA, ODA, ONA and TN5.
- [5] If desired, #9722 for ! (exclamation point) in lieu of | (logical OR) in GN arrangement.
- [6] If desired, #9723 for ^ (circumflex) in lieu of ~ (logical NOT) in GN arrangement.
- [7] Character sets of the 1403 Printer are similar to those of the 5203 Printer. If the 5203 LC arrangement is desired on the 1403 or 1416, order AN2 (#9612) or AN3 (#9613) and specify #9719 for ' (apostrophe) in lieu of II (lozenge).
- [8] If desired, #9728 for - (timing mark dash) in lieu of * in OAA arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order Character No. 2642392 in Train Slug No. 2642393 or Chain Slug No. 2633870.
- [9] If desired, #9729 for > (timing mark dash) in lieu of > in OAB arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order Character No. 1798438 in Train Slug No. 1798437 or Chain Slug No. 2645792.
- [10] If desired #9690 for non-standard Type Arrangement. See "Substitute Characters" on page TC 1403/1404

The chart below shows 96-column card codes and EBCDIC bit codes assigned to special characters included in all print arrangements except TN. For TN graphics and their associated card and bit codes, see 1403 SRL (GA24-3073). PCS-AN and PCS-HN are not listed in the chart below since they contain special characters identical to those of the AN and HN arrangements, respectively.

96-column Card Code	EBCDIC Bit Code 0123 4567	Arrangements and Number of Graphics								
		AN, ODA (43)	ONA (48)	OAA (48)	OAB (48)	HN (48)	PN (60)	XN(40) (1403-2)	YN(42) (1416)	GN (63)

YN (High Speed Alphameric)	42 graphics, 39 preferred	----	----	1250/560

TYPE CATALOG

ILLUSTRATED TYPE CATALOG - 1403, 1404, 1443**IMPORTANT:**

The characters illustrated on the following pages do not necessarily represent the final appearance of the printed characters in every detail. This is because they are made from drawings (original artwork) of the characters and not from actual print samples. Dimensions shown are approximate and are not the final dimensions of the printed characters. Final dimensions will be somewhat larger and they will vary depending upon the characteristics of the ribbon and paper used.

The reproductions are approximately five times actual type size. Each character is assigned a "character number" which appears directly below its illustration.

Illustrated Type Catalog - 1403, 1404, 1443 (cont'd)

1403, 1404, 1443 -- .095" Type Size

For the 1403, 1404 and 1443, IBM furnished two effective character heights, .095" and .079". Certain characters will vary slightly from these effective character heights in order to maintain proper printing appearance.

For the 1403 (all models) and 1404, the characters illustrated below are listed as "Standard Type Style" ... on the 1443 it is commonly referred to as .095" Type Size. All alphabetic and special characters of Arrangements A-K are shown. For those included in any specific arrangement, see "Special Character Arrangements" under 1403, 1404 or 1443 elsewhere in this section. Note: All special characters in the 52- and 63-character sets of the 1443 are not shown ... they will be included in a subsequent revision.

△	▽	◇	○	●	◐	◑	◒	◓	◔	◕	◖	◗	◘	◙	◚

Illustrated Type Catalog - 1403, 1404, 1443 (cont'd)

Arrangement J is required on a 1403 model 1, 2, 4 or 5, or 1404 model 2, if printed output is to be optically recognized by a 1282 Optical Reader Card Punch. Arrangement J is identical to Arrangement A except for a + in lieu of the &. The character number for the + is 251879 (illustrated on the page of .095" Type Size). The 1282 will optically recognize only numeric characters 0-9 and special characters - and +.

This technical drawing presents a 10x10 grid of characters and symbols, each rendered in a bold, sans-serif font. The characters are arranged in two rows of five columns each. The first row contains the letters A through Z, and the second row contains the numbers 0 through 9, followed by various punctuation marks and symbols. Each character is accompanied by a unique alphanumeric code, typically a 10-digit number, positioned to its right. The grid is overlaid on a fine grid paper with horizontal and vertical dimensions marked. The horizontal dimensions are marked at the top and bottom of the grid, and the vertical dimensions are marked on the left and right sides. The characters are rendered in a bold, sans-serif font, and the grid is composed of 10 columns and 10 rows.

1403, 1404, 1443 -- Nonstandard Characters

approximately five times actual type size. Each character is assigned a "character number" which appears directly below its illustration.

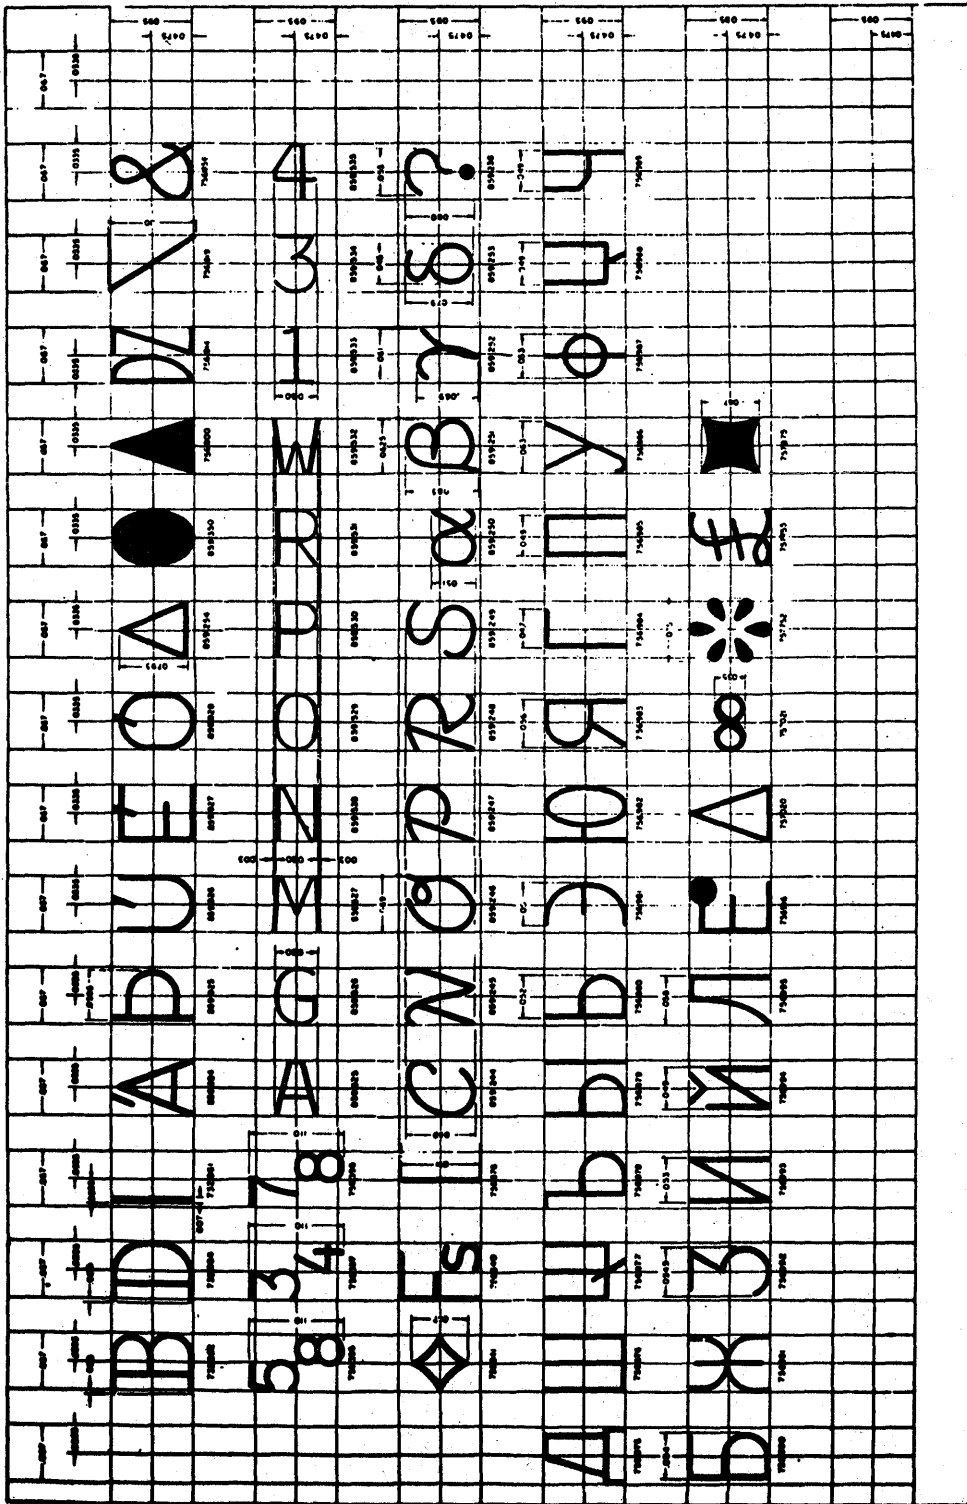

When the configuration of a character exceeds the normal over-all dimensions of .067" wide and .095" high, or where lines are close together, the characters may not print with regular acceptable clarity.

For 1403 (models 1, 2, 4 and 5) and 1404, 2-character matrices are available for many combinations of the characters illustrated. Matrices are also available where one of these characters has been paired with a standard character.

1443 PRINTER MODELS 1 AND 2—
OTHER THAN SYSTEM/360

One of the 52-character sets indicated in the charts below is standard on the 1443 models 1 and 2. Special characters with their corresponding card codes and BCD bit codes are shown for all character sets.

For 1240/1440 Systems, where two characters are shown under the 52-character set, the one on the left is for Arrangement A, the other for H.

1240/1440 Data Processing System

Graphics normally associated with the BCD code are those shown under the 63-character set.

Card Code	BCD Code	13	39	52		63
				A	H	
12-8-3	B A 8 2 1
12-8-4	C B A 8 4			Π)	Π
12-8-5	B A 8 4 1					l
12-8-6	B A 8 4 2					<

12-0	C B A 8 2			?	?	?
11-0	B 8 2			!	!	!
0-8-2	A 8 2			≠	≠	≠

On an initial order, the 63-character set may be specified at no charge in lieu of the 52-character set, if Selective Character Set (#6401) is ordered. The Feature #s indicated to the right apply to plant installation. →

System	Print Arrangements - Feature #s					
	52-Character Sets				63-Character Sets	
	A	H	K	—	A	—
1240/1440	9601	9608			9600	

Specify: From the above chart, for plant installation

- [1] For 1240/1440, one Feature# for standard 52-character set unless Selective Character Set (#6401) is ordered and the 63-character set is desired in lieu of the 52-character set.
- [2] Type Size -- #9731 for .079", or #9733 for .095".
- [3] If desired, #9140 for enlarged dash (character No. 830704) in lieu of standard dash. Used for printing on documents to be read by 1230, 1231, 1232 or 3881 optical mark readers. Available as substitution in either 52- or 63-character set.
- [4] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in 39-, 52- or 63-character set.
- [5] If desired, #9549 for slashed zero in lieu of standard zero in any character set.

Major Revision

1443 Printer Models 1 and 2— Other than System/360 (cont'd)

Character Sets: Type bars are available with 13-, 39-, 52- and 63-character sets as indicated below. All sets are alphameric except the 13-character set which is numeric only. The format of standard segments included in each character set is illustrated. The quantity of identical segments included in a 120 print position type bar is also shown... for 144 print positions (circled items below), see Note (2) below.

Standard Segment Formats - 1240/1440

Segment Number	Character Position Number													Character Sets				
	1	2	3	4	5	6	7	8	9	10	11	12	13	13(A)	39(A)	52(A)	52(H)	63(K)
1	1	2	3	4	5	6	7	8	9	0	.	*	-	(1)				
2	,	.	\$	1	A	J	2	S	B	K	3	T	C		5			
3	L	4	U	D	M	5	V	E	N	6	W	F	O		(4)	4	4	3
4	7	X	G	P	8	Y	H	Q	9	Z	I	R	0		4	(3)	(3)	3
5	6	-	1	/	A	J	2	S	B	K	3	T	C			4		(3)
6	*	?	!	#	,	.	\$	%	II	*	:	;	Δ			3		
7	+	-	1	/	A	J	2	S	B	K	3	T	C				4	4
8	*	?	!	#	,	.	\$	'	()	*	:	;			3		
9	*	?	!	#	,	.	\$	%	II	*	:	;	Δ					3
10	[]	>	<	;	Δ	*	#	Δ	*	:	;	Δ					3
11	*	?	!	#	,	.	\$	'	()	*	:	;				3	

Notes

- 1) For a machine with 144 print positions, add one segment to any figure circled for a 13-, 39-, 52- or 63-character set. For example, the 13-character set has eleven segments (all No. 1 or 81, depending on the system) for 120 print positions, but twelve such segments for 144 positions. The 39-character set has four No. 3 (or No. 83) segments for 120 positions, but five for 144 positions. Similar determinations can be made for the other character sets.
- 2) Zero appears in Position 10 of Segment No. 1 (or No. 81) and in Position No. 13 of Segment No. 4 (or No. 84).
- 3) Alphabetic "O" is in Position 13 of Segment No. 3 (or No. 83). It is squared slightly to distinguish it from numeric zero.
- 4) Positions 11 and 12 of Segment Nos. 10 and 88 are blank. These positions cannot be used for substitute characters.

Additional

Character Sets:

Character Set	1240/1440	Single Use-Charge	Purchase Price	MMMC	FIC
13	#1890	\$580	\$580	NC	NC
39	1891	660	660	NC	NC
52	1892	700	700	NC	NC
63	1893	740	740	NC	NC

- Specify: [1] From the above, Feature #(s) for additional character set(s) desired. **Note:** Selective Character Set (#6401) is prerequisite for all except 52-character sets (see 1443 in "Machines").
- [2] For 52-character set, #9601 for Arrangement A, or #9608 for Arrangement H.
- [3] #9495 for 120 print positions, or #9496 for 144 print positions (24 Additional Print Positions, #5559, is prerequisite for #9496).
- [4] Model of 1443 on which type bar(s) will be used, #9729 for model 1, or #9730 for model 2.
- [5] Type Size, #9731 for .079", or #9733 for .095".
- [6] If desired, #9140 for enlarged dash (character No. 830704) in lieu of standard dash. Used for printing on documents to be read by 1230, 1231, 1232 or 3881 optical mark readers. Available only as substitution in 52- and 63-character sets.
- [7] If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in 39-, 52- or 63-character set.
- [8] If desired, #9549 for slashed zero in lieu of standard zero in any character set.

Substitute Characters: A substitute character is one which is ordered to displace a character in one of the standard segments illustrated above. Note: A substitute character assumes the card and bit codes of the character it replaces in the system to which the printer is attached.

Substitute characters may be ordered subject to the following:

Artwork (#9950): A Service Charge will be made for designing a new character. Any character illustrated elsewhere in this section for the 1403, 1404, 1443, or 1445, or any character previously designed for these machines (except for "Limitations" below), may be substituted in any segment format without charge for artwork.

Limitations: [1] The ABA E-13B type font can only be used on the 1445... [2] Characters from the SN5 and TN5 arrangements of the 1403 Printer in System/360 cannot be used on the 1443.

Matrix (#9951): Each character requires a matrix. A Service Charge will be made for the matrix unless an identical matrix exists at the plant. This charge is in addition to that for Artwork. **Note:** 1445 matrices cannot be used to fabricate 1443 segments, or vice versa.

Set-Up (#9952): In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a set-up is required to fabricate a segment format other than those illustrated. This Service Charge is the same regardless of the quantity of identical segments made at any one time. On re-orders of identical segments, the set-up charge again applies.

Segment (#6404): Each character set consists of multiples of one or more segments. The quantity of identical segments in a character set is indicated in the charts under "Character Sets." In addition to applicable Service Charges above, a charge applies for each non-standard segment required to complete a character set... it applies only when an installed type bar is to be modified.

Note: When 24 Additional Print Positions (#5559) is installed, one additional segment is required in a character set. See Note (2) under "Character Sets" above... also see #5559 under 1443 in "Machines."

Service Charges for Artwork, Matrix and Set-Up should be authorized on all orders for non-standard characters. The charges for Artwork need not be specified when character numbers from the illustrated catalog are ordered indicating that artwork is available. The plant will review all orders to determine if Artwork and Matrix are required. The Service Charges (even though authorized) will not be billed unless applicable.

Description	Feature #	Service Charge	Single Use-Charge	Purchase Price	MMMC	FIC
Artwork, per character	9950	\$ 152	---	---	---	---
Matrix, per character	9951	229	---	---	---	---
Set-Up, for each different segment format	9952	138	---	---	---	---
Segment, each (field installation)	6404	---	\$ 43	\$ 40	NC	NC

1443 Printer Models 1 and 2— Other than System/360 (cont'd)

Substitute Characters: Multiple Machine Orders (identical type specs - plant installation): On a multiple machine order, the Service Charges for Artwork, Matrix and Set-up apply only to the first machine and are to be entered on AAS for that machine order only.

For additional machines with all specs identical (including type), enter quantity of machines and specify #9695 (Special Type - Multiple Machine Order) at no charge. Once Plant Order numbers are assigned, enter the following under "Remarks":

On first machine order, indicate that Service Charges for special type also cover all other Plant Order numbers:

Example: SVC CHGS FOR SPEC TYPE COVER
E12341 E12342 E12343 E12344
E12345

On each additional machine order, indicate Plant Order number (first machine) which carries Service Charges:

Example: SVC CHGS FOR SPEC TYPE ON
E12340

A separate Type Spec Sheet (Z120-0658) is required for each machine and must be sent to the plant with sufficient lead time for the manufacturing schedule.

The Type Spec Sheet for the first machine must include the Service Charges as entered on that machine order plus a transmittal (memo) listing the Plant Order numbers of all additional machines involved. The spec sheet for each additional machine must indicate the Plant Order number of the machine which carries the Service Charges. (This may be written in the money fields of the Spec Sheet as "Service Charges on P.O. (insert number)."

Note: This cross reference of Plant Order numbers is mandatory on machine orders and Type Spec Sheets.

If an additional machine with identical type specs is ordered prior to shipment of a machine which carries the Service Charges, specify #9695 on the AAS order, and indicate under "Remarks" the Plant Order number which carries the Service Charges. Send a Type Spec Sheet to the plant indicating the Plant Order number which carries the Service Charges. (When the order is entered after shipment of the machine carrying the Service Charges, the Set-up charge will apply.)

If a machine with #9695 specified at no charge is shipped before the machine specifying the Service Charges, the plant will transfer the charges to the machine which is shipped first and substitute "No Charge" on the other one.

- Specify:
- [1] 1443/2203 Type Specification Sheet (120-0658) must accompany each order for substitute characters. Once a Type Specification Sheet has been submitted and additional characters are desired, a new Type Specification Sheet is required. It must include all characters desired... those previously ordered and the new ones.
 - [2] Type Size, #9731 for .079" or #9733 for .095".
 - [3] Segments (#6404) may be ordered on MES with Type Specification Sheet attached for any of the following:

	Type Catalog Character Number	
	.095" Type Size	.079" Type Size
Enlarged Dash (in lieu of standard dash) in 52- or 63-character set . . .	830704	830704
Round alphabetic "O" in lieu of standard squared "O" in 39-, 52-, or 63-character set	251839	475504
Slashed zero in lieu of standard zero in any character set	474129	475539

Examples of Charges for Substitute Characters

New Additional Type Bar: A rental customer wants a new additional type bar with \mathcal{L} in lieu of @ in Arrangement A of the 52-character set for a 1443 model 1 with 120 print positions. The chart on the previous page indicates that this affects Position 8 of Segment No. 6. Charges are as follows:

Specifications

One 1443 Type Bar, 52-character set (#1892), Arrangement A (#9601) for 1443 model 1 (#9729) with 120 print positions (#9495), type size .095" (#9733)...	\$ 700 Single Use-Charge
Artwork (#9950) for one new character	152 Service Charge
Matrix (#9951) for this character	229 Service Charge
Set-Up (#9952) for Segment No. 6 with \mathcal{L} in lieu of @ in Position 8,	138 Service Charge

Total Charge is \$700 Single Use-Charge + \$519 Service Charge = \$1,219

Note: The Segment charge (#6404) does not apply since a complete type bar is being furnished with three special segments in lieu of the ones of standard Segment No. 6 format. For a customer owned machine, the same total charge would apply with a \$700 Purchase Price in lieu of the Single Use-Charge.

Installed Type Bar: A purchase customer orders a closing parenthesis ")" substituted for the ampersand "&" in a 63-character set of a 1443 model 2 with 120 print positions. The chart on one of the previous pages indicates that this affects Position 1 of Segment No. 5. Charges are as follows:

Specifications (Note: The ")" is an available character in Segment No. 8.)

Artwork (#9950)	No Charge
Matrix (#9951)	No Charge
Set-Up (#9952) for Segment No. 5 with ")" in lieu of "&" in Position 1	\$ 138 Service Charge
Three special segments (#6404), \$40 Purchase Price each, to replace corresponding quantity of Segment No. 5 in 63-character set type bar (#1893), of 1443 model 2 (#9730) with 120 print positions (#9495), type size .095" (#9733)	120 Purchase Price

Total Charge is 138 Service Charge + \$120 Purchase Price = \$ 258

Note: For a rental customer, the same total charge would apply with a \$120 Single Use-Charge in lieu of the Purchase Price.

For 144 print positions, one additional special segment would be required at an additional \$40 Purchase Price (Single Use-Charge for rental customer).

Change of Type Size: To change type size on an installed machine, attach 1443 Type Specification Sheet (120-0658) to MES ordering the required number of Segments (#6404).

1443 MODEL N1 PRINTER- SYSTEM/360, SYSTEM/370 2203 MODELS A1 AND A2 PRINTERS- SYSTEM/360

The 52-character set is standard on the 1443 model N1. On an initial machine order, the 63-character set may be specified at no charge in lieu of the 52-character set, if Selective Character Set (#6402) is ordered.

On the 2203 model A1 or A2, any one of the available character sets may be specified at no charge on initial machine order. See "Note" under Specify (1) below.

Special characters with their corresponding card codes and EBCDIC bit codes are shown for all character sets in the chart to the right. Graphics normally associated with the EBCDIC codes are those shown under the 63-character set.

Feature #s indicated below apply to plant installation only.

Character Set	1443 model N1	2203 model A1 and A2
13	--	#9086
39	--	9087
52	9088	9088
63	9089	9089

Specify: (1) For 1443 mdl N1 -- #9088 for 52-character set unless Selective Character Set (#6402) is ordered and the 63-character set is desired instead. For 2203 mdl A1 or A2 -- Any one Feature # indicated above.

Note: Programming Systems Diagnostics require an alphanumeric character set (#9087, 9088 or 9089) on the 2203. The 13-character set (#9086) should only be ordered if the installation will have another 2203 with an alphanumeric character set available for this purpose. It is recommended that the 13-character set be ordered as #1901 at the price indicated below.

(2) Type Size -- #9731 for .079", or #9733 for .095".

(3) If desired, #9140 for enlarged dash (Character No. 830704) in lieu of standard dash. Used for printing on documents to be read by 1230, 1231, 1232 and 3881 optical mark readers. Available as substitution in either 52- or 63-character set.

(4) If desired, #9549 for slashed zero in lieu of standard zero in any character set.

(5) If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in 39-, 52- or 63-character set.

Additional Character Sets: Type bars are available with 13-, 39-, 52- and 63-character sets as indicated below. All sets are alphanumeric except the 13-character set which is numeric only. Format of standard segments is illustrated and the quantity of identical segments in a 120 print position type bar is shown... for 144 print positions (circled items below), see Note (1).

Segment Number	Character Position Number												Character Sets			
	1	2	3	4	5	6	7	8	9	10	11	12	1443 & 2203 13	1443 39	2203 52	1443 63
51	*	-	0	1	2	3	4	5	6	7	8	9	①			
52	.	\$,	Q	A	J	1	B	K	S	2	C	L	5		
53	6	-	0	A	J	/	1	B	K	S	2	C	L		4	4
54	T	3	D	M	U	4	E	N	V	5	F	O	W	④	③	4
55	6	G	P	X	7	H	Q	Y	8	I	R	Z	9	4	3	③
56	.	\$,	*	II	*	%	@	()	=	'	+		4	3
57	c	l	:	.	\$,	*	@	*	%	@	(③
58)	-	'	+	>	=	l	-	?	*						3

Note: 1) For a machine with 144 print positions, add one segment to any figure circled above for a 13-, 39-, 52- or 63-character set. For example, the 13-character set has eleven segments (all No. 51) for 120 print positions, but twelve such segments for 144 positions. The 39-character set has four No. 54 segments for 120 positions, but five for 144 positions. Similar determinations can be made for the other character sets.

2) Zero appears in Position 4 of Segment No. 51, Position 4 of Segment No. 52, and in Position 3 of Segment No. 53.

3) Alphabetic "O" is in Position 12 of Segment No. 54. It is squared slightly to distinguish it from numeric zero.

4) Position 3 of Segment No. 57 and Positions 12 and 13 of Segment No. 58 are blank. These positions cannot be used for character substitutions.

Specify: (1) Feature #(s) for additional character set(s) desired. [Note: Selective Character Set (#6402) is prerequisite on 1443 model N1 for all except the 52-character set.]

(2) #9495 for 120 print positions, or #9496 for 144 print positions [24 Additional Print Positions (#5558) is prerequisite for #9496].

(3) Type Size, #9731 for .079" or #9733 for .095".

(4) If desired, #9140 for enlarged dash (Character No. 830704) in lieu of standard dash. Used for printing on documents to be read by 1230, 1231, 1232 or 3881 optical mark readers. Available only as substitution in 52- and 63-character sets.

(5) If desired, #9549 for slashed zero in lieu of standard zero in any character set.

(6) If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in 39-, 52- or 63-character set.

Substitute Characters:

Any character illustrated elsewhere in this section for the 1403, 1404, 1443, 1445 or 2203, or any character previously designed for these machines, may be substituted in any character position of any segment subject to conditions applicable to character substitutions in the section "Other Than System/360 - 1443 Printer Models 1 and 2".

Card Code	Bit Code	Character Sets			
		13	39	52	63
12-8-2	0100 1010				c

52	1903
63	1904

1445 PRINTER MODELS 1 AND N1— SYSTEM/360 AND OTHER SYSTEMS

A 56-character set which includes ABA characters is standard on the 1445 models 1 and N1. Type size is .095" high, except for the E-13B characters which conform to ABA Specifications. The chart to the right illustrates special characters furnished in the standard 56-character set plus those included in the optional 14- and 42-character sets.

Card and bit codes are shown for systems using the Standard BCD Interchange Code (BCD) and the Extended BCD Interchange Code (EBCD) of System/360. In addition to the graphics used on the 1445, the standard graphics assigned to the BCD and EB CD codes are shown for associative purposes. Where two graphics are shown under "Graphic Normally Associated with BCD Code," the one on the left is for Arrangement A, the other for H.

MICR Characters: Other than MICR numeric characters, the following are included in the 56-character set:

- Dash
- Amount
- ⋈ Transit
- ⋈ On Us

Specify: [1] #9570 for 56-character set to be used with 1240, 1401, 1440, 1460 or System/360... [2] #9733 for .095" type size (all except E-13B characters).

Character Sets: Type bars are available with 14-, 42- or 56-character sets. The 14-character set is numeric only (with 4 special characters)... the 42- and 56-character sets are alphanumeric (with 6 special characters). The 56-character set also includes fourteen E-13B symbols. The format of standard segments included in each character set is illustrated below. All characters below are a facsimile of 1445 printing and are slightly smaller than actual size. The quantity of identical segments in a 113 print-position type bar is shown.

Segment Number	Character Position Number														Quantity of identical segments in character set (113 print positions)		
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	14 Char- acter Set	42 Char- acter Set	56 Char- acter Set
1	1	2	3	4	5	6	7	8	9	0	.	\$	*	-	9

5	5	1	⋈	⋈	9	7	8	3	4	0	⋈	6	2	⋈			3

Notes

- Zero appears in Position 10 of Segment No. 1 and in Position 10 of Segment No. 2.
- Alphabetic "O" is in Position 11 of Segment No. 4. It is squared slightly to distinguish it from the numeric zero.
- Segment No. 5 contains the E-13B characters. The zero is in Position 10.

Character Set	Feature #	Single Use-Charge	Purchase Price	MMMC	FIC
14	1898	\$ 2,330	\$ 2,330	NC	NC
42	1899	2,640	2,640	NC	NC
56	1906	2,795	2,795	NC	NC

Specify: [1] Feature #(s) for additional character set(s) desired. **Note:** Selective Character Set (#6402 on model N1) is prerequisite for all except the 56-character set (see 1445 in "Machines").

[2] Type Size, #9733 for .095".

(Continued)

1445 Printer Models 1 and N1— System/360 and Other Systems (cont'd)

Substitute

Characters: A substitute character is one which is ordered to displace a character in one of the standard segment formats illustrated on the previous page. **Note:** A substitute character assumes the card and bit codes of the character it replaces in the system to which the printer is attached.

Character substitutions may be ordered for plant or field installation in a character set, subject to the following:

Artwork (#9950): A Service Charge will be made for designing a new character. Any character illustrated elsewhere in this section for the 1403, 1404, 1443, or 1445, or any character previously designed for these machines (except for "Limitations" below), may be substituted in any segment format without charge for artwork.

Limitations: [1] The ABA E-13B type font can only be used on the 1445. The = and ? (E-13B symbols for the "Dash" and "7") cannot be relocated from their present positions in the standard MICR type segment. This restriction applies to any arrangement of standard MICR or non-MICR type segments, or combinations of both. These characters must always be located in Character Positions 14 and 6, respectively... see Segment No. 5 of the 56-character set under "Character Sets" on the previous page. [2] Characters from the SN5 and TN5 arrangements of the 1403 Printer in System/360 cannot be used on the 1445. [3] The use of .079" character substitutions is not recommended.

Matrix (#9951): Each character requires a matrix. A Service Charge will be made for the matrix unless an identical matrix exists at the plant. This charge is in addition to that for Artwork. **Note:** 1443 matrices cannot be used to fabricate 1445 segments, or vice versa.

Set-Up (#9952): In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a set-up is required to fabricate a segment format other than those illustrated. This Service Charge is the same regardless of the quantity of identical segments made at any one time. On re-orders of identical segments, the set-up charge again applies.

Segment (#6404): Each character set consists of multiples of one or more segments. The quantity of identical segments in a character set is indicated in the chart on the previous page. In addition to applicable Service Charges above, a charge applies for each non-standard segment required to complete a character set... it applies only when an installed type bar is to be modified.

Service Charges for Artwork, Matrix and Set-Up should be authorized on all orders for non-standard characters. The charge for Artwork need not be specified when character numbers from the illustrated catalog are ordered indicating that artwork is available. The plant will review all orders to determine if Artwork and Matrix are required. The Service Charges (even though authorized) will not be billed unless applicable.

Description	Feature #	Service Charge	Single Use-Charge	Purchase Price	MMMC	FIC
Artwork, per character	9950	\$132	--	--	--	--
Matrix, per character	9951	199	--	--	--	--
Set-Up, for each different segment format	9952	120	--	--	--	--
Segment, each (field installation)	6404	--	\$160	\$160	NC	NC

Multiple Machine Orders (identical type specs - Plant installation): On a multiple machine order, the Service Charges for Artwork, Matrix and Set-up apply only to the first machine and are to be entered on AAS for that machine order only.

For additional machines with all specs identical (including type), enter quantity of machines and specify #9695 (Special Type - Multiple Machine Order) at no charge. Once Plant Order numbers are assigned, enter the following under "Remarks":

On first machine order, indicate that Service Charges for special type also cover all other Plant Order numbers:

Example: SVC CHGS FOR SPEC TYPE COVER
E12341 E12342 E12343 E12344
E12345

On each additional machine order, indicate Plant Order number (first machine) which carries Service Charges:

Example: SVC CHGS FOR SPEC TYPE ON
E12340

A separate Type Spec Sheet (Z120-1056) is required for each machine and must be sent to the plant with sufficient lead time for the manufacturing schedule.

The Type Spec Sheet for the first machine must include the Service Charges as entered on that machine order plus a transmittal (memo) listing the Plant Order numbers of all additional machines involved. The spec sheet for each additional machine must indicate the Plant Order number of the machine which carries the Service Charges. (This may be written in the money fields of the Spec Sheet as "Service Charges on P.O. (insert number).")

Note: This cross reference of Plant Order numbers is mandatory on machine orders and Type Spec Sheets.

If an additional machine with identical type specs is ordered prior to shipment of a machine which carries the Service Charges, specify #9695 on the AAS order, and indicate under "Remarks" the Plant Order number which carries the Service Charges. Send a Type Spec Sheet to the plant indicating the Plant Order number which carries the Service Charges. (When the order is entered after shipment of the machine carrying the Service Charges, the Set-up Charge will apply.)

If a machine with #9695 specified at no charge is shipped before the machine specifying the Service Charges, the plant will transfer the charges to the machine which is shipped first and substitute "No Charge" on the other one.

- Specify: [1] 1445 Type Specification Sheet (Z120-1056) must accompany each order for substitute characters. Once a Type Specification Sheet has been submitted and additional characters are desired, a new Type Specification Sheet is required. It must include all characters desired... those previously ordered and the new ones.
- [2] Type Size, #9733 for .095" (all except E-13B characters).

Examples of Charges for Substitute Characters

New Additional Type Bar: A rental customer wants a new additional type bar with ♣ in lieu of * in the 42-character set. The chart on the previous page indicates that this affects Character Position 14 of Segment No. 2. Charges are as follows:

Specifications

One 1445 Type Bar, 42-character set (#1899), type size .095" (#9733) . . .	\$2,640 Single Use-Charge
Artwork (#9950) for one new character	132 Service Charge
Matrix (#9951) for this character	199 Service Charge
Set-Up (#9952) for Segment No. 2 with ♣ in lieu of * in Character Position 14. .	120 Service Charge
Total charge is \$2,640 Single Use-Charge + \$451 Service Charge = \$3,091	

Note: The Segment Charge (#6404) does not apply since a complete type bar is being furnished with three special segments in lieu of the ones of standard Segment No. 2 format. For a customer owned machine, the same total charge would apply with a \$2,640 Purchase Price in lieu of the Single Use-Charge.

**1445 Printer Models 1 and N1-
System/360 and Other Systems (cont'd)**

Examples of Charges for Substitute Characters (cont'd)

Installed Type Bar: A purchase customer orders an ampersand "&" substituted for the dash "-" in the 56-character set. The chart on the previous page indicates that this affects Character Position 1 of Segment No. 3. Charges are as follows:

Specifications: [Note: The "&" is a standard character on the 1443 (Character No. 251869, Page 52). However, a new matrix is required due to the 8 characters/inch spacing of the 1445.]

Artwork (#9950)	No Charge
Matrix (#9951)	\$ 199 Service Charge
Set-Up (#9952) for Segment No. 3 with & in lieu of - in Character Position 1 . . .	120 Service Charge
Three special Segments (#6404), \$160 Purchase Price each, to replace corresponding quantity of Segment No. 3 in 56-character set type bar	480 Purchase Price

Total charge is \$480 Purchase Price + \$319 Service Charge = \$ 799

For a rental customer, the same total charge would apply with a \$480 Single Use-Charge in lieu of the Purchase Price.

Note: Had this same change been made to the 56-character set on initial machine order, only the \$319 Service Charge would apply to both a rental and purchase customer.

SYSTEMS TYPEWRITERS (Console, Inquiry Unit, etc.)

2740

Printing elements for these machines are available in various character arrangements of Data 1 or Data 2 Font... see illustrations and "Table of Printing Elements" below. Characters illustrated correspond to the IBM Standard Paper Tape and Transmission Code (PTTC). Data 1 Font is 10 pitch (10 characters/inch)... Data 2 Font is 12 pitch (12 characters/inch). Note: Character spacing changes cannot be made in the field.

One printing element is furnished at no charge on initial machine order. Additional elements may be purchased.

Note: The keyboard furnished on an initial machine order will have keytops to match the characters of the printing element specified.

2740: Any one of the elements listed under "Table of Printing Elements" may be specified on an initial machine order. Note: If an element other than Data 1 or Data 2 Font is specified, the keyboard interposer arrangement provided differs from that furnished when a PTTT/BCD or PTTT/EBCD element is specified. The line code of a graphic may thus differ between the two types of keyboards, making the standard Selectric element incompatible and not interchangeable with a PTTT/BCD or PTTT/EBCD element. The line code assignments of the Selectric element are shown in the 2740 SRL Manual (GA24-3403).

PTTC/BCD Code for Use with Other Than System/360

Dual Case Printing Element - Used for both home loop (off-line) data preparation and point-to-point data communications where both upshift and downshift codes, and corresponding graphics are required. All 88 printable characters are illustrated below.

=	,	%	"	*)	Π	:	'	(±		3	5	7	8	0	2	4	6	9	#

Slashed Zero: Dual Case (#9570), Mono Case (#9576)

[illegible]

TC 2740.2
Jul 83
Major Revision

Systems Typewriters (cont'd)
Specify: For Plant Installation --

[1] One Feature # at no charge from the following table, based on machine model and system involved. For 2740, see "Note" in text on preceding page before specifying an element other than Data 1 or Data 2 Font.

[2] #9104 if element selected has 10 character/inch spacing... #9105 if it has 12 character/inch spacing. [Note: 10 character/inch spacing cannot be changed to 12 character/inch spacing, or vice versa, in the field.]

For Field Installation --

2740 keytop changes for installed machines, necessitated by other than System/360 compatibility may be made on a Time and Material basis. Keytops are \$0.35 each and should be ordered on a DP Supply Order along with the printing element (Raleigh Plant).

Additional Printing Elements
Purchase Price

Specify Part No. on DP Supply Order (Raleigh Plant)

Note: Print elements contain only the last 3 digits of the assigned 7-digit part number. When additional or replacement elements are desired, the 3 digits indicated on the element are to be used as a guide in determining the part number to be specified from the above list.

Type samples of the above Standard Selectric Printing Elements are shown on the next page.

Systems Typewriters (cont'd)

Standard OPD Selectric Printing Elements

The following samples of OPD Selectric Type Styles are reproduced as near to actual size as high speed reproduction methods will permit. Because of inherent differences between printed and typewritten impressions, these type styles are not representative of typewritten material and should be used as a guide to type design only.

12 pitch
Part No. 1167001

IBM SCRIBE Type is a modern square-serif design in the Elite family of type styles. It is ideally suited for the preparation of routine correspondence and reports.

ABCDEFGHIJKLMNOPQRSTUVWXYZ []@#%&*()
abcdefghijklmnopqrstuvwxyz -_+=!'"'/?;:,,.
1234567890

12 pitch
Part No. 1167007

IBM ELITE 72 Type is similar to the Elite type styles offered with the IBM Model C Typewriter. It is well suited for a wide range of typing applications.

ABCDEFGHIJKLMNOPQRSTUVWXYZ []@#%&*()
abcdefghijklmnopqrstuvwxyz -_+=!'"'/?;:,,.
1234567890

10 pitch
Part No. 1167010

IBM MANIFOLD 72 TYPE IS A SANS-SERIF TYPE STYLE DESIGNED FOR BILLING AND FORMS PREPARATION. IT PROVIDES A MAXIMUM NUMBER OF CLEAR CARBON COPIES.

ABCDEFGHIJKLMNOPQRSTUVWXYZ ±@#%&*()
1234567890 -_+=!'"'/?;:,,.

12 pitch
Part No. 1167012

IBM PRESTIGE ELITE 72 Type is a weighted type similar to the Prestige Elite styles offered with the IBM Model C Typewriter. It meets a range of typing applications.

ABCDEFGHIJKLMNOPQRSTUVWXYZ []@#%&*()
abcdefghijklmnopqrstuvwxyz -_+=!'"'/?;:,,.
1234567890

10 pitch
Part No. 1167015

IBM COURIER 72 Type is a square-serif design in the Pica family of type styles. The open spaced characters make it highly legible.

ABCDEFGHIJKLMNOPQRSTUVWXYZ []@#%&*()
abcdefghijklmnopqrstuvwxyz -_+=!'"'/?;:,,.
1234567890

10 pitch
Part No. 1167019

SIMILAR TO IBM MANIFOLD 72 (CODE 10), THIS TYPE STYLE HAS A LINE THROUGH ZERO (Ø) ELIMINATING CONFUSION BETWEEN LETTER AND NUMBER GROUPINGS.

ABCDEFGHIJKLMNOPQRSTUVWXYZ ±@#%&*()
123456789Ø -_+=!'"'/?;:,,.

**VIRTUAL STORAGE SYSTEM/370, 4331, 4341, 3031,
3032, 3033 PROCESSORS AND 3777 COMMUNICA-
TIONS TERMINAL - 3203 PRINTER**

PRINT TRAINS: The 1416 Interchangeable Train Cartridge is used on the 3203 Printer. It is the same as that used on the 1403 mdl 3 and N1. Additional print trains (1416s) are available by ordering additional 1416 Interchangeable Train Cartridges ... see M1416 pages.

The Universal Character Set is standard on the 3203; therefore, no special feature is required for any available arrangement.

See GA24-3073 for graphics and associated EBCDIC card and bit codes.

PRINT TRAIN ARRANGEMENTS: Trains are assigned alphabetic and numeric designations to indicate type size, style and arrangement. The type size or style is denoted by a numeric suffix (AN2, HN3, etc.) with 2 = .095" type size, 3 = .079" type size, 5 = Text Type Style, etc. Type sizes (the suffix) should not be intermixed. Based on this coding, print trains are assigned a Feature #, as indicated below, for each arrangement.

Std. Type Style		Alt. Type Style		Text Type Style	
.095"	SF#	.079"	SF#	Text Printing	SF#
AN2	#9612	AN3	#9613	SN5	#9634
HN2	#9614	HN3	#9615	TN5	#9635
GN2	#9721	GN3	#9720		
PCS-AN2	#9562	PCS-AN3	#9622		
PCS-HN2	#9564	PCS-HN3	#9624		
PN2	#9631	PN3	#9641		
QNC2	#9638	QNC3	#9648		
QN2	#9632	QN3	#9642		
RN2	#9633	RN3	#9643		
YN2	#9637	YN3	#9647		

Library Type Style		OCR Font (Size 1)			
Lib Prtg	SF#	Style A	SF#	Style B	SF#
ALA6	#9735	OAA	#9710	OAB	#9713
		ODA	#9701		
		ONA	#9702		

Notes:

- OCR fonts or arrangements can be used to prepare documents for IBM optical character readers. Marks may also be printed for reading by optical mark readers. For specific graphics which can be read, see the reader Component Description manuals. For graphics which comprise each character set, refer to the TC1403/1404 pages. Also see "Printing for Optical Character Reading" in the TC1403/1404 pages.
- The IBM OCR characters in arrangements OAA, ODA and ONA are derived from, but not identical to, the designs described in the USASCO standard of the American National Standards Institute. Consequently, it should not be represented that the IBM OCR A Font is the same as the standard OCR A Font.
- The IBM OCR characters in arrangement OAB are representative of (but not always identical to) the characters described in the European Computer Manufacturers Association's Standard ECMA-11 for Alphameric Character Set OCR-B for Optical Character Recognition, 2nd Edition, October, 1971. Consequently, it should not be represented that the IBM OCR B Font is the same as the standard ECMA B Font.

Nominal printing speeds for all available arrangements are shown. "Nominal" speed is a weighted average of mean expected value for printing applications which use single line spacing (no skipping). These printing speeds are provided only as a guide to performance. Actual

throughput rates are a function of character set, number and frequency of characters printed on each line and vertical spacing or skipping. If actual throughput rates are required, the application(s) should be benchmarked and timed.

The nominal speed is dependent upon the frequency with which the various subsets in a preferred character set are printed. For example, the PCS-AN arrangement consists of 48 different graphics arranged in a sequence so that some of the characters occur more frequently than others.

48 graphics -- 3-level preferred set PCS-AN graphics

Characters of primary preference appearing 8 times0-9 . , - *
Characters of secondary preference appearing 4 timesA-Z α \$ / +
Characters of least importance appearing twice% # @ &

The speeds at which graphics in each of the three levels of preference are printed are included in the table below.

SPECIFY

- For 1416 -- one print train feature number for each 1416 ordered. When OCR ribbons are used for either OCR printing or other applications, specify #9488 on the 3203 (also field installable).
- If desired, #9140 for enlarged dash (Character No. 732464) in lieu of standard dash for printing on documents to be read by a 3881 Optical Mark Reader. Available as substitution in Arrangements AN2, HN2, AN3 and HN3 only.
- If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except OAA, ODA, ONA, OAB, SN5 and TN5.
- If desired #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except OAA, ODA, ONA, OAB, SN5 and TN5.
- If desired #9722 for ! (exclamation point) in lieu of | (logical OR) in GN arrangement.
- If desired, #9723 for ^ (circumflex) in lieu of ~ (logical NOT) in GN arrangement.
- If desired, #9728 for - (timing mark dash) in lieu of # in OAA arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 2642392 in train slug 1798437.
- If desired, #9729 for - (timing mark dash) in lieu of < in OAB arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 2642392 in train slug 1798437.
- If desired, #9690 for Non Standard Type Arrangement. See "Type Slug Substitutions" paragraph below.
- If desired, #9719 for ' (apostrophe) in lieu of α (lozenge) in AN arrangements to provide compatibility with #9490 on the 3776.
- If desired, #9650 for ` (grave accent) in lieu of % (percent) and € `` in lieu of # & @ in the second and fourth arrays (only) in PN arrangements to provide compatibility with #9491 on the 3776.
- If desired, #9651 for the following substitutions in the SN5 arrangement to provide compatibility with #9491 on the 3776.

{ } ' in lieu of @ ' (in the first array
€ % _ in lieu of) - | in the first array

QN (PL—I—Scientifically Preferred)	60 graphics, 45 preferred	595/155	1195/315	998/297
RN (FORTRAN/COBOL Commercial)	52 graphics, 47 preferred	595/155	1195/315	998/297
SN (Text Printing—Commercial)	84 graphics, 78 preferred	405/155	815/315	717/297
TN (Text Printing—Scientific)	120 graphics	290	585	530
YN (High-Speed Alphameric)	42 graphics, 39 preferred	675/290	1355/585	-

* When printing diacritical marks over or under alphabetic characters, an additional print cycle is required, resulting in reduced throughput.

TYPE CATALOG

VS/370, 4331, 4341, 3031, 3032, 3033 and 3777 -- 3203 Printer
(cont'd)

) # =	in lieu of) - in the second array
? ! ;	in lieu of @ ' (in the third array
> < ~	in lieu of) in the third array
' ~	in lieu of ? ! ; in the third array
'	in lieu of € % ▯ in the third array

LIMITATIONS: Alphabetic and numeric characters from arrangements SN5 and TN5 cannot be substituted in any other arrangements, nor can characters from other arrangements be substituted in SN5 and TN5.

Because of greater type face density of the SN5 and TN5 arrangements: (1) Ribbon life may be reduced when printing on continuous forms; (2) The number of normal print quality copies is limited to the original and first copy with the customer using additional copies at his own discretion.

The TN arrangement is limited to use at 6 lines per inch spacing due to the overlap otherwise created by the exponent characters.

The ALA arrangement has the following limitations: (1) Ribbon life may be reduced when printing on continuous forms because of greater type face density. (2) For optimum print quality, single part paper is recommended; (3) 6 lines per inch vertical spacing is recommended when under or over-printing (diacritical marks, etc.); (4) All special applications such as spirit, photo-offset, multilith, diazo, heat transfer or similar process should be tested to assure satisfactory results.

Notes: All standard chains contain some ASCII characters. The GN arrangement provides a 63-character set consistent with the American Standard Code for Information Interchange (ANSI X3.4-1968).

It is important to select the arrangement that gives the highest print speed for the customer's applications. As a guide, the arrangement with the smallest character set should be selected. For example, the AN and HN 48-character sets have a nominal printing speed of 1,215 lines per minute on the 3203 mdl 2, while the PN 60-character set runs at 1,020 lines per minute (nominal speed).

#9690 (Non-standard Type Arrangement) will be specified for: (1) Rearrangement of standard type slugs; (2) Rearrangement of standard characters in one or more slugs; (3) Substitution of other available characters in slugs; (4) New design characters.

Arrangement RN is designed for FORTRAN/COBOL use. Any HN, PSC-HN, PN, QNC, QN and TN arrangement also has this capability.

TYPE SLUG SUBSTITUTIONS: Standard type slugs can be substituted for others in announced arrangements without charge. These slugs are furnished at no charge when properly ordered and plant installed on a chain or in a train. For field installation, see "Substitute Characters - Field Installation" in the TC1403/1404 pages for ordering and charges. Also review "Limitations" above. The frequency of occurrence on the chain/train determines the quantity of identical slugs which must be ordered. See 1403 manual, GA24-3073, for details of designing a custom train.

3203-5 PRINTER-SYSTEM/38

Print Trains: The 1416 Interchangeable Train Cartridge is used on the 3203 Printer. It is the same as that used on the 1403 N1. Additional print trains (1416s) are available by ordering additional 1416 interchangeable Train Cartridges . . . see 1416 in "Machines" section.

The Universal Character set is standard on the 3203-5; therefore, no special feature is required for any available arrangement.

Print Train

Arrangements: Trains are assigned alphabetic and numeric designations to indicate type size, style and arrangement. The type size or style is denoted by a numeric suffix (AN2, HN3, etc.) with 2 = .095" type size, 3 = .079" type size, 5 = Text Type Style, etc. Type sizes (the suffix) should not be intermixed. Based on this coding, print trains are assigned a Feature #, as indicated below, for each arrangement.

Standard Type Style		Alternate Type Style		OCR-A Applications		OCR-B Applications		Text Type Style		Library Type Style	
.095"	Feat. #	.079"	Feat. #	Size 1	Feat. #	Size 1	Feat. #	Text Pnt.	Feat. #	Lib. Pnt.	Feat. #
AN2	9612	AN3	9613								
HN2	9614	HN3	9615								
				ODA	9701						
				ONA	9702						
GN2-1	9721	GN3-1	9720	OAA	9710	OAB	9713	SN5	9634	ALA	9735
PCS-AN2	9562	PCS-AN3	9622					TN5	9635		
PCS-HN2	9564	PCS-HN3	9624								
PN2	9631	PN3	9641								
QNC2	9638	QNC3	9648								
QN2	9632	QN3	9642								
RN2	9633	RN3	9643								
YN2	9637	YN3	9647								

- Notes:**
- 1) OCR fonts or arrangements can be used to prepare documents for IBM optical character readers. Marks may also be printed for reading by optical mark readers. For specific graphics which can be read, see the reader Component Description manuals. For graphics which comprise each character set, refer to page TC 41. Also see "Printing for Optical Character Reading" on page TC 36.
 - 2) The IBM OCR characters in arrangements OAA, ODA and ONA are derived from, but not identical to, the designs described in the USASCOCR standard of the American National Standards Institute. Consequently, it should not be represented that the IBM OCR A Font is the same as the standard OCR A Font.
 - 3) The IBM OCR characters in arrangement OAB are representative of (but not always identical to) the characters described in the European Computer Manufacturers Association's Standard ECMA-11 for Alphanumeric Character set OCR-B for Optical Character Recognition, 2nd Edition, October 1971. Consequently, it should not be represented that the IBM OCR B Font is the same as the standard ECMA B Font.

Printing

Speeds:

Nominal printing speeds for all available arrangements are shown. "Nominal" speed is a weighted average of mean *expected* value for printing applications which use single line spacing (no skipping). These printing speeds are provided only as a guide to performance. Actual throughput rates are a function of character set and vertical spacing or skipping.

The nominal speed is dependent upon the frequency with which the various subsets in a preferred character set are printed. For example, the PCS-AN arrangement consists of 48 different graphics arranged in a sequence so that some of the characters occur more frequently than others.

48 graphics—3-level preferred set

Characters of primary preference appearing 8 times
 Characters of secondary preference appearing 4 times
 Characters of least importance appearing twice

PCS-AN graphics

0-9	.	,	-	*
A-Z	□	\$	/	+
%	#	@	&	

3203-5 Printer (cont'd)

The speeds at which graphics in each of three levels of performance are printed are included in the table.

Arrangement	Character Set	Nominal Printing Speed —Lines Per Minute
		3203 Model 5
ALA	162 graphics, 78 preferred	585/315*
AN	48 "A" graphics	1215
HN	48 "H" graphics	1215
OAA (Style A Alphanumeric)	5 "A" graphics + 43 OCR-A	1215
ODA (Style A Numeric)	38 "A" graphics + OCR-A numeric	1215
ONA (Style A Numeric)	35 "A" graphics + OCR-A numeric + 3 special characters	1215
OAB (Style B Alphanumeric)	48 (representative of OCR-B graphics)	1215
GN (ASCII)	2-level set, 63 graphics	1020/585
PCS-AN (Preferred Character Set)	3-level set, 48 "A" graphics	1560/1020/585
PCS-HN (Preferred Character Set)	3-level set, 48 "H" graphics	1560/1020/585
PN (PL/I)	60 graphics	1020
QNC (PL/I—Commercially Preferred)	60 graphics, 45 preferred	1195/315
QN (PL/I—Scientifically Preferred)	60 graphics, 45 preferred	1195/315
RN (FORTRAN/COBOL Commercial)	52 graphics, 47 preferred	1195/315
SN (Text Printing—Commercial)	84 graphics, 78 preferred	815/315
TN (Text Printing—Scientific)	120 graphics	585
YN (High Speed Alphanumeric)	42 graphics, 39 preferred	1355/585

* When printing diacritical marks over or under alphabetic characters, an additional print cycle is required, resulting in reduced throughput.

For train layouts and other information regarding these arrangements, see pages TC 41 and 42.

The print images supplied for 1416 trains on other printers and other systems are often nonstandard, resulting in conflicts in EBCDIC code points assigned. For System/38, the train images (except ALA) will conform to the IBM standards and also be compatible with the console, 5252 work stations, and 5211/3262 printers.

Some of the ALA train EBCDIC codes may not be compatible with other output devices. These codes are:

EBCDIC CODE	ALA GRAPHIC
8F	Superscript Minus
9A	Double Dagger
AO	Macron
AB	Beta
AC	Gamma
BC	Subscript Open Paren
CC	Subscript Close Paren
CE	AYN

Note: All 9xxx specify items are no charge only if plant installed at time of original order. For field installation of specify items, see "substitute characters—field installation on page TC 21 for ordering and charges."

Specify:

- (1) For 1416—one print train Feature # for each 1416 ordered. When OCR ribbons are used for either OCR printing or other applications, specify #9488 on the 3203 (also field installable).
- (2) If desired, #9140 for enlarged dash (Character No. 732464) in lieu of standard dash for printing on documents to be read by a 3881 Optical Mark Reader. Available as substitution in Arrangements AN2, HN2, AN3 and HN3 only.
- (3) If desired, #9549 for slashed zero in lieu of standard zero in any arrangement except OAA, ODA, ONA, OAB, SN5 and TN5.
- (4) If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement except OAA, ODA, ONA, OAB, SN5 and TN5.
- (5) If desired, #9722 for ! (exclamation point) in lieu of | (logical OR) in GN arrangement.
- (6) If desired, #9723 for ^ (circumflex) in lieu of ~ (logical NOT) in GN arrangement.
- (7) If desired, #9728 for - (timing mark dash) in lieu of # in OAA arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 2642392 in train slug 2642393.

3203-5 Printer (cont'd)

- (8) If desired, #9729 for - (timing mark dash) in lieu of > in OAB arrangement for printing timing marks on documents for the 3886 Optical Character Reader. For field installation, order character number 2642392 in train slug 1798437.
- (9) If desired, #9690 for Non Standard Type Arrangement. See "Type Slug Substitutions" paragraph below.
- (10) If desired, #9719 for ' (apostrophe) in lieu of α (lozenge) in AN arrangements to provide compatibility with FC #9490 on the 3776.
- (11) If desired, #9650 for ` (grave accent) in lieu of % (percent) and ¢! \ in lieu of # & @ in the second and fourth arrays (only) in PN arrangements to provide compatibility with FC #9491 on the 3776.
- (12) If desired, #9651 for the following substitutions in the SN5 arrangement to provide compatibility with FC #9491 on the 3776:

```

{}' in lieu of @ ' ( in the first array
¢ % _ in lieu of )-| in the first array
)#= in lieu of )-| in the second array
?!; in lieu of @ ' ( in the third array
><- in lieu of )-| in the third array
' \ ~ in lieu of ? ! ; in the third array
! ' | in lieu of ¢ % α in the third array

```

Limitations:

Alphabetic and numeric characters from arrangements SN5 and TN5 cannot be substituted in any other arrangements, nor can characters from other arrangement be substituted in SN5 and TN5.

Because of greater type face density of the SN5 and TN5 arrangements: (1) Ribbon life may be reduced when printing on continuous forms; (2) The number of normal print quality copies is limited to the original and first copy with the customer using additional copies at his own discretion.

The TN arrangement is limited to use at 6 lines per inch spacing due to the overlap otherwise created by the exponent characters.

The ALA arrangement has the following limitations: (1) Ribbon life may be reduced when printing on continuous forms because of greater type face density. (2) For optimum print quality, single part paper is recommended; (3) 6 lines per inch vertical spacing is recommended when under or over-printing (diacritical marks, etc.); (4) All special applications such as spirit, photo-offset, multilith, diazo, heat transfer or similar process should be tested to assure satisfactory results.

Notes: All standard chains contain some ASCII characters. The GN arrangement provides a 63-character set consistent with the American Standard Code for Information Interchange (ANSI X3.4-1968).

It is important to select the arrangement that gives the highest print speed for the customer's applications. As a guide, the arrangement with the smallest character set should be selected. For example, the AN and HN 48-character sets have a nominal printing speed of 1215 lines per minute on the 3203-5, while the PN 60-character set runs at 1020 lines per minute (nominal speed).

FC #9690 (Nonstandard Type Arrangement) will be specified for: (1) Rearrangement of standard type slugs; (2) Rearrangement of standard characters in one or more slugs; (3) Substitution of other available characters in slugs; (4) New design characters.

Arrangement RN is designed for FORTRAN/COBOL use. Any HN, PSC-HN, PN, QNC, QN and TN arrangement also has this capability.

Type Slug

Substitutions:

Standard type slugs can be substituted for others in announced arrangements without charge. These slugs are furnished at no charge when properly ordered and plant installed on a chain or in a train. See "Substitute Characters" on page TC 20. For field installation, see "Substitute Characters—Field Installation" on page TC 21 for ordering and charges. Also review "Limitations" above. The frequency of occurrence on the chain/train determines the quantity of identical slugs which must be ordered. See *IBM 1403 Printer Component Description Manual* (GA24-3073) for details of designing a custom train.

SYSTEM/360, SYSTEM/370 and 4300 PROCESSORS -- 3216 INTERCHANGEABLE TRAIN CARTRIDGE OF 3211 PRINTER

PRINT TRAINS: The 3216 Interchangeable Train Cartridge consists of 108 carrier assemblies. The assemblies (containing 4 elements each, with one character per element) are placed end to end to form a contiguous train of 432 characters.

CHARACTERISTICS: The characteristics of the 3216 train construction, combined with the standard Universal Character Set buffer, allow complete flexibility in the selection of the character arrays. Each carrier assembly is made up of 4 physically identical and interchangeable type elements, except for the unique alphabetic, numeric or special character which an element will print. The ability to interchange elements affords the capability to customize the user's train into assemblies which will optimize his work. For details, see *3211/3811 Component Description*, GA24-3543. It includes a formula for calculating anticipated throughput with special train cartridges.

PRINT TRAIN ARRANGEMENTS: Trains are assigned alphabetic and numeric designations to indicate the type size, style and arrangement. The type style is implied by the leading character and the numeric suffix denotes size and base line reference, with 1 = .094" OCR-A font type

size, 2 = .095" type size, 3 = .079" type size, and 5 = Text Type Style. Type sizes (the suffix) should not be intermixed. Based on this coding, print trains are assigned a Feature Number as indicated below.

System	Printer	Standard Type Style		Alternate Type Style		Text Type Style	
		.095"	Feature	.079"	Feature	T11-5	Feature
S/360 S/370 4300	3216 (3211)	A11-2 H11-2 G11-2 P11-2	#9411 #9414 #9417 #9420	A11-3 H11-3 G11-3 P11-3	#9511 #9514 #9517 #9520		#9530

System	Printer	OCR-A Font Type Style		OCR-B Font Type Style	
		.094"	Feature	.094"	Feature
S/360 S/370 4300	3216 (3211)	AOA-1 AOD-1 AON-1	#9608 #9611 #9612	BOA-5 BON-2	#9621 #9622

The characters appearing in the following set diagrams are for identification only. For more accurate character shapes, see the pages at the end of this section.

A11 48 graphics - Standard Commercial-- Arrangement consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

< . + I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	% , & Z	Y X W V	U T S /	@ # 0 9	8 7 6 5	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

AOA 48 graphics -- Commercial set modified with OCR-A font digits, alphabets and 7 OCR specials -- Arrangement consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated. The < + % # @ remain standard .095" type style.

< . + I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	% , & Z	Y X W V	U T S /	@ # 0 9	8 7 6 5	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

AOD 48 graphics - Standard Commercial, with OCR digits -- Arrangement consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

< . + I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	% , & Z	Y X W V	U T S /	@ # 0 9	8 7 6 5	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

AON 48 graphics - Standard Commercial, with OCR-A font digits and 3 specials (hook, fork and chair). Consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

⌈ ⌋ . ʹ I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	⌈ ⌋ , & Z	Y X W V	U T S /	@ # 0 9	8 7 6 5	4 3 2 1
-----------	---------	---------	----------	---------	---------	-----------	---------	---------	---------	---------	---------

BOA -5 48 graphics - Modified Commercial, alphabetic with OCR-B font graphics except for equal (=) and apostrophe ('). Arrangement consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

< . + I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	> , & Z	Y X W V	U T S /	' = 0 9	8 7 6 5	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

BON-2 48 graphics - Modified Commercial, alphabetic but only the 0 thru 9 and + > < are OCR-B font. Arrangement consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

< . + I	H G F E	D C B A	* \$ - R	Q P O N	M L K J	> , & Z	Y X W V	U T S /	' = 0 9	8 7 6 5	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

H11 48 graphics - Standard Scientific -- Consists of 9 identical arrays of 12 assemblies. Only the first array is illustrated.

H G F E) . + I	D C B A	* \$ - R	Q P O N	M L K J	(, & Z	Y X W V	8 7 6 5	' = 0 9	U T S /	4 3 2 1
---------	---------	---------	----------	---------	---------	---------	---------	---------	---------	---------	---------

G11 63 graphics - ASCII -- Consists of 4 arrays of 27 assemblies, total of 108 characters per array. Only the first array is illustrated.

' B D J	L - 5 K	* C (N	O ?) S	A @ = E	- # R >	V 9 2 \	Y T [G	6 8] X	F " H .	U 0 7	/ P 3 W

0 7 / P	3 W M I	Q , 4 1									

T11-5 120 graphics - Text Printing -- Consists of 3 arrays of 36 assemblies, total, of 144 characters per array. Only the first array is illustrated.

Q X g R	e b J G	3 H Y f	I T p m	- u U	h r 9 c	1 , 4 B	d M S P	_ F 7 .	= N L t	s O n 8	E o i C
A a > <	6 Q c !	+ D *)	■ - 5 6	7 9 - ≠	□ ° 2 1	± 0 8 R	e ≥ 5 "	3 3 - 4	I T ≤ @	(- + 1	2 r 9 ;
{ } 4 [] % S j	z ? 7 .	& 7 r t	⌈ L : 8	E q ' .	A Z x #	6 0 v \$	k D * w	+) 5 (K W - /	y V 2 1

NOTE: Trains G11 and T11 have different appearing carrier assemblies. The reason for this is that a number of representative customer jobs were analyzed by computer. The analysis tabulated character usage and developed optimized trains for these character sets.

OCR NOTES: The IBM OCR characters in Arrangements AOA-1, AOD-1 and AON-1 are derived from, but are not identical to, the designs described in the USASCSOCR standard of the American National Standards Institute. Consequently, it should not be represented that the IBM OCR-A Font is the same as the standard OCR-A Font. It is recommended that the "OCR Specials" be coded as follows:

TYPE CATALOG

3216 Interchangeable Train Cartridge of 3211 Printer (cont'd)

EBCDIC		
Graphic	Card Code	Bit Code
hook	12-0-9-8-4	1100 1100
fork	12-0-9-8-6	1100 1110
chair	11-0-9-8-4	1110 1100

The IBM OCR characters in arrangements BON and BOA are derived from, but are not identical to, the designs described in the European Computer Manufacturers Association's Standard ECMA-11 for Alphanumeric Character Set OCR-B for Optical Recognition, 2nd Edition (October, 1971). Consequently, it should not be represented that the IBM OCR-B font is the same as the standard ECMA B-font.

NOTE: The Print Train Configurator, an IBM Aid Program (AIDS - SE - 010) can provide an optimized train layout and/or a comparison of specified trains. Input is derived from customer streams of printing, and output from the configurator provides desired train arrangement, type element usage, carrier assembly definition, as well as projected speeds for the optimized and/or selected train. The aid is to be used by IBM personnel only.

SPECIFY

For plant installation:

- One Feature Number for print arrangement desired ... see Print Train Arrangements above.
- If desired, **#9549** for slashed zero in lieu of standard zero in any arrangement except AOA-1, AOD-1, AON-1, BOA-5, BON-2 and T11-5.
- If desired, **#9676** for round alphabetic O in lieu of standard squared O in any arrangement (not applicable to AOA -1, BOA-5 and T11-5).
- If desired, **#9677** for = in lieu of < in arrangement AOA-1, AOD-1, A11-2 or A11-3.
- If desired, **#9140** for enlarged dash for printing on documents to be read by optical mark readers. Available as a substitution in arrangement A11-2, H11-2, P11-2 A11-3 and P11-3 only.
- If desired in arrangement G11-2 or G11-3, Exclamation Point **#9722** may be substituted for Logical OR ... Circumflex (**#9723**) may be substituted for Logical NOT.
- If desired **#9729** for 3886 timing mark dash (1793636) in lieu of > in BON-2 and BOA-5.
- If desired **#9690** for rearrangement of the characters in a standard chain, substitution of other available characters, or new special characters ... see "Substitute Characters" below.

NEW PRINT TRAINS: Additional trains are available by ordering 3216 Interchangeable Train Cartridges. Trains are removable and interchangeable. See M3216 pages for prices, and additional information, ... see other options under "Specify" above.

SUBSTITUTE CHARACTERS: It may be desirable to specify an optimized train (see above note on train optimization) to achieve added performance. For available standard arrangements, see previous page and above. It is not feasible to make actual printing tests on nonstandard characters. Therefore printing and ribbon life from trains with nonstandard characters may be less satisfactory than results from standard train. It should also be noted that because of limitations of type face area (height, width, etc.), characters of the customer's design are not subject to acceptance by the plant.

A substitute character is one which is ordered to displace a character in one of the standard arrangements. Standard characters may be rearranged, special characters may be selected from the type catalog on following pages or characters of the customer's design may be substituted, subject to the above limitations.

NOTE: Refer to 3211/3811 Component Description, GA24-3543, for card and bit codes recommended for special characters.

Character substitutions may be ordered for plant or field installation on a print train, subject to the following:

Artwork (#9950). A Service Charge will be made for the design of a new character. Characters illustrated in the catalog which follows are not subject to this charge. The plant will review requests for other characters to determine if a charge for Artwork is applicable.

Matrix (#9951). Each print train type element consists of a single alphabetic, numeric or special character. A Service Charge will be made for the matrix unless an identical matrix exists. This charge is in addition to the charge for Artwork.

Set-Up (#9952). In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a Set-Up is required to fabricate special type elements. This charge is the same regardless of the quantity of identical new elements made at any one time. On reorders of identical type elements, the Set-Up charge again applies.

Service Charges for Artwork, Matrix and Set-Up should be authorized on all orders for nonstandard characters. The charges need not be specified when elements from the illustrated catalog (see following

pages) are ordered. The plant will review all other orders to determine what charges (if any) are applicable.

3216	Feature	Service Charge
Artwork, per character	#9950	\$135
Matrix, per type element	#9951	160
Set-Up, per type element	#9952	40

Plant Installation (original assembly of train): ANY STANDARD TYPE ELEMENT (see following pages) may be specified in any of the 432 characters positions on the train at no extra charge. See "Specify" below for action required.

Multiple Machine Orders: (identical type specs): Service Charges for Artwork, Matrix and Set-Up are to be entered on the Type Specification Sheet and DP Order Guide for the first 3216 of a multiple machine order. A separate Order Guide must be prepared for the additional 3216s, indicating **#9695** for Special Type - Multiple Machine Order (with no Service Charges applicable to Artwork, Matrix and Set-Up). A separate Type Specification Sheet must be prepared for each 3216 (with no Service Charges applicable.).

For the additional 3216s, "Supplemental Specs - Via Terminal Entry" are required for **#9695** to state: "Charges on P. O. No. _____" (Show Plant Order Number assigned to first 3216.)

When Plant Order Numbers are assigned to the additional 3216s, "Supplemental Specs - Via Terminal Entry" are required on the first 3216 as follows:

Line 1 -- P. O. No. of first additional 3216.
Line 2 -- P. O. No. of second additional 3216.
Line 3 -- P. O. No. of third additional 3216.
etc.

This indicates that charges for Artwork, Matrix and Set-Up for the first 3216 also cover the additional 3216s.

This cross-reference of Plant Order Numbers is required ... otherwise, charges for Artwork, Matrix and Set-Up will be assessed against each 3216.

If an additional 3216 with identical type specs is ordered prior to shipment of the one which carries the Service Charges, specify **#9695** on the order, reference the Plant Order Number which carries the Service Charges, and submit a Type Specification Sheet for the new 3216. (Procedure to be followed is described above.)

When an order for an additional 3216 is entered after shipment of the one which carried the Service Charges, the Set-Up charge will apply to fabrication of each different type element.

If a 3216 with **#9695** specified at no charge is shipped before the one specifying the Service Charges, the plant will transfer the charges to the 3216 which is shipped first and substitute **#9695** on the other one.

SPECIFY

- Feature Number of print arrangement which most closely resembles that desired by the customer.
- #9690** (Nonstandard Train Arrangement) must be specified for rearrangement of characters in a standard train, substitution of other available characters (following pages) or new special characters.
- Use appropriate 3216 Type Specification Sheet and follow directions contained on the form:

Train Arrangement	Order No.	Train Arrangement	Order No.
A11-2	Z120-2250*	A11-3	Z120-2249
H11-2	Z120-2246*	H11-3	Z120-2245
G11-2	Z120-2248*	G11-3	Z120-2247
P11-2	Z120-2244*	P11-3	Z120-2243
		T11-5	Z120-2242

* **NOTE:** In the example or a character substitution on these forms, the question mark (?) is shown as part number 2471454. This part number has been changed to 2645350 and will be corrected when the forms are reprinted.

For character substitution in AOA-1, AOD-1 or AON-1 train, use the A11-2 Type Specification Sheet and change headings as appropriate.

- A Type Specification Sheet must be prepared for each nonstandard train arrangement, except for the character substitutions under "Specify" on the previous page. Do not intermix type sizes or styles.
- Enter quantity of Feature Numbers for Artwork, Matrix and Set-Up based on number of different special characters being ordered.
- Enter order for 3216 via AAS, including the first, second and fourth Specified above. When Plant Order Number has been assigned, post to Type Specification Sheet and forward to Dept. 781, SMD

3216 Interchangeable Train Cartridge of 3211 Printer (cont'd)

Endicott Plant. Once the Type Specification Sheet has been forwarded to the plant, if further changes are desired a new spec sheet must be completed including all characters desired ... those previously ordered and the new ones. If increased Service Charges apply, the total new charges should be entered on the spec sheet. AAS input is required to update the charges listed for the on-order 3216.

Field Installation: Prices (shown below) apply to field installation of standard type elements (or special elements to which charges for Artwork, Matrix and Set-Up are to be added as applicable).

Print trains are made up of number of identical arrays of carrier assemblies. When a modification is made to a carrier assembly in one array, corresponding carrier assemblies should be changed in all identical arrays. Field modification converting to OCR characters for use in OCR applications should not be made.

**Type Element Substitution
in a Print Train**

	Feature	Rental	Purchase
First type element , anywhere in Train	#8481	\$165	\$158
Each additional element (same 3216, at same time)	#8482	25	24

SPECIFY

- Feature Number of installed train arrangement which is to be modified.
- Applicable Feature Numbers and charges (for Artwork, Matrix and Set-Up.
- Submit MES with appropriate Type Specification Sheet attached. (Type Specification Sheet order numbers are listed above.)

3216 Interchangeable Train Cartridge of 3211 Printer (cont'd)

The characters illustrated below do not necessarily represent the final appearance of the printed characters in every detail. This is because they are made from drawings (original artwork) of the characters and not from actual print samples. Dimensions shown are approximate and are not the final dimensions of the printed characters. Final dimensions will be somewhat larger and they will vary depending upon the characteristics of the ribbon and paper used.

The reproductions are approximately five times actual type size. The 7-digit number which appears directly below each character is the part number assigned to the type element containing that character.

3216 Interchangeable Train Cartridge of 3211 Printer (cont'd)

.094" OCR-A Font, Size 1 -- AOD and AON arrangement include 0-9 illustrated below. AON also includes the hook, fork and chair graphics. In addition, both arrangements include standard .095" alphabetic and special characters as illustrated in the train layouts on following pages.

.079" Type Size -- Various combinations of the following characters are used in the A, H, G and P arrangements

This technical drawing illustrates the layout of a typeface, showing the arrangement of characters from A to Z, 0 to 9, and various punctuation and symbols. Each character is shown with its bounding box and dimensions, indicating the design's precision and the use of a grid system.

The characters are arranged in rows, with dimensions (width and height) provided for each. The characters include:

- Uppercase letters: A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z
- Lowercase letters: a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z
- Numbers: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9
- Punctuation and symbols: !, ", #, \$, %, &, ', (,), *, +, ,, /, :; , <, =, >, ?

The drawing also includes a series of small, repeating characters (likely ligatures or special characters) at the bottom, each with its own dimensions. The overall layout is a grid-based design, typical of a typeface specification document.

TYPE CATALOG

**3741 DATA STATION (MODEL 1 AND 2)
3741 PROGRAMMABLE WORK STATION
(MODEL 3 AND 4)
3742 DUAL DATA STATION**

The following keyboards are available for the above machines.

COUNTRY KEYBOARD LAYOUTS

United States (#2956)

3780 DATA COMMUNICATIONS TERMINAL

Any one of the available character sets may be specified on the initial 3780 order.

Special characters with their corresponding card codes are shown for all character sets in the chart to the right.

Feature *s indicated below apply to plant installation only.

Character Set	Feature
39	*9087
52	9088
63 EBCDIC	9089
63 ASCII	9102

Note: If Transmission Code is ASCII (*9762), the ASCII character set is required.

For prices of character sets other than the one furnished at no charge, see "Character Sets" below.

Specify: [1] Feature * for standard character set.

[2] If desired *9676 for round alphabetic "O" in lieu of standard squared "O", for any character set except ASCII (*9102).

[3] If desired, *9140 for enlarged dash (Character No. 830704) in lieu of standard dash for printing on documents to be read by 1230, 1231, 1232 optical mark readers. Available as a substitution in a 52- or 63-character set.

[4] If desired, *9549 for slashed zero in lieu of standard zero in any character set.

[5] Type size -- *9733 for .095", or *9731 for .079".

Character Sets: Type bars are available with 39-, 52- and 63-character sets as illustrated below. The format of standard segments is illustrated and the quantity of identical segments in the various character sets and number of print positions are shown.

Note: 1) For example, using the EBCDIC chart, the 39-character set has four No. 54 segments for 120 positions or five for 144 positions.

2) Zero appears in the following locations on the different type bars:
EBCDIC - Segment 52, Position 4 and Segment 53, Position 3.
ASCII - Segment 1, Position 1.

3) Alphabetic "O" appears in the following locations on the different type bars:
EBCDIC - Segment 54, Position 12.
ASCII - Segment 5, Position 10.

Additional Character Sets:	Code	Char Set	Feature
EBCDIC	39	*1902	
EBCDIC	52	1903	
EBCDIC	63	1904	
ASCII	63	1897	

Specify: [1] Feature *(s) for additional character set(s) desired.

[2] *9495 for 120 print positions, or *9496 for 144, if applicable. Prerequisite: For *9496, Print Positions, Add'l (*5701).

[3] If desired, *9240 for enlarged dash (Character No. 830704) in lieu of standard dash for printing of documents to be read by 1230, 1231 or 1232 optical mark readers. Available as a substitution in 52- and 63-character sets.

[4] If desired, *9649 for slashed zero in lieu of standard zero in any character set.

[5] If desired, *9776 for round alphabetic "O" in lieu of standard squared "O". Available in all character sets except *1897.

[6] Type Size -- *9833 for .095" or *9831 for .079".

Substitute Characters: Any character illustrated elsewhere in this section for the 1403, 1443, or 2203, or any character previously designed for these units, may be substituted in any character position except those shown as blanks.

CARD CODE	39	52	63	ASCII

5203 PRINTER— SYSTEM/370 MODEL 115

Either an AN or HN (48-character set) is standard on the 5203 model 3. Other arrangements require Universal Character Set Attachment (#8639) on the 5203 and Universal Character Set Control (#9848) on the 3115 Processing Unit. A chart, similar to the following, showing 80-column card codes and associated EBCDIC bit codes (for AN, HN, GN and PN of a 1403 Printer) is on page TC 71.1 ... it also applies to the 5203 model 3 in System/370 Model 115.

96-col. Card Code	EBCDIC Code	Arrangements and Number of Graphics			
		AN(48)	HN(48)	PN(60)	GN(63)
BA8 21	0100 1011
BA8 4	1100
BA8 1	1101
BA8 2	1110
BA8 21	1111
AB 2	0101 0000
B 8 21	1011
B 8 4	1100
B 8 1	1101
B 8 2	1110
B 8 21	1111
B	0110 0000
A	0001
AB 21	1011
AB 4	1100
AB 1	1101
AB 2	1110
AB 21	1111
B 21	0111 1011
B 4	1100
B 1	1101
B 2	1110
B 21	1111
See Note	1110 0000
B 8 2	0101 1010
BA8 2	0100 1010

Note: No 96-column card code is associated with this internal EBCDIC Code. See TC 71.1 - 71.8 for 80 column card codes, regarding these sets.

Printing Speeds: The table below illustrates printing speeds for available print arrangements. All speeds shown assume single line spacing (no skipping). For AN and HN arrangements, the printing speeds are based upon a 132 character print line and a random distribution of characters. To determine print speeds for the PN and GN arrangements (UCS Applications), a mathematical model was devised. Based upon assumptions concerning the number and frequency of characters in a line for a "typical" application, the model predicted the ranges in the table. These speed ranges are provided only as a guide to performance. Actual throughput rates depend upon character set, number and frequency of characters printed on each line and vertical spacing or skipping. If actual throughput rates are required, the job(s) should be benchmarked and timed.

Arrangement	Character Set	Printing Speeds
AN, HN	48 graphics	300 lpm
PN	60 graphics	197 to 213 lpm
GN	63 graphics	180 to 212 lpm

Print Trains: The Interchangeable Train Cartridge consists of multiple arrays of type slugs placed end to end with 3 characters per slug. Each cartridge has a total of 80 slugs (240 character positions). In the layouts illustrated below, the characters are depicted as they appear on the cartridge.

Standard Arrangements: Arrangements AN and HN consist of 5 identical arrays of 16 slugs each. Only the first array is illustrated. 48 graphics.

AN - 1st Array	123 456 789 0 / ST UVW XYZ & % JKL MNO PQR - \$ @ ABC DEF GHI + .
HN - 1st Array	123 456 789 0 = ' / ST UVW XYZ & (JKL MNO PQR - \$ @ ABC DEF GHI + .)

Character position numbers are assigned as follows for the 5 arrays: 1st array: 1-48, 2nd array: 49-96, 3rd array: 97-144, 4th array: 145-192, 5th array: 193-240.

Universal Character Set: Arrangement PN consists of 4 identical arrays of 20 slugs each. Only the first array is illustrated. 60 graphics.

PN - 1st Array	123 456 789 0 XY / ST UVW : , = JKL MNO PQR - 2 (ABC DEF GHI + .) \$ % & ' ?
----------------	--

Character position numbers are assigned as follows for the 4 arrays: 1st array: 1-60, 2nd array: 61-120, 3rd array: 121-180, 4th array: 181-240.

Arrangement GN consists of 4 arrays of 20 slugs each. The first and third arrays are identical, as are the second and fourth. Only the first and second arrays are illustrated. 63 graphics.

GN - 1st Array	123 456 789 0 XY / ST UVW : , = JKL MNO PQR - 2 (ABC DEF GHI + .) \$ % & ' ?
- 2nd Array	123 456 789 0 XY / ST UVW : , = JKL MNO PQR - 2 (ABC DEF GHI + .) \$ % & ' ?

Character position numbers are assigned as follows for the 4 arrays: 1st array: 1-60, 2nd array: 61-120, 3rd array: 121-180, 4th array: 181-240.

Type Arrangements: Print arrangements are assigned an alphabetic designation (AN, HN, PN, GN). The type size is denoted by a numeric suffix, with 2 = .095" type size and 3 = .079" type size. Based on this coding, feature #s are assigned as indicated below for each available arrangement.

Standard Type Style		Alternate Type Style	
.095"	Feature #	.079"	Feature #
AN2	9666	AN3	9776
HN2	9667	HN3	9777
PN2	9664	PN3	9665
GN2	9660	GN3	9661

Notes: (1) To avoid overlap when printing 8 lines/inch, specify .079" type size.
(2) Arrangements PN and GN require Universal Character Set Attachment (#8639) on the 5203.

Specify: For Plant Installation

- (1) One feature # for print arrangement desired ... see "Type Arrangements" above.
- (2) If desired, #9549 for slashed zero in lieu of standard zero in any arrangement.
- (3) If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement.
- (4) If desired, #9722 for Exclamation Point (!) in lieu of Logical OR (|) in the GN arrangement.
- (5) If desired, #9723 for Circumflex (^) in lieu of Logical NOT (~) in the GN arrangement.
- (6) If desired, #9140 for enlarged dash in lieu of standard dash for printing on documents to be read by IBM optical mark readers. Available as substitution in all arrangements.
- (7) If desired, #9690 for Non Standard Type Arrangement. See "Type Slug Substitutions" paragraph on TC 110.

For Field Installation of Interchangeable Train Cartridge, Add'l (#4740)

- (1) One feature # for print arrangement desired ... see "Type Arrangements" above.
- (2) #9549, #9676, #9722, #9723 or #9140 may be specified on MES for substitution in the arrangement selected. For other character substitutions see "Specify" under "Plant Installation" of "Substitute Characters" below.

For modification of installed trains, see "Field Installation" under "Substitute Characters" on page TC 110.

TYPE CATALOG

5203 Printer— System/370 Model 115 (cont'd)

It may be a customer advantage to have a character set other than standard. Or it may be necessary to provide a customer designed character. This section outlines the order for these requirements. It is not feasible to make actual printing tests on non-standard characters. Therefore, printing and ribbon life from trains with non-standard characters may be less satisfactory than results from standard trains. It should also be noted that because of limitations of type face area (height, width, etc.), characters of the customer's design are subject to acceptance by the plant.

A substitute character is one which is ordered to displace a character in one of the standard arrangements. Standard characters may be rearranged, special characters may be selected from the type catalog, or characters of the customer's design may be substituted, subject to the above limitations.

Note: A substitute character assumes the card and bit codes of the character it replaces in the system to which the printer is attached, unless the card and bit codes are changed.

Character substitutions may be ordered for plant or field installation. Standard characters (pgs TC 52 - 58) will not require artwork, but may require matrix and set-up. Special design characters may require all three.

Artwork (#9950): A Service Charge will be made for designing a new character. Any character illustrated on pages 52 to 58, or any character previously designed for the printers headed by this section (except for "Limitations" below) may be substituted in any position of any type slug without charge for artwork.

Limitations [1] The ABA E-13B type font cannot be used ... [2] Characters from the SNS and TNS arrangements cannot be substituted in other arrangements.

Matrix (#9951 or #9953): A chain or train type slug consists of two or three characters and requires one matrix (#9951 or #9953). A Service Charge will be made for the matrix unless identical matrices (same characters in same positions) exist at the plant. This charge is in addition to that for Artwork.

Set-Up (#9952 or #9954): In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a set-up is required to fabricate a special type slug. This charge is the same regardless of the quantity of identical slugs made at any one time. On re-orders of identical slugs, the set-up charge again applies.

Service Charges for Artwork, Matrix and Set-Up should be authorized on all orders for non-standard characters. The charge for Artwork need not be specified when character numbers from the illustrated catalog are ordered, indicating that artwork is available. The plant will review all orders to determine if Artwork and Matrix are required. The Service Charges (even though authorized) will not be billed unless applicable.

	1403 - 2,7	1416, (3203), 5203 - 3	
	Feature	Feature	Service Charge
Artwork, per character	#9950	#9950	\$ 152
Matrix, per slug	9951	9953	229
Set-Up for slug	9952	9954	77

Plant Installation (original assembly of chain or train): Any standard type slug (size, font) can be specified in any desired arrangement at no extra charge. Instructions for rearrangement of standard characters and slugs, and definition and location of special design slugs is found on the Type Specification Sheet, Z120-1089.

Multiple Machine Orders (identical type specs - plant installation): On a multiple machine order, the Service Charges for Artwork, Matrix and Set-up apply only to the first machine and are to be entered on AAS for that machine order only.

For additional machines with all specs identical (including type), enter quantity of machines and specify #9695 (Special Type - Multiple Machine Order) at no charge.

Once Plant Order numbers are assigned, enter the following under "Remarks":

On first machine order, indicate that Service Charges for special type also cover all other plant order numbers:

Example: SVC CHGS FOR SPEC TYPE COVER
E12341 E12342 E12343 12344
E12345

On each additional machine order, indicate plant order number (first machine) which carries Service Charges:

Example: SVC CHGS FOR SPEC TYPE ON
E12340

A separate Type Spec Sheet (Z120-1089) is required for each machine and must be sent to the Endicott Plant with sufficient lead time for the manufacturing schedule.

The spec sheet for the first machine must include the Service Charges as entered on that machine order plus a transmittal (memo) listing the Plant Order numbers of all additional machines involved. The spec sheet for each additional machine must indicate the Plant Order number of the machine which carries the Service Charges. (This may be written in the money fields of the Spec Sheet as "Service Charges on P.O. (insert number).")

Note: This cross reference of Plant Order numbers is mandatory on machine orders and Type Spec sheets.

If an additional machine with identical type specs is ordered prior to shipment of a machine which carries the Service Charges, specify #9695 on the AAS order, and indicate under "Remarks" the Plant Order number which carries the Service Charges. Send a Type Specification Sheet to the Endicott Plant indicating the Plant Order No. of the machine which carries the Service Charges. (When the order is entered after shipment of the machine carrying the Service Charges, the Set-up charge will apply.)

If a machine with #9695 specified at no charge is shipped before the machine specifying the Service Charges, the plant will transfer the charges to the machine which is shipped first and substitute "No Charge" on the other one.

Specify: [1] Feature # of print arrangement which most closely resembles that desired by the customer.

[2] #9690 (Non-standard Type Arrangement) must be specified for any of the following changes.

- 1) Rearrangement of standard type slugs.
- 2) Rearrangement of standard characters in one or more slugs.
- 3) Substitution of other available characters (pages TC 52 - 58) in slugs.
- 4) New special characters.

[3] Feature #s and charges for Artwork, Matrix and Set-up if required. The Service Charges (even though authorized) will not be billed unless applicable.

[4] Type Specification Sheet (Z120-1089) must be submitted for each order for substitute characters. Once a type specification sheet has been submitted and additional characters are desired, a new type specification sheet is required. It must include all characters desired ... those previously ordered and the new ones.

Field Installation: The prices shown below apply to installation of standard type slugs (to which charges for Artwork, Matrix and Set-up are to be added if applicable).

Print chains or trains are made up of identical arrays of type slugs as described above. When a modification is made to a slug in one array, corresponding type slugs must be changed in all identical arrays.

Type Slug Substitutions (for a chain or train)

	Feature	Rental	Purchase	FIC
First type slug (1403 - 2,7)	#8371	\$18 SU	\$ 8	\$11
Ea, add'l slug (at same time)	8372	10 SU	8	2
First type slug (1416, 5203)	8373	29 SU	24	5
Ea, add'l slug (at same time)	8374	24 SU	24	NC

Specify: [1] Feature # of installed chain or train which is to be modified.

[2] Applicable Feature # and charges for Artwork, Matrix and Set-up.

[3] Feature #s and charges for type slug substitutions. Type slugs (#8371 thru #8374) may be ordered on MES with Type Specification Sheet, Z120-1089, attached for any of the following:

	Type Catalog Character Number .095" Type Size	.079" Type Size
Round alphabetic "O" in lieu of standard squared "O"	251839	475504
Slashed zero in lieu of standard zero	474129	475539
Exclamation Point in lieu of Logical OR	749306	859820
Circumflex in lieu of Logical NOT	847243	847243

Note: For examples of charges for substitute characters, see examples on page TC 34 - 35.

5203 PRINTER— SYSTEM/3 MODELS 8, 10 AND 12

System/3 Models 8, 10 and 12: Either HN or LC (48 character set) is standard on the 5203 model 1, 2, or 3. Arrangements PN (60 character set) and GN (63 character set) require Universal Character Set Attachment (#8639) on the 5203 and Universal Character Set Control (#8642) on the 5408/5410/5412 Processing Unit. See 'Type Arrangements' below for feature codes for each type arrangement and size. The chart below shows EBCDIC bit codes and System/3 card codes assigned to the special characters included in all arrangements.

Printing Speeds: The table below illustrates printing speeds for available print arrangements. All speeds shown assume single line spacing (no skipping). For the LC, AN and HN arrangements, the printing speeds are based upon a 132 character print line and a random distribution of characters. To determine print speeds for the PN and GN arrangements (UCS Applications), a mathematical model was devised. Based upon assumptions concerning the number and frequency of characters in a line for a "typical" application, the model predicted the ranges in the table. These speed ranges are provided only as a guide to performance. Actual throughput rates depend upon character set, number and frequency of characters printed on each line and vertical spacing or skipping. If actual throughput rates are required, the job(s) should be benchmarked and timed.

96-col. Card Code	EBCDIC Code	Arrangements and Number of Graphics				
		LC (48)	AN (43)	HN (48)	PN (60)	GN (63)
BA8 21	0100 1011	*	*	*	*	*

BA8 2	0100 1010	*	*	*	*	*

Note: No 96-column card code is associated with this internal EBCDIC Code. Consult Special Product Marketing regarding ASCII graphics on the 5424 and 5496.

Arrangement	Character Set	Printing Speeds		
		Model 1	Model 2	Model 3
LC, AN, HN	48 graphics	100 lpm	200 lpm	300 lpm
PN	60 graphics	92 to 96 lpm	165 to 181 lpm	197 to 213 lpm
GN	63 graphics	88 to 95 lpm	147 to 179 lpm	190 to 212 lpm

Type Arrangements: Print arrangements are assigned an alphabetic designation (LC, AN, HN, PN, GN). The type size is denoted by a numeric suffix, with 2 = .095" type size and 3 = .079" type size. Based on this coding, feature #s are assigned as indicated below for each available arrangement.

Chains (mdl 1 or 2 only):

Standard Type Style		Alternate Type Style	
.095"	Feature #	.079"	Feature #
LC2	9639	LC3	9649
HN2	9627	HN3	9647
PN2	9631	PN3	9641
GN2	9721	GN3	9720

Trains (mdl 3 only):

Standard Type Style		Alternate Type Style	
.095"	Feature #	.079"	Feature #
LC2	9662	LC3	9663
AN2*	9666	AN3*	9776
HN2	9667	HN3	9777
PN2	9664	PN3	9665
GN2	9660	GN3	9661

- Notes: (1) To avoid overlap when printing 8 lines/inch, specify .079" type size.
(2) Arrangements PN and GN require Universal Character Set Attachment (#8639) on the 5203.
(3) LC arrangements on previously installed machines may be modified to the HN arrangement. Submit an MES specifying "Change installed chain (train) Feature Number _____ to Number _____".

Prices (15 type slugs)

Chain... mdl 1 or 2
Train... mdl 3

*System/370 mdl 115 only.

Universal Character Set Feature: The System/3 Chain Image Buffer contains 120 positions. Character sets for use with this feature should contain 60 or 120 characters. If the character set contains less than 60 (or 120) different characters, it must be filled out to 60 (or 120) by repeating characters. For example, if only 56 different characters are desired, the character set must be filled out to 60 by repeating four of the 56 characters. This buffer limitation applies only to System/3.

Print Chains (mdl 1 or 2 only)

Specify: For Plant Installation

- One feature # for print arrangement desired ... see "Type Arrangements" above.
- If desired, #9549 for slashed zero in lieu of standard zero in any arrangement.
- If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement.
- If desired, #9722 for Exclamation Point (!) in lieu of Logical OR (|) in the GN arrangement.
- If desired, #9723 for Circumflex (^) in lieu of Logical NOT (!) in the GN arrangement.
- If desired, #9140 for enlarged dash in lieu of standard dash for printing on documents to be read by optical mark readers. Available as substitution in all arrangements.
- If desired, #9690 for Non Standard Type Arrangement. See "Substitute Characters" paragraphs on TC #.

For Field Installation

- If a new or additional print chain is desired, see "New Print Chains" below. For field installation of #9549, #9676, #9722, #9723 or #9140 see "specify" under "Substitute Characters" below.

New

Print Chains: Additional, spare or replacement chains are available for interchangeable chain cartridges used on the 5203.

Any one arrangement, chain only:

Feature #

#5532

Specify:

- #5532.
- One feature # for print arrangement desired ... see "Type Arrangements" above.
- If desired, #9549 for slashed zero in lieu of standard zero in any arrangement.
- If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement.
- If desired, #9722 for Exclamation Point (!) in lieu of Logical OR (|) in the GN arrangement.
- If desired, #9723 for Circumflex (^) in lieu of Logical NOT (!) in the GN arrangement.
- If desired, #9140 for enlarged dash in lieu of standard dash for printing on documents to be read by optical mark readers. Available as substitution in all arrangements.

Print Trains (mdl 3 only)

Specify: For Plant Installation

- One feature # for print arrangement desired ... see "Type Arrangements" above.
- If desired, #9549 for slashed zero in lieu of standard zero in any arrangement.
- If desired, #9676 for round alphabetic "O" in lieu of standard squared "O" in any arrangement.
- If desired, #9722 for Exclamation Point (!) in lieu of Logical OR (|) in the GN arrangement.
- If desired, #9723 for Circumflex (^) in lieu of Logical NOT (!) in the GN arrangement.
- If desired, #9140 for enlarged dash in lieu of standard dash for printing on documents to be read by optical mark readers. Available as substitution in all arrangements.
- If desired, #9690 for Non Standard Type Arrangement. See "Substitute Characters" paragraphs on TC #.

For Field Installation of Interchangeable Train Cartridge, Add'l (#4740)

- One feature # for print arrangement desired ... see "Type Arrangements" above.
- #9549, #9676, #9722, #9723 or #9140 may be specified on MES for substitution in the arrangement selected. For other character substitutions see "Specify" under "Plant Installation" of "Substitute Characters" below.

For modification of installed chains/trains, see "Field Installation" under "Substitute Characters" on page TC #.

5203 Printer— System/3 Models 8, 10 and 12 (cont'd)

Print Chains: Print chains consist of multiple arrays of type slugs placed end to end. There are two characters per slug. Each chain has a total of 120 slugs (240 character positions). In the layouts illustrated below, the characters are depicted as they appear on the chain.

Standard Chains: Arrangements LC and HN consist of 5 identical arrays of 24 slugs each. Only the first array is illustrated. 48 graphics.

LC - 1st Array	12 34 56 78 90 # @ / S TU VW XY Z E , % JK LM NO PQ R - \$ * AB CD EF GH I + . ' .
HN - 1st Array	12 34 56 78 90 = ' / S TU VW XY Z E , (JK LM NO PQ R - \$ * AB CD EF GH I + .)

Character position numbers are assigned as follows for the 5 arrays: 1st array: 1-48, 2nd array: 49-96, 3rd array: 97-144, 4th array: 145-192, 5th array: 193-240.

Universal Character Set Chain: Arrangement PN consists of 4 identical arrays of 30 slugs each. Only the first array is illustrated. 60 graphics.

PN - 1st Array	12 34 56 78 90 XY / S TU VW I : _ " , = JK LM NO PQ R - Z (AB CD EF GH I + .) % \$ * # & @ < ; - ' ? >
----------------	--

Character position numbers are assigned as follows for the 4 arrays: 1st array: 1-60, 2nd array: 61-120, 3rd array: 121-180, 4th array: 181-240.

Arrangement GN consists of 4 arrays of 30 slugs each. The first and third arrays are identical, as are the second and fourth. Only the first and second arrays are illustrated. 63 graphics.

GN - 1st Array	12 34 56 78 90 XY / S TU VW I : _ " , = JK LM NO PQ R - Z (AB CD EF GH I + .) % \$ * # & @ < ; - ' ? >
- 2nd Array	12 34 56 78 90 XY / S TU VW I : _ " , = JK LM NO PQ R - Z (AB CD EF GH I + .) % \$ * \ < ; - ' ? >

Print Trains: The Interchangeable Train Cartridge consists of multiple arrays of type slugs placed end to end with 3 characters per slug. Each cartridge has a total of 80 slugs (240 character positions). In the layouts illustrated below, the characters are depicted as they appear on the cartridge.

Standard Arrangements: Arrangements LC, AN and HN consist of 5 identical arrays of 16 slugs each. Only the first array is illustrated. 48 graphics.

LC - 1st Array	123 456 789 0# @ / ST UVW XYZ E , % JKL MNO PQR - \$ * ABC DEF GHI + . ' .
AN - 1st Array	123 456 789 0# @ / ST UVW XYZ E , % JKL MNO PQR - \$ * ABC DEF GHI + . II
HN - 1st Array	123 456 789 0 = ' / ST UVW XYZ E , (JKL MNO PQR - \$ * ABC DEF GHI + .)

Character position numbers are assigned as follows for the 5 arrays: 1st array: 1-48, 2nd array: 49-96, 3rd array: 97-144, 4th array: 145-192, 5th array: 193-240.

Universal Character Set: Arrangement PN consists of 4 identical arrays of 20 slugs each. Only the first array is illustrated. 60 graphics.

PN - 1st Array	123 456 789 0XY / ST UVW I : _ " , = JKL MNO PQR - Z (ABC DEF GHI + .) % \$ * # & @ < ; - ' ? >
----------------	---

Character position numbers are assigned as follows for the 4 arrays: 1st array: 1-60, 2nd array: 61-120, 3rd array: 121-180, 4th array: 181-240.

Arrangement GN consists of 4 arrays of 20 slugs each. The first and third arrays are identical, as are the second and fourth. Only the first and second arrays are illustrated. 63 graphics.

GN - 1st Array	123 456 789 0XY / ST UVW I : _ " , = JKL MNO PQR - Z (ABC DEF GHI + .) % \$ * # & @ < ; - ' ? >
- 2nd Array	123 456 789 0XY / ST UVW I : _ " , = JKL MNO PQR - Z (ABC DEF GHI + .) % \$ * \ < ; - ' ? >

Character position numbers are assigned as follows for the 4 arrays: 1st array: 1-60, 2nd array: 61-120, 3rd array: 121-180, 4th array: 181-240.

Substitute Characters: For available standard arrangements, see above. It is not feasible to make actual printing tests on non-standard characters. Therefore, printing and ribbon life from chains or trains with non-standard characters may be less satisfactory than results from standard chains or trains. It should also be noted that because of limitations of type face area (height, width, etc.), characters of the customer's design are subject to acceptance by the plant.

A substitute character is one which is ordered to displace a character in one of the standard arrangements. Standard characters may be rearranged, special characters may be selected from the type catalog, or characters of the customer's design may be substituted, subject to the above limitations.

Note: A substitute character assumes the card and bit codes of the character it replaces in the system to which the printer is attached, unless the card and bit codes are changed.

Character substitutions may be ordered for plant or field installation on a print chain or train, subject to the following:

Artwork (#9950): A Service Charge will be made for designing a new character. Any character illustrated on pages 52 to 58, or any character previously designed for the 1403-2, 5, 7, 1416 or 5203 (except for "Limitations" below) may be substituted in any position of any type slug without charge for artwork.

Limitations: [1] The ABA E-13B type font cannot be used. . . [2] Characters from the SN5 and TN5 arrangements of the 1403 cannot be substituted in other arrangements.

Matrix (#9951 and #9953): Each print chain type slug consists of two characters and requires one matrix (#9951). Each print train type slug consists of three characters and requires one matrix (#9953). A Service Charge will be made for the matrix unless identical 2-character or 3-character matrices (same characters in same positions) exists at the plant. This charge is in addition to that for Artwork.

Set-Up (#9952 and #9954): In addition to charges for Artwork and Matrix (if applicable), a Service Charge applies each time a set-up is required to fabricate a special type slug. This charge is the same regardless of the quantity of identical slugs made at any one time. On re-orders of identical slugs, the set-up charge again applies.

Service Charges for Artwork, Matrix and Set-up should be authorized on all orders for non-standard characters. The charge for Artwork need not be specified when character numbers from the illustrated catalog are ordered, indicating that artwork is available. The plant will review all orders to determine if Artwork and Matrix are required. The Service Charges (even though authorized) will not be billed unless applicable.

Chain (for 5203 mdl 1 and 2)	Feature
Artwork, per character	#9950
Matrix, per slug (2 character)	9951
Set-up for 2 character slug	9952
Train (for 5203 mdl 3)	
Artwork, per character	#9950
Matrix, per slug (3 character)	9953
Set-up for 3 character slug	9954

FC #9690 (Non-standard Type Arrangement) will be specified for: 1) Rearrangement of standard type slugs; 2) Rearrangement of standard characters in one or more slugs; 3) Substitution of other available characters in slugs; 4) New design characters.

Plant Installation (original assembly of chain or train): Any standard type slug (size, font) can be specified in any desired arrangement at no extra charge. See above for standard slug configurations in each print arrangement. Instructions for rearrangement of standard characters and slugs, and definition and location of special design slugs is printed.

Multiple Machine Orders (identical type specs - plant installation): On a multiple machine order, the Service Charges for Artwork, Matrix and Set-up apply only to the first machine and are to be entered on AAS for that machine order only.

For additional machines with all specs identical (including type), enter quantity of machines and specify #9695 (Special Type - Multiple Machine Order) at no charge.

Once Plant Order numbers are assigned, enter the following under "Remarks":

On first machine order, indicate that Service Charges for special type also cover all other plant order numbers:

Example: SVC CHGS FOR SPEC TYPE COVER
E12341 E12342 E12343 E12344
E12345

On each additional machine order, indicate plant order number (first machine) which carries Service Charges:

Example: SVC CHGS FOR SPEC TYPE ON
E12340

5203 Printer-- System/3 Models 8, 10 and 12 (cont'd)

Multiple Machine Orders (cont'd)

A separate Type Spec Sheet (Z120-1089) is required for each machine and must be sent to the Endicott Plant with sufficient lead time for the manufacturing schedule.

The spec sheet for the first machine must include the Service Charges as entered on that machine order plus a transmittal (memo) listing the Plant Order numbers of all additional machines involved. The spec sheet for each additional machine must indicate the Plant Order number of the machine which carries the Service Charges. (This may be written in the money fields of the Spec Sheet as "Service Charges on P.O. (insert number)."

Note: This cross reference of Plant Order numbers is mandatory on machine orders and Type Spec Sheets.

If an additional machine with identical type specs is ordered prior to shipment of a machine which carries the Service Charges, specify #9695 on the AAS order, and indicate under "Remarks" the Plant Order number which carries the Service Charges. Send a Type Specification Sheet to the Endicott Plant indicating the Plant Order No. of the machine which carries the Service Charges. (When the order is entered after shipment of the machine carrying the Service Charges, the Set-up charge will apply.)

If a machine with #9695 specified at no charge is shipped before the machine specifying the Service Charges, the plant will transfer the charges to the machine which is shipped first and substitute "No Charge" on the other one.

- **Specify:** [1] Feature # of print arrangement which most closely resembles that desired by the customer.
- [2] #9690 (Non-standard Type Arrangement) must be specified for any of the following changes
 - 1) Rearrangement of standard type slugs
 - 2) Rearrangement of standard characters in one or more slugs.
 - 3) Substitution of other available characters.
 - 4) New special characters.
- [3] Feature #s and charges for Artwork, Matrix and Set-up, if required. The Service Charges (even though authorized) will not be billed unless applicable.
- [4] Type Specification Sheet (Z120-1089) must be submitted for each order for substitute characters. Once a type specification sheet has been submitted and additional characters are desired, a new type specification sheet is required. It must include all characters desired... those previously ordered and the new ones.

Field Installation: The prices shown below apply to installation of standard type slugs (to which charges for Artwork, Matrix and Set-up are to be added if applicable).

Print chains or trains are made up of identical arrays of type slugs as described above. When a modification is made to a slug in one array, corresponding type slugs must be changed in all identical arrays.

Type Slug Substitutions (on any one chain or train)

Chain (5203 mdl 1 and 2)	Feature
First type slug	#8371
Ea, add'l slug (at same time)	8372
Train (5203 mdl 3)	
First type slug	8373
Ea, add'l slug (at same time)	8374

- **Specify:** [1] Feature # of installed chain or train which is to be modified.
- [2] Applicable Feature # and charges for Artwork, Matrix and Set-up.
- [3] Feature #s and charges for type slug substitutions. Type slugs (#8371, #8372, #8373 and #8374) may be ordered on MES with Type Specification Sheet Z120-1089, attached for any of the following:

	Type Catalog Character Number	
	.095" Type Size	.079" Type Size
Round alphabetic "O" in lieu of standard squared "O"	251839	475504
Slashed zero in lieu of standard zero	474129	475539
Exclamation Point in lieu of Logical OR	749306	859820
Circumflex in lieu of Logical NOT	847243	847243

Contains six copies of: 0123456789.,

Contains four copies of: ABCDEFGHIJKLMNOPQRSTUVWXYZ\$/—*

Nominal rated speed using this belt:

Lines containing numerics only (0–9.): 225 lpm, Model 1; 395 lpm, Model 2

Lines containing other characters: 160 lpm, Model 1; 300 lpm, Model 2

Unprintable characters will result in degraded speed.

Note that the average speed for a given print run will vary from 160 to 225 lpm for Model 1, and from 300 to 395 for Model 2, depending on the proportion of numeric print lines in the run.

Note: Character code assignments other than those shown within all outlined areas of these charts are undefined. If an undefined character code is programmed, the character will be undefined. The character printed for a given undefined character code may be different for other devices. IBM reserves the right to change at any time the character displayed for an undefined character code.

5251 DISPLAY STATION/ 5252 DUAL DISPLAY STATION

Typewriter Keyboard (#4600)

Data Entry Keyboard (#4601)

**Data Entry Keyboard
(Feature Code 4601)**

**With Proof (#4602)**

5253/5254 DISPLAY STATIONS

Keyboards Only one keyboard is physically installable on the IBM 5253 and 5254 Display Stations. This is the U.S. keyboard ID # 1 which may have 92 or 96 characters.

Other U.S. and foreign keyboard arrangements may be obtained however, by **emulation** using the facilities of the 5520 Administrative Processing Program. These are keyboard IDs # 2, 3, 4, 5, 6, 7, 8, 17, 19, 25, 29, 31, 37, 39, 41, 43, 45, 47, 49, 51, 53, 55, 57, 67, 100, 101, 103, and 251.

For the creation of symbol characters at the display station, additional keyboard ID numbers 202 and 204 are supported by the IBM 5520 Administrative Processing Program as alternate keyboards to the keyboard ID currently in operation. Symbol characters are generated into the datastream by using code key combinations, while the characters displayed are the corresponding ones from the non-symbol character set, video reversed.

Those symbols created using keyboard ID numbers 202 and 204 are printable on the IBM 5258 Printer with the optional symbol font.

The keyboard layouts and characters obtained are illustrated on the following pages in the Type Catalog.

Type Styles The print samples provided for the IBM 5258 Printer fonts are given to illustrate the style of printing only. Quality of print and size of characters cannot be accurately reproduced in these Type Catalog pages.

(Printable on the IBM 5258 Printer)

Keyboard Position	Upper Case Character	Lower Case Character
E00	Greater than or equal to	Less than or equal to
E01	Superscript one	Superscript one
E02	Superscript two	Superscript two
E03	Superscript three	Superscript three
E04	Superscript four	Superscript four
E05	Superscript five	Superscript five
E06	Superscript six	Superscript six
E07	Superscript seven	Superscript seven
E08	Superscript eight	Superscript eight
E09	Superscript nine	Superscript nine
E10	Superscript zero	Superscript zero
E11	Underscore	Double underscore
E12	Superscript diagonal	Superscript equal
D01	Overscore (long)	Throughscore
D02	Superscript delta	Blank substitute
D03	Superscript infinity	Epsilon (l.c.) (is an element)
D04	Right angle	Is not an element
D05	Total	Solid diamond
D06	Breve	Parallel
D07	And	Or
D08	Slash Zero	Therefore
D09	Superscript pi	Solid triangle
D10	Script ell (lc)	Closed circle (large bullet)
D11	Closed box (square)	Pi (lc)
D12	Superscript plus	Superscript minus
C01	Delta	Circle plus (direct sum)
C02	Union (logical sum)	Intersection (logical product)
C03	Includes (is superset of)	Is included in (is subset of)
C04	Less than	Open box (square)
C05	Beaker (bottle)	Minus or plus
C06	Lozenge	Pro mille (per thousand)
C07	Greater than	Angle
C08	Superscript right arrow	Perpendicular
C09	Increase	Decrease
C10	Radical	Reverse slash
C11	Bullet (multiply sign)	Divide sign
C12	Cancelled box	Not equal
B00	Seconds	Minutes
B01	Approximately equal (congruent)	Left brace
B02	Identical with	Right brace
B03	Left square parenthesis	Right square parenthesis
B04	Varies directly as	Multiply sign
B05	Infinity	Trademark
B06	Sine	Prescription
B07	Partial difference	Mu
B08	Short overbar (macron)	International monetary symbol
B09	Dagger	Double dagger
B10	Integral	Cycle (similar or equivalent)

5280 DISTRIBUTED DATA SYSTEM

5280 Display Graphics:

The graphics for each available 5280 character set are illustrated on the following pages.

The character sets are presented for reference only. Because of differences in character formation between a printer and a CRT, the printed graphics that follow do not necessarily represent the final appearance of the displayed graphics.

Some system generated special characters are not shown.

United States and Canada (EBCDIC) (#2956)

5320 SYSTEM UNIT—SYSTEM/32

System/32 character sets provide graphics for the keyboard, the display, and for printing. Any one of these character sets may be specified on the initial 5320 order. The Feature Numbers indicated below apply to plant installation:

Character Set	Feature (A mdl's)	Feature (B and C mdl's)	
	.117"	.079"	.095"
48 (EBCDIC)	N/A	#9491	#9497
64 (EBCDIC)	STD	#9490	#9496
64 (ASCII)	#9370	#9493*	#9498*
96 (Modified Courier)	N/A	N/A	#9499
96 (Artisan)	N/A	N/A	#9487
48 (FORTRAN)	N/A	N/A	#9492

Additional Print Belts (5320 B and C models only): An additional print belt, interchangeable with the one provided with the system may be ordered as an accessory.

Character Set	Feature(s)	
	.079"	.095"
48 (EBCDIC)	#5906	#5911
64 (EBCDIC)	#5905	#5910
64 (ASCII)	#5907	#5912
96 (Modified) Courier)	N/A	#5913
96 (Artisan)	N/A	#5914
48 (FORTRAN)	N/A	#5552

* Also specify #9370 for ASCII keytops and Display Screen graphics.

5340 SYSTEM UNIT – SYSTEM/34

There are no System/34 printer or display units. However, the following IBM printers and display units can be used with the System/34:

- 3262 Printer (Mdl B1 only)
- 5211 Printer (Mdls 1 and 2)
- 5225 Printer
- 5251 Display Station
- 5252 Dual Display Station
- 5256 Printer

For information on these products, refer to the individual "Machine" or "Type Catalog" pages.

6240 MAG CARD TYPEWRITER KEYBOARD SUPPORT

IBM 6240 MAG CARD TYPEWRITER KEYBOARD

A 92-character keyboard is standard on the IBM 6240. A 96-character keyboard is available at the time of order as a no-charge option. It is recommended that legal customers order a 96-character keyboard. The IBM 6240 does not offer an 88 or 94-character keyboard. However, the IBM 6240 does support 88 or 94-character keyboards.

STANDARD/OPTIONAL KEYBOARD SWITCH

The Standard/Optional Keyboard switch enables compatibility with magnetic cards created on 88-character keyboards. At the time of the order, the customer should select either a 92 - or 96 - character keyboard. If the IBM 6240 needs to support magnetic card typewriters with 88-character keyboards, an "optional" keyboard must be selected to ensure card compatibility. *The Standard/Optional Keyboard switch allows the IBM 6240 to support only one other 88-character keyboard arrangement that requires the optional switch. See the keyboard support chart to determine which 88-character keyboards require the optional switch. If the working environment to be supported consists of more than one 88-character keyboard arrangement that requires the optional switch, a decision must be made as to which one keyboard arrangement will be supported by the Optional Keyboard switch.*

The differences between the 92/96-character keyboards and 88-character keyboards are:

- The electronic connection that converts 92/96-character keyboards to 88-character keyboards.
- Additional keybuttons.

When the keyboard switch is in the Optional position, the operator types on the IBM 6240 as if it were an 88-character keyboard. The operator will ignore the keybutton engravings on the 92/96 character keyboard. The additional keybuttons are inoperative in the Optional mode. Dual engraved keybuttons are available on an SER basis.

The Optional Keyboard is provided by an electronic connection that converts a 92/96-character keyboard to the 88-character keyboard ID selected at the time of order. Magnetic cards created by mag card typewriters (88-character keyboards) other than the IBM 6240 must be played out and revised in the Optional Keyboard mode. Magnetic cards recorded at the IBM 6240 using ID 2 (88-character keyboard) should be revised and played back in the Standard mode. Even though ID 2 is an 88-character keyboard, magnetic cards created at the IBM 6240 do not need electronic conversion like magnetic cards created at other 88-character keyboards.

ORDERING INFORMATION

STANDARD KEYBOARDS	FEATURE CODE
92-character (ID 1 & 2)	Standard
96-character (ID 1 & 2)	7843
96-character Latin America (ID 25)	7916

The keyboard arrangements for IDs 17, 19, 101, 103 are included in the above keyboards when the proper print wheel is selected. (Extended Font Feature required for communications of these four ID's.) Reference IBM 6240 Keyboard Support Chart in this chapter.

PRINT WHEELS

The print wheels for the IBM 6240 are comprised of 96 characters (see 96 character keyboard illustration) and support all keyboards supported by IBM 6240 with the exception of three keyboard groups. The IBM 6240 Accounting print wheels must be used for ID's 17 and 19. The Communication print wheels must be used for ID 101 (EBCDIC) and ID 103 (ASCII). All foreign languages use different print wheels. These three keyboard groups also require the Extended Font Feature for Communications.

NOTE: All type styles, when used on the IBM 6240, will provide 6 or 8 lines per inch (half index of 4/48 and 3/48 incremental spacing respectively) through the use of the line spacing option switch. This is standard equipment. A third line spacing position, which provides additional flexibility (e.g. form applications) with half index of 1/48 incremental spacing is available on an SER basis. This is installed without charge when ordered with the machine from the plant.

NOTE:

Unless specified otherwise, IBM Office System 6 Information Processors, the IBM 6640 Document Printer, and the IBM 6670 Information Distributor will be manufactured to read magnetic cards recorded on any IBM mag card typewriter equipped with a 101 (correspondence) keyboard, using an element with the American Standard Character set (!/1 in Pos. 0 and ¼/½ in Pos. 41). Any of the following standards may be specified to satisfy customer requirements (see "Keyboard Compatibility Groups" in the Order Entry Handbook):

KEYBOARD	POS. 0	POS. 41
